# AXA IM Swiss Fund – Bonds CHF

## Investment objective

This fund invests primarily in CHF-denominated bonds issued by Swiss and foreign borrowers in the investment-grade range (investments with a minimum rating of BBB- according to S&P or Baa3 according to Moody's). The fund's investment objective is to achieve high and regular income while providing capital security.

The Swiss Bond Index AAA-BBB Total Return has been used as the benchmark since January 1, 2014 (the AAA-A index was used until December 31, 2013). The aim is to generate a significant excess return using active duration and yield curve management as well as targeted sector overweighting or underweighting relative to the benchmark index. The profile also involves targeted security selection and replacing „expensive“ bonds with newly issued, cheaper ones, taking sustainability aspects (RI scores and screening criteria) into account.

## Investment activity and performance

The reporting period was dominated by the central banks' continuing rate hikes. These were intended not just to stabilize inflation rates, which had risen sharply last year, but to steer them back toward the target levels.

At the start of the new year, China's rapid reopening and signs of headline inflation easing worldwide made for upbeat market sentiment and a global decline in interest rates. An initial correction of yield curves around the world in the form of sharply rising yields was triggered in February by the realization that, while overall inflation might fall more quickly than expected, economic growth could turn out to be stronger than expected, which would lead to a protracted period of high core inflation and thus restrictive monetary policies with a focus on the longer term.

Shortly after this, the collapse of Silicon Valley Bank due to mismanagement of its balance sheet had a short-lived but heavily negative impact on trust in the global banking system. This in turn sent yields plummeting in anticipation of imminent central bank rate cuts. In Switzerland, meanwhile, UBS staged a dramatic emergency takeover of Credit Suisse, aided by guarantees from the federal government and liquidity assistance from the SNB. The loss of trust in Credit Suisse had prompted many customers to withdraw their money, causing a steady deterioration in the bank's liquidity situation to the point where it could no longer stay in business without a massive rescue package.

Things started to calm down once this was generally accepted as not being a threat to the system as a whole. Global yields have since been rising continually thanks to restrictive central bank policies, a still robust US job mar-

ket, resilient economic indicators, and stabilizing purchasing managers' indexes. With household savings levels still high after the lockdowns due to the coronavirus pandemic, there were catch-up effects in consumer spending, particularly for service sectors. However, this strong upturn has not been reflected in the CHF bond market, which has instead been trending sideways since Q2 2023. This is due in part to major institutional investors increasingly adjusting their asset allocations in favor of CHF bonds.

Switzerland acted as Europe's only safe haven during the reporting period. Due to its strong currency and an energy supply policy that differs from that of the EU, its overall annualized inflation rate peaked at just 3.5%, compared with a figure of more than 10% for the EU toward the end of last year. The situation on the bond markets was similar, with the ten-year Swiss government bond yield remaining almost unchanged at 1.10% throughout the reporting period while its German counterpart rose by more than 80 basis points to approach 3%. The ten-year US Treasury yield mirrored the EU trend, also rising by 80 bp from 3.70% to just over 4.50%.

Credit spreads remained tight overall over the course of the year, with the exception of a brief countermove in March.

The fund's duration was strategically kept slightly below that of the index for most of the time, which generated disappointingly little alpha. The highly volatile markets were not always correctly anticipated in good time, so tactical positioning tended to have a negative impact. The strategic underweight in currently very expensive government bonds, set against an overweight in undervalued Pfandbrief bonds and other high-quality issuers, has not yet had the desired positive effect on performance. This positioning will be maintained and should add value as intended going forward. The more or less neutral positioning in credits was unremarkable with regard to performance.

The performance over the reporting period from October 1, 2022 to September 30, 2023 was thus only moderately satisfactory in relative terms, especially since the costs incurred by the various share classes could only be partially offset:

+2.47% for the A share class (AXABDAI – ISIN CH0112537516 – „retail class“), lagging 62 bp behind the benchmark;  
+2.89% for the I share class (AXABDII – ISIN CH0112537557 – „institutional class“), lagging 20 bp behind the benchmark, which ended the reporting period with a gain of 3.09%. That said, these figures are net of all costs (A share class: 0.75%, I share class: 0.35%).

# Notes to the annual report

## Sales restrictions USA

It is prohibited to issue and redeem units of subfunds abroad. In particular, units of subfunds may not be offered, sold, or delivered within the USA. Units of subfunds may neither be offered, sold, nor delivered to US persons within the definition of Regulation S of the US Securities Act of 1933, in particular investors with US nationality or investors domiciled or residing in the USA.

## Terms for the Issue and Redemption of Fund Units

Subfund units will be issued and redeemed on each bank working day (Monday to Friday). No issue or redemption will take place on Swiss public holidays (Easter, Whitsun, Christmas and Boxing Day, New Year, August 1, etc.) or on days on which the stock exchanges and markets in the main investment countries of a subfund are closed, or under the extraordinary circumstances defined under § 17 para 5 of the fund contract.

Subscription and redemption orders received by the Custodian Bank by no later than 1:30 p.m. on a bank working day (order day) will be settled on the next bank working day (valuation day) on the basis of the net asset value calculated on this day (cf. § 16 para 7 of the fund contract). The net asset value taken as the basis for the settlement is therefore not known when the order is placed (forward pricing). It will be calculated on the valuation day based on the closing prices on the order day.

The net asset value of a unit of a given class of a subfund is determined by the proportion of this subfund's assets as valued at the market value attributable to the given unit class, minus any of this subfund's liabilities that are allocated to the given unit class, divided by the number of units of the given class of this subfund in circulation. It will be rounded to CHF 0.01.

The issue price of the units of a particular class corresponds to the net asset value of this class calculated on the valuation day, plus the issuing commission. The amount of the issuing commission can be found in section 1.11.4 (prospectus of the fund).

The redemption price of the units of a particular class corresponds to the net asset value of this class calculated on the valuation day, minus the redemption commission. The amount of the redemption commission can be found in section 1.11.4 (prospectus of the fund).

In the case of unit issues, the incidental costs (specifically standard brokerage charges, commissions, taxes, and

fees) incurred on average by the subfunds in connection with the investment of the amount paid in will be added to the net asset value. The applicable rate is stated in section 1.11.4 (prospectus of the fund).

In the case of unit redemptions, the incidental costs incurred on average by the subfunds in connection with the sale of a portion of investments corresponding to the redeemed units will be deducted from the net asset value. The applicable rate is stated in section 1.11.4 (prospectus of the fund).

In extraordinary circumstances such as the closure of one or more investment markets for a lengthy period of time, restrictions on foreign currency transactions or movement of capital, or another form of market disruption (political upheaval, terrorist attacks, natural disasters, etc.), the fund management company, in the interests of the remaining investors in the fund, reserves the right to reduce all redemption requests on days when the total amount of redemptions exceeds 10 % of the fund's net assets ("gating"). In such circumstances, the fund management company may decide to reduce all redemption requests proportionally and in the same ratio to 10 % of the fund's net assets. The remaining portion of the redemption requests is deemed to have been received on the following valuation day and will be processed on the basis of the conditions prevailing on that day. Accordingly, deferred redemption requests are not given preferential treatment.

The fund management company immediately notifies the auditors, supervisory authority and – in an appropriate manner – investors of the decision to use or discontinue the gating procedure.

## Fees and ancillary costs

### Fees and ancillary costs charged to the investors

Issuing commission credited to the fund management company, custodian bank, and/or distributors domestically and abroad no more than 5%.

Redemption commission credited to the fund management company, custodian bank, and/or distributors domestically and abroad no more than 2%.

## Matters of special economic and legal significance

### 1 Changes in the Executive Board and the Board of Directors of the fund management company

Mr. Laurent Caillot joined the Board of Directors and became its Executive Chairman with effect from September

14, 2022.

Mr. Jean-Christophe Ménoux stepped down as Executive Chairman and member of the Board of Directors with effect from the same date.

Mr. Laurent Caillot stepped down from the Board of Directors with effect from June 30, 2023.

Ms. Caroline Portel joined the Board of Directors as Executive Chairman with effect from September 14, 2023.

## **2 Active violations against the investment guidelines of the fund contract**

There were no active violations against the investment guidelines of the fund contract in the past accounting year.

## **3 Amendment to the fund contract**

FINMA approved the following amendments to the Fund Contract, submitted by the Fund Management Company with the consent of the Custodian Bank, on September 22, 2023:

### **§ 8 Investment Policy**

#### **Ziffer 3: Anlagepolitik der einzelnen Teilvermögen AXA IM Swiss Fund – Bonds CHF**

Investments are selected for AXA IM Swiss Fund – Bonds CHF on the basis of sustainability criteria relating to environmental, social, and governance (ESG) factors as before. However, these ESG criteria are now described at greater length and in more detail than previously. In addition, sub-headings have been added for greater clarity.

#### **§ 8 section 3.1 Investment Objective and Policy is now worded as follows:**

##### **Investment objective**

This subfund invests primarily in Swiss franc-denominated bonds issued by Swiss and foreign borrowers in the investment grade area (investments with a minimum rating of BBB- according to S&P or Baa3 according to Moody's or other ratings as described in § 8 paragraph 3.3 letter i)). The investment objective of the subfund is to generate a high level of regular income, taking due account of the security of the capital invested. In this respect, the subfund aims to constantly outperform the ESG rating of the investment universe defined by the benchmark index, whereby both the ESG scores of the subfund and those of the benchmark index are calculated on the basis of a weighted average. The benchmark index is the Swiss Bond Index SBI Total AAA-BBB. The achievement of the sustainability goals is disclosed in the annual report.

### **Investment policy**

A corresponding additional yield is intended to be achieved by means of active duration and yield curve management as well as a targeted sector overweighting and underweighting as compared to the reference index. A targeted selection of instruments, in particular with respect to their relative value among bond issues having similar characteristics, round out the profile. For purposes of risk management and as an alternative to direct investment, interest futures on bonds issued by the Swiss Confederation and Germany (in the latter case, subject to a ceiling of 30 % of the assets of the subfund) may be used. The Fund Management Company shall, after deduction of the liquid assets, invest at least 70 % of the assets of the subfund in:

- a) Swiss franc (CHF) denominated bonds, notes and other fixed- or variable interest debt instruments and rights issued by private and public-law borrowers domiciled in Switzerland and abroad;
- b) units of other collective investment schemes, provided that such schemes, according to their documents, invest their assets in whole or in part in accordance with the investment principles of this subfund;
- c) derivatives issued by domestic and foreign issuers (including warrants), provided that the underlying is comprised of the investments specified in subparagraph (a) above, of indices based on the investments specified in subparagraph (a) above or of exchange rates, currencies, interest rates or loans;
- d) structured products issued by domestic and foreign issuers such as, in particular, certificates based on the investments specified in subparagraph (a) above or on indices based on the investments specified in subparagraph (a) above, up to 10 % of the assets of the subfund.

In the case of investments in other collective investment schemes pursuant to subparagraph (b) above and structured products pursuant to subparagraph (d) above, the Fund Management Company shall ensure that, on a consolidated basis, at least 70 % of the assets of the subfund is invested in investments in accordance with subparagraph (a) above.

In addition, subject to subparagraphs (h) and (i) below and after deduction of the liquid assets, the Fund Management Company may invest up to 30 % of the assets of the subfund in:

- e) Swiss franc-denominated money market instruments issued by domestic and foreign issuers, as an investment for purposes of maintaining liquidity;

f) debt instruments and rights (including convertible bonds and bond-linked warrants) of domestic and foreign issuers that do not meet the criteria specified in subparagraph (a) with regard to currency in particular;

g) futures on foreign government securities in EUR for purposes of managing duration and interest risk. In the case of futures, their market exposure (pursuant to 38 para. 1(a) of the Ordinance on Collective Investment Schemes of the FINMA (CISO-FINMA)) is determinative for purposes of counting towards the investment limits.

**§ 8 section 3.2 Responsible Investment (ESG) is new and worded as follows:**

The responsible investment approach applied by the asset manager encompasses ESG integration (see section 1.9.1. in the prospectus) based on the AXA IM scoring framework (see section 1.9.1. a. in the prospectus), subject at all times to mandatory compliance with the policies on sectoral exclusions and the AXA IM ESG standards (see paragraph 1.9.1. b. in the prospectus).

In summary, the subfund invests on the basis of various financial and fundamental sustainability factors such as companies' performance with regard to environmental, social, and governance (ESG) aspects. The Investment Manager aims to integrate ESG standards into the investment process and applies at all times the mandatory sector exclusion guidelines, which include a set of exclusion-based principles focusing on climate (coal and tar sands), biodiversity (protection of the ecosystem and against deforestation), controversial weapons (companies producing anti-personnel mines, cluster bombs or uranium-enriched biological and chemical weapons) and areas such as controversial weapons, climate risks, agricultural commodities and palm oil. They include additional exclusions in connection with health (exclusion of tobacco, in order to avoid financing the tobacco industry and therefore help protect public health) and human rights (white phosphorous weapons, exclusion of investments in securities issued by countries in which severe human rights violations are observed). Companies that violate international norms and standards such as the United Nations Global Compact Principles and the OECD Guidelines for Multinational Enterprises, as well as companies that are implicated in severe ESG-related incidents in areas such as human rights, society, employment, environment and governance, are also excluded. To encourage robust ESG practices, companies with a poor ESG performance – that is, an overall ESG score of under 1.429 (letter rating CCC) on a scale of 0 to 10 – are likewise excluded. The ESG analysis coverage rate within the portfolio is at least 90 % of the assets defined in a) aa) above whereas the exclusion policies are applied at 100 %. The application of the responsible investment approach cannot be guaranteed for the other investments defined under a) abo-

ve, as there is no ESG data coverage of the individual investments or no possibility of including ESG factors, namely in the case of cash holdings, derivatives and underlying permissible units of other collective investment schemes (target funds).

The Sub-Fund follows a sustainable investment approach by applying the ESG integration described in section 1.9.1 of the Prospectus.

**§ 8 section 3.3 is now titled Investment Restrictions and worded as follows:**

The Fund Management Company must also comply with the following investment restrictions, which relate to the assets of the subfund after deduction of the liquid assets:

h) Convertible bonds and bond-linked warrants denominated in CHF or EUR of private and public-law borrowers domiciled in Switzerland or abroad are limited to a maximum of 10 % of the assets of the subfund. Shares acquired through the exercise of convertible bonds and bond-linked warrants must be sold within three months. Warrants that are separated from bond-linked warrants must be sold immediately;

i) The Fund Management Company shall only consider borrowers who, at the time of the investment, have a rating of at least BBB- (Standard & Poor's or Fitch) or Baa3 (Moody's) or an equivalent rating from Credit Suisse, UBS or Zürcher Kantonalbank, provided and so long as the specified banks regularly issue such a rating. Ratings of the specified banks are to be relied on only if no rating of the borrower is available from the specified rating agencies. If the ratings of the rating agencies vary, the lower rating shall be determinative. If the rating falls below the specified minimum requirement, the investment must be sold within 20 banking days, taking into account the interests of the investors;

j) The Fund Management Company may invest a maximum of 49 % of the assets of the subfund in units of other collective investment schemes.

k) The fund management company ensures appropriate liquidity management. The details are disclosed in the Prospectus

**§ 8 section 3.4 is worded as follows:**

The fund management company ensures appropriate liquidity management. The details are disclosed in the Prospectus.

The Fund Contract and Prospectus have also been updated in line with the following new legal and regulatory provisions:

(i) The Federal Act on Financial Services (FinSA) of June

15, 2018 and its implementing ordinance;  
(ii) The Federal Act on Financial Institutions (FinIA) of June 15, 2018 and its implementing ordinance;  
(i) The Federal Act on Collective Investment Schemes (CISA) of June 23, 2006 (status as of January 1, 2020) and its implementing ordinance;  
(iv) The model prospectus with integrated fund contract for a Swiss securities fund (for individual funds), part 1 model prospectus, issued by the Asset Management Association Switzerland (AMAS), of May 20, 2015 (status as of March 29, 2022); and  
(v) The model prospectus with integrated fund contract for a Swiss securities fund (for individual funds), part 2 fund contract, issued by the Asset Management Association Switzerland (AMAS), of May 20, 2015 (status as of January 24, 2022).

**§ 17 Issue and Redemption of Units**

The gating clause (liquidity management in special circumstances) for the subfund AXA IM Swiss Fund – Bonds CHF has been amended and expanded.

**§ 17 paragraph 8 is now worded as follows:**

In extraordinary circumstances such as the closure of one or more investment markets for a lengthy period of time, restrictions on foreign currency transactions or movement of capital, or another form of market disruption (political upheaval, terrorist attacks, natural disasters, etc.), the fund management company, in the interests of the remaining investors in the fund, reserves the right to reduce all redemption requests on days when the total amount of redemptions exceeds 10 % of the fund's net assets ("gating"). In such circumstances, the fund management company may decide to reduce all redemption requests proportionally and in the same ratio to 10 % of the fund's net assets. The remaining portion of the redemption requests is deemed to have been received on the following valuation day and will be processed on the basis of the conditions prevailing on that day. Accordingly, deferred redemption requests are not given preferential treatment.

**§ 17 paragraph 9 is new and worded as follows:**

The Fund Management Company must immediately communicate the decision on the application as also the cancellation of the gating to the audit firm, the supervisory authority as also to the investors in an appropriate manner.

**4 Soft commissions**

In the financial year 2022/2023 accounting year, AXA Investment Managers Switzerland Ltd. entered into no soft commission agreements and received no soft commissions.

# Reporting on Sustainability (ESG)

---

## Reporting on Sustainability as of 30.09.2023

Sustainability is at the heart of everything we do, with the ambition to be the world's leading responsible asset manager. That's why AXA IM strongly engages for progress in environmental, social and governance (ESG) aspects as a company, employer and investor.

### Sustainable Investment strategy of the sub-fund

The subfund invests based on various financial and fundamental sustainability factors such as the performance of these companies with regard to environment, social and governance "ESG". The subfund always aims at outperforming the ESG rating of the investment universe as defined by the benchmark, both ESG scores of the subfund and the benchmark being calculated on a weighted average basis. The aim is to assess how companies mitigate the most material ESG risk and take advantage of the most significant opportunities to improve their competitive standing in their own sector. The ESG analysis coverage rate within the portfolio is at least 90 % of the net assets of the subfund.

In addition, the asset manager aims to integrate ESG standards into the investment process and, in the securities selection process, bindingly applies at all times AXA IM's Sectorial Exclusion which include a series of exclusion-based policies with a focus on climate (coal and tar sands), Biodiversity (ecosystem protection and deforestation), Controversial weapons (those companies that manufacture and distribute anti-personnel landmines and cluster bombs together with depleted uranium, biological and chemical weapons) and sectors such as agricultural commodities and palm oil. In addition, AXA IM's ESG Standards policy is applied bindingly, with additional exclusions related to Health (exclusions on tobacco to avoid financing the tobacco industry and thus contribute to protecting public health) and Human Rights (White Phosphorus Weapons, exclusion of investments in securities issued by countries where serious specific categories of violations of Human Rights are observed). In addition, companies in violation of international norms and standards such as the United Nations Global Compact Principles or the OECD Guidelines for Multinational Enterprises, as well as companies which are involved in severe ESG-related incidents which cover themes such as Human Rights, Society, Labor, Environment as well as Governance are excluded. Further, to encourage robust ESG practices, companies with low ESG quality based on ESG scores are excluded. Excluded from this are derivatives and underlying eligible shares in other collective investment schemes (target funds).

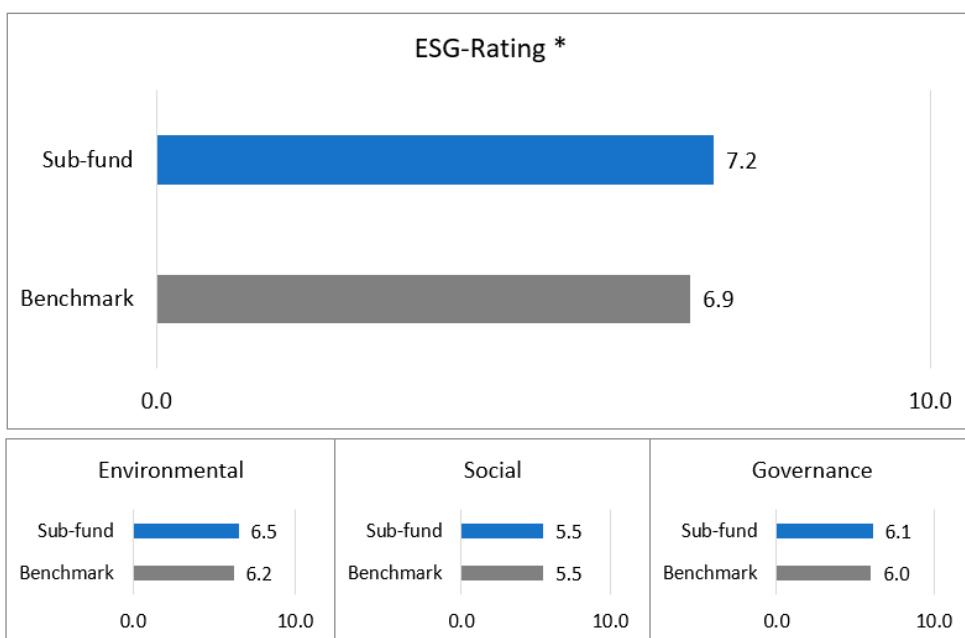

Furthermore, AXA IM pursues a comprehensive active ownership strategy encompassing engagement. The asset manager's goal is to use its influence as an investor to encourage companies to reduce key environmental and social risks in their respective industries. This strategy is applied at AXA IM level and may affect securities within the subfund. The information on AXA IM engagement activities is publicly disclosed.

For further information regarding the AXA IM ESG Standards and ESG framework and scoring methodology, the Exclusion of sectors (Negative Screening), Engagement and Voting please refer to: <https://www.axa-im.com/our-policies-and-reports>.

## Active ownership and stewardship report

The active ownership and stewardship report contains details to AXA IM's behaviour regarding engagement and voting and can be found here: <https://www.axa-im.com/document/5853/view>.

## Comment of the portfolio manager

The fund has met its Sustainability objectives and outperformed the benchmark by the end of the year reviewed in terms of the total ESG-Rating (7.2 vs. 6.9) as well as for the Environmental, Social and Governance pillars. Due to the clear preference to higher scored investments, the proportion of assets in the higher scoring bucket 8-10 reaches 25% whereas the benchmark only holds 19%.

**AXA IM Swiss Fund – Bonds CHF**  
**Annual report as at September 30, 2023**

## Current management fees

AXA IM Swiss Fund-Bonds CHF	Management fees (p.a.)
Class A*	0.75%
Class I*	0.35%
Class A AC*	0.75%
Class I AC*	0.35%
Class S AC*	0.15%

\* The following unit classes are designated for the Bonds CHF sub-fund: "A", "I", "A AC", "I AC" and "S AC". Class "A" and "A AC" units may be subscribed to by all investors. Class "I" and "I AC" units may be subscribed to by qualified investors only. Class "S AC" units are available to investors who have entered into a written investment advisory or asset management agreement with a company belonging to the AXA Group. Unit classes "A" and "I" are distributing units, whereas unit classes "A AC", "I AC" and "S AC" are accumulating units. The unit classes also differ with regard to the amount of the management fee.

Qualified investors are defined as supervised financial intermediaries such as banks, securities dealers and fund management companies; supervised insurance institutions; corporations under public law and pension funds with professional treasury operations (including investment foundations) and companies with professional treasury operations. No minimum subscription amount applies to the unit classes "A", "A AC" and "S AC"; a minimum subscription amount of CHF 1,000 applies to the unit classes "I" and "I AC" 1,000,000 for initial subscriptions and CHF 10,000 for subsequent subscriptions.

## DELEGATION OF FUND MANAGEMENT DUTIES

### DELEGATION OF INVESTMENT DECISIONS

The investment decisions of the umbrella fund are made by the fund management company itself.

### Delegation of bookkeeping and securities administration

Bookkeeping and securities administration of the sub-funds are delegated to the Zurich branch of State Street Bank International GmbH, Munich. The precise conditions are regulated in a contract made between the fund management company and the Zurich branch of State Street Bank International GmbH, Munich.

### Delegation of information technology

The Information Technology division of the fund management company is delegated in part to AXA Investment Managers Limited, London, and in part to AXA Investment Managers S.A., Paris. The precise conditions are regulated in contracts made between the fund management company and the service providers mentioned above.

### Delegation von «Middle Office»-Services

The Middle Office services are delegated to State Street Banque S.A., Paris. Middle Office services include in particular (i) Trade Support: validation of transactions with counterparties and settlement instructions vis-à-vis the custodian bank; (ii) Corporate Actions: Instructions to the custodian bank on corporate actions; (iii) Reconciliation: Portfolio reconciliation with the custodian bank. The fund manager arranges the details in the contract with the service provider.

### Delegation of IT services in connection with client relationship management

As a measure within client relationship management, the fund management has delegated the electronic administration of client data to the following company:

Salesforce.com Sàrl  
Routes de la Longeraie 9  
CH-1110 Morges

This company in turn uses Salesforce.com Inc., San Francisco, United States to obtain certain services and outsource others.
