#### Transfer of investment decisions

UBS Asset Management Switzerland AG, Zurich

#### Transfer of investment decisions

The administration of the investment funds, particularly accounting, the calculation of net asset values, tax statements, the operation of IT systems and the drafting of performance reports, has been entrusted to Northern Trust Global Services SE, Leudelange, Luxembourg, Basel branch. The precise duties involved are set out in an agreement between the parties. All other fund management duties and the monitoring of other delegated duties are carried out in Switzerland.

### **Paying agents**

UBS Switzerland AG, Zurich and its branches in Switzerland

#### **Distribution Singapore**

The Investment fund was approved by the Monetary Authority of Singapore (MAS) for exclusive distribution in an institutional framework to accredited investors and other investors pursuant to Section 305 of the Securities and Futures Act and the Sixth Schedule of the Securities and Futures (Offers of Investments) (Collective Investment Schemes) Regulation in Singapore.

# Notices to Investors

### Amendments to the Fund Contract

### UBS 100 Index Fund Switzerland (CH)

### Publication dated 14 November 2023

### 1. Units and unit classes (§ 6)

Pursuant to  $\S6$  (4) (B), the following will be newly added for class I-A1, I-A2, I-A3, I-B and I-X units:

[...]

"Private clients pursuant to Art. 10 para. 3ter CISA who receive investment advice from a financial intermediary within the framework of a long-term investment advisory relationship do not qualify for this unit class."

Further amendments of a purely formal and editorial nature are also being made.

The amendments to the fund contract were approved by the Swiss Financial Market Supervisory Authority FINMA on 19 December 2023. The amendments entered into force on 19 December 2023.

based on the average net fund assets.

#### Commission sharing agreements and soft commissions

The fund management company has not concluded commission sharing agreements. The fund management company has not concluded agreements in respect of soft commissions.

#### **Total Expense Ratio (TER)**

This ratio was calculated in accordance with the AMAS "Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of collective investment schemes" in the current version and expresses the sum of all costs and commissions charged on an ongoing basis to the net assets (operating expenses) taken retrospectively as a percentage of the net assets.

| TER for the last 12 months: |       |
|-----------------------------|-------|
| Class F:                    | 0.17% |
| Class I-A1:                 | 0.20% |
| Class P:                    | 0.27% |
| Class Q:                    | 0.22% |

#### Issue and redemption price

If, on a valuation day, the sum of subscriptions and redemptions of units in the investment fund results in a net inflow or outflow, the investment fund's net asset value will be increased or reduced accordingly (swinging single pricing). The maximum adjustment is 2% of the net asset value. Incorporated into this are the incidental costs (bid/ask spreads, customary brokerage fees, commissions, taxes and duties, etc.), as well as the costs of reviewing and maintaining the quality standards of physical investments arising from the investment of the amount paid in or the sale of a portion of the investments corresponding to the terminated unit. The adjustment results in an increase in the net asset value if the net movements lead to an increase in the number of units in the investment fund. The adjustment results in a decrease in the net asset value if the net movements lead to a reduction in the number of units in the investment fund. These incidental costs are not taken into account if the fund management company permits an inflow or outflow into or out of investments instead of cash according to § 17 prov. 7, or when switching between unit classes within the investment fund. The adjustment will lead to a decrease in the valuation net asset value if the net movements result in a reduction in the number of units

Instead of the average incidental costs mentioned above, the fund management company may also take the actual amount of the ancillary costs into account in the adjustment, provided that this appears appropriate in the fund management company's estimation, taking into account the relevant circumstances (e.g. amount, general market situation, specific market situation for the asset class concerned). In such a case, the adjustment may be higher or lower than the average incidental costs.

In the cases mentioned in § 17 prov. 4 and in other extraordinary cases, the maximum value of 2% of the net asset value may also be exceeded if the fund management is of the opinion that this is in the interests of all investors. The fund management company shall immediately inform the external auditors and the supervisory authority of any decision to suspend redemptions. It shall also notify existing and new investors in an appropriate manner.

|--------------------------|-----|------|

# Appendix to Supplementary information

## Valuation of the fund's assets and calculation of the net asset value

### Valuation of the fund's assets

 The investment fund's net asset value (valuation net asset value) and the net asset value of the units of the individual classes (percentages) shall be calculated in Swiss Franc (CHF) at market value as of the close of the financial year and for each day on which units are issued or redeemed. The investment fund's assets will not be valued on days when the stock exchanges of the main investment countries of the investment fund are closed (e.g. bank or stock market holidays).

However, the fund management company may also calculate the net asset value of a unit class ("non-tradable NAV") on days on which no units are issued or redeemed (see prov. 1.7 of the prospectus). Such non-tradable net asset values may be published. However, they may be used only for performance calculations and performance statistics or for commission calculations, and must under no circumstances be used as the basis for subscription or redemption orders.

- 2. Investments listed on a stock exchange or traded on another regulated market open to the public shall be valued at the current prices paid on the main market. Other investments or investments for which no current market price is available shall be valued at the price likely to be obtained if a sale were conducted with proper care at the time of the valuation. In such cases the fund management company shall use appropriate and recognised valuation models and principles to determine the market value.
- 3. The value of money market instruments which are not listed on a stock exchange or traded on another regulated market open to the public is calculated as follows: The valuation price of such investments is based on the respective interest rate curve. The valuation based on the interest curve comprises an interest rate component and a spread component. The following principles are applied: For each money market instrument, the next rates of interest in respect of the residual term are intrapolated. The rate of interest thus established is converted into a market rate, adding a spread which reflects the creditworthiness of the underlying borrower. This spread is adjusted in the event of a significant change in the borrower's credit rating.
- 4. Bank deposits shall be valued using their exposure amount plus accrued interest. In the event of significant changes in market conditions or the credit rating, the valuation basis for bank deposits on demand shall be adjusted in line with the new conditions.
- 5. Derivative financial instruments listed on a stock exchange or traded on another regulated market open to the public shall be valued at the current prices paid on the main market. Derivative financial instruments not listed on a stock exchange or traded on another regulated market open to the public (OTC derivatives) shall be valued at

the price that would probably be obtained in a diligent sale at the time of the valuation. In such cases the fund management company shall use appropriate and recognized valuation models and principles to determine the market value.

- 6. The percentages of the market value of the net fund assets (fund assets less liabilities) which are to be attributed to the respective unit classes are determined for the first time with the initial issue of several unit classes (if they are issued simultaneously) or the initial issue of an additional unit class on the basis of the inflows to the investment fund for each unit class. The percentage will be recalculated in any of the following events:
  - a) upon the issue and redemption of units;
  - b) on the cut-off date for distributions, provided (i) such distributions accrue only to individual unit classes (distribution classes) or provided (ii) the distributions of various unit classes as a percentage of the respective net asset value differ, or provided (iii) different commission or cost charges accrue on the distributions of various unit classes as a percentage of the distribution;
  - c) for the calculation of the net asset value, in the context of the allocation of liabilities (including costs and commissions which are due or have accrued) to the various unit classes, provided the liabilities of the various unit classes vary as percentages of their respective net asset values, namely if (i) different commission rates are applied for the different unit classes or if (ii) classspecific cost charges arise;
  - d) for the calculation of net asset value, in the context of the allocation of income or investment income to the various unit classes, provided the income or investment income accrues from transactions which were carried out in the interest of one unit class or in the interest of several unit classes, but not in proportion to their share of net fund assets.

#### Calculation of the net asset value

The net asset value of a unit of a class represents the percentage constituted by the unit class concerned of the market value of the investment fund's assets, less any liabilities of the investment fund allotted to the unit class concerned and divided by the number of units in circulation for the respective class. It will be rounded to CHF 0.01.

### Securities Lending

The Company may lend portions of its securities portfolio to third parties. In general, lendings may only be effected via recognized clearing houses such as Clearstream International or Euroclear, or through the intermediary of prime financial institutions that specialise in such activities and in the modus specified by them. Collateral is received in relation to securities lent. Collateral is composed of high quality securities in an amount typically at least equal to the market value of the securities loaned.

## Securities Lending and Collateral

| Securities Lending Fund<br>Revenues                                       | 28 165.62 CHF                              |

Offset payments and commission income from securities lending are recognised in the income statements, and the securities lent and the collateral received for securities lent are reported in the inventory of Fund assets in accordance with the principle of settlement date accounting.

Ernst & Young AG Aeschengraben 27 P.O. Box CH-4002 Basel Tel.: +41 58 286 86 86 www.ey.com/en\_ch

To the Board of Directors of UBS Fund Management (Switzerland) AG, Basel Basel, 25 February 2025

### Short report by the statutory auditor

### Report on the audit of the annual financial statements

### Auditor's opinion

We have audited the annual financial statement of the investment fund

UBS 100 Index-Fund Switzerland (CHF),

consisting of the statement of assets as at 31 October 2024, the income statement for the year ending on that date, information on the appropriation of net profit and the disclosure of costs, as well as further details in accordance with Art. 89, para. 1 b-h of the Swiss Federal Act on Collective Investment Schemes (CISA).

In our opinion, the annual financial statement (pages 2 until 16) has been prepared in accordance with the Swiss Federal Act on Collective Investment Schemes, its related ordinances and the fund contract and the prospectus.

### Basis for the opinion

We conducted our audit in accordance with Swiss law and Swiss auditing standards (SA-CH). Our responsibilities under these provisions and standards are described in more detail in the section "Responsibilities of the statutory auditors for audit of the annual financial statement" of our report. We are independent of the investment fund and the fund management company in accordance with the Swiss legal provisions and the requirements of the profession, and have met our other professional code of conduct obligations in accordance with these requirements.

We believe that our audit evidence is sufficient and appropriate to provide a basis for our opinion.

### Other information

The fund management company's Board of Directors is responsible for other information. Other information comprises the information that is contained in an annual report but not in the annual financial statement and our associated report.

Our opinion of the annual financial statement does not cover the other information and we do not express any form of audit conclusion on this.

In connection with our audit, we are responsible for reading the other information and acknowledging whether the other information is materially inconsistent with the financial statement or the knowledge we obtained in the audit of the financial statement, or otherwise appears to be materially misstated.

If we conclude, on the basis of the work we have performed, that there has been a material misstatement of this other information, we are required to report on this fact. We have nothing to report in this context.

# Responsibilities of the Board of Directors of the fund management company for the annual financial statement

The Board of Directors of the fund management company is responsible for preparing the annual financial statement in accordance with the Swiss Federal Act on Collective Investment Schemes, the related ordinances and the fund contract and the prospectus, and for the internal controls that the Board of Directors deems necessary to enable the preparation of financial statement that are free from material misstatement whether due to fraud or error.

| e | ííÍ |
|---|-----|

#### Responsibilities of the statutory auditors for audit of the annual financial statement

Our objectives are to obtain reasonable assurance as to whether the annual financial statement as a whole is free from material misstatement whether due to fraud or error, and to issue a report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Swiss law and SA-CH will always detect a material misstatement, if any. Misstatement may result from fraud or error and are considered material if they could reasonably be expected individually or collectively to influence the economic decisions of users taken on the basis of these annual financial statement.

As part of an audit in accordance with Swiss law and SA-CH, we exercise professional judgment and maintain professional skepticism throughout the audit. In addition:

- We identify and assess the risks of material misstatement in the annual financial statement whether due to fraud or error, plan and perform audit procedures responsive to these risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal controls.
- We obtain an understanding of the internal control system relevant to the audit in order to plan audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control system.
- We evaluate the appropriateness of accounting methods used and the reasonableness of accounting estimates and related disclosures.

We communicate with the Board of Directors of the fund management company about, among other things, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in the internal control system that we identify during our audit.

Ernst & Young AG

# Other information

## UBS 100 Index-Fund Switzerland (CHF)

During the financial year, from 1 November 2023 to 31 October 2024, Swiss equity markets performed positively. After a strong finish of the year 2023, Swiss stocks continued their upswing until March. Equities were widely supported as implied volatility in bonds declined to its lowest level since the Federal Reserve's tightening cycle began, and economic data continued to signal a broadening of growth. The Swiss equity market, featuring a high share of quality companies and a defensive sector tilt, benefitted by resilient earnings and a first interest rate cut by the Swiss National Bank (SNB) in March. Overall small-cap and mid-caps stocks slightly underperformed large-caps in this period. After a volatile start to the second quarter 2024, Swiss stocks were particularly strong in May. There was a second interest rate cut by the SNB in June, as a result of domestic inflation rates moderating significantly, softening the franc. While the Swiss equity market finished the financial year on a positive note, there was some significant intra-month volatility in early August. A weaker-than-expected US labor market report for July caused investors to quickly price in additional Fed easing at the start of August. Falling US yields weighed on the US dollar and trigge-red an unwind of popular carry trades. The US easing cycle finally got underway in September, with the Federal Reserve taking a larger first step than other top central banks by reducing rates by 50 basis points. The SNB also made its third rate cut of the year. Equities have benefitted from the Fed's commitment to supporting economic growth, along with reassurances from Chair Jerome Powell that the risk of a US recession remains low at present.

The investment objective is to generate a performance that is guided by the benchmark UBS 100 Index<sup>®</sup>. The sub-fund performance deviations compared to benchmark typically stem from fees (total expense ratio), transaction costs and sub-fund inflows and outflows. The UBS 100 Index is adjusted by the SIX (Swiss Exchange) quarterly in March, June, September and December.
