Custodian bank

UBS Switzerland AG, Zurich

Auditors

Ernst & Young Ltd, Basel

Transfer of investment decisions

UBS Asset Management Switzerland AG, Zurich

Transfer of administration

The administration of the investment funds, particularly accounting, the calculation of net asset values, tax statements, the operation of IT systems and the preparation of statements of accounts, has been entrusted to Northern Trust Global Services AG, Leudelange, Luxembourg, Basel branch. The precise duties involved are set out in an agreement between the parties. All other fund management duties and the monitoring of other delegated duties are carried out in Switzerland.

Paying agents

PostFinance AG and its distribution channels.

Distributor

PostFinance AG and its sales channels have been exclusively entrusted with the distribution and safekeeping of the units of the sub-funds.

Sales restrictions

The regulations valid in the country in question apply to the issue and redemption of units of this umbrella fund or a sub-fund outside Switzerland.

Units of this umbrella fund or the sub-funds may not be offered, sold or delivered within the United States.

Units of this umbrella fund or the sub-funds may not be offered, sold or delivered to investors who are US persons. A US person is any person who:

- (i) is a United States person within the meaning of paragraph 7701(a)(30) of the US Internal Revenue Code of 1986 (as amended) and the Treasury Regulations enacted in the Code;
- (ii) is a US person within the meaning of regulation S in the US Securities Act of 1933 (17 CFR § 230.902(k));
- (iii) is not a non-US person within the meaning of rule 4.7 of the US Commodity Futures Trading Commission Regulations (17 CFR § 4.7(a)(1)(iv));

- (iv) resides in the United States of America within the meaning of rule 202(a)(30)-1 of the US Investment Advisers Act of 1940 (as amended); or
- (v) any trust, entity or other structure formed for the purpose of allowing US persons to invest in this umbrella fund and the sub-funds.

PostFinance does not sell funds to persons domiciled outside of Switzerland. In these countries, the sub-funds of this umbrella fund are not regarded as offered and are not available.

Notices to investors

Amendments to the fund contract

PF

- ESG Bond Fund

- ESG Yield Strategy Fund

- ESG Income Strategy Fund

- ESG Balanced Strategy Fund

- ESG Growth Strategy Fund

- ESG Capital Gain Strategy Fund

- ESG Swiss Equity Fund

- Global Climate Equity Fund

- Global Fund

- Swiss Small Caps Fund

- High Dividend Fund

- (i) 2.004% p.a. of the net asset value of the sub-fund per year regarding the **ESG Bond Fund** sub-fund or
- (ii) 3% p.a. for all other sub-funds, to be charged to the sub-funds' assets on a pro-rata basis every time the net asset value is calculated and to be paid out on a monthly basis (flat fee).

The amendments to the fund contract were approved by the Swiss Financial Market Supervisory Authority FINMA on 15 July 2024. The amendments entered into force on 17 July 2024.

Publication of 10 June 2024

1. Units and unit classes (§ 6)

§ 6 section 4 b) should be adjusted as follows:

"Units in unit class "l" are reserved for AXA Leben AG, which has been instructed to invest pension assets in fund unit. However, this only applies to contracts that have been negotiated by Post Finance AG as part of its cooperation with AXA Leben AG. There is no minimum subscription or minimum amount. The units are only issued as registered shares."

2. Investment policy (§ 8)

"Securities" in § 8 section 1 a) should be replaced by "investment instruments".

In the investment policy described in section 3 b) of the "ESG Swiss Equity Fund" sub-fund, "securities" should be replaced by "investment instruments".

3. Fees and incidental costs charged to the sub-fund's assets (§ 19)

§ 19 section 1 should be adjusted as follows:

"1. For the administration, asset management and distribution activities for the sub-funds, as well as all of the duties of the custodian bank, such as holding the fund assets, the arrangement of payment transactions and the other duties assigned to it as described in § 4, the fund management company charges the sub-funds a flat fee not exceeding:

Supplementary information

Derivative financial instruments

Risk assessment process Commitment approach II:
Art. 35 CISO-FINMA

Position	Amount in CHF	In % of the fund's net asset
Gross overall exposure to derivatives	14 611 490.01	8.02%
Net overall exposure to derivatives	12 014 656.03	6.59%
Commitment arising from securities Lending and Repurchase agreements	–	–

Repurchase agreements

No securities were used in repurchase agreements at balance sheet date.

Remuneration of the Fund Management

Flat fee
– Actual flat fee:
0.79% p.a.;
– Maximum flat fee as specified in the fund contract:
2.004% p.a.;
based on the average net fund assets.

Taking any retrocessions and rebates into account, the management fee of the target funds in which assets of the sub-funds are invested may not exceed 3.0%.

Commission sharing agreements and soft commissions

The fund management company has not concluded commission sharing agreements.
The fund management company has not concluded agreements in respect of soft commissions.

Total Expense Ratio (TER)

This ratio was calculated in accordance with the AMAS "Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of collective investment schemes" in the current version and expresses the sum of all costs and commissions charged on an ongoing basis to the net assets (operating expenses) taken retrospectively as a percentage of the net assets.

Composed TER for the last 12 months: 0.80%

Issue and redemption price

If the sum of a sub-fund's subscriptions and redemptions of units result in a net asset inflow or outflow on an order date, the valuation net asset value of the sub-fund will be increased or reduced (swinging single pricing). The maximum adjustment is 2% of the valuation net asset value. Incidental costs (bid-ask spread, standard brokerage charges, commissions, taxes and duties, etc.) incurred from the investment of the paid-in amount or from the sale of a portion of the investments corresponding to the terminated share are taken into account. The adjustment will lead to an increase in the valuation net asset value if the net movement results in an increase in the number of sub-fund units. The adjustment will lead to a decrease in the valuation net asset value if the net movement results in a reduction in the number of units. The net asset value determined on the basis of swinging single pricing is therefore a modified net asset value in accordance with the first sentence of this point.

Valuation principles and calculation of the net asset value

See appendix to supplementary information.

Supplementary information

Derivative financial instruments

Risk assessment process Commitment approach II:
Art. 34 CISO-FINMA

Position	Amount in CHF	In % of the fund's net asset
Gross overall exposure to derivatives	91 376 565.59	22.07%
Net overall exposure to derivatives	46 616 227.18	11.26%
Commitment arising from securities Lending and Repurchase agreements	–	–

Repurchase agreements

No securities were used in repurchase agreements at balance sheet date.

Remuneration of the Fund Management

Flat fee
 – Actual flat fee: 0.95%;
 – Maximum flat fee as specified in the fund contract:
 3.00% p.a.;
 based on the average net fund assets.

Taking any retrocessions and rebates into account, the management fee of the target funds in which assets of the sub-funds are invested may not exceed 3.0%.

Commission sharing agreements and soft commissions

The fund management company has not concluded commission sharing agreements.

The fund management company has not concluded agreements in respect of soft commissions.

Total Expense Ratio (TER)

This ratio was calculated in accordance with the AMAS "Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of collective investment schemes" in the current version and expresses the sum of all costs and commissions charged on an ongoing basis to the net assets (operating expenses) taken retrospectively as a percentage of the net assets.

Composed TER for the last 12 months: 1.04%

Issue and redemption price

If the sum of a sub-fund's subscriptions and redemptions of units result in a net asset inflow or outflow on an order date, the valuation net asset value of the sub-fund will be increased or reduced (swinging single pricing). The maximum adjustment is 2% of the valuation net asset value. Incidental costs (bid-ask spread, standard brokerage charges, commissions, taxes and duties, etc.) incurred from the investment of the paid-in amount or from the sale of a portion of the investments corresponding to the terminated share are taken into account. The adjustment will lead to an increase in the valuation net asset value if the net movement results in an increase in the number of sub-fund units. The adjustment will lead to a decrease in the valuation net asset value if the net movement results in a reduction in the number of units. The net asset value determined on the basis of swinging single pricing is therefore a modified net asset value in accordance with the first sentence of this point.

Valuation principles and calculation of the net asset value

See appendix to supplementary information.

Supplementary information

Derivative financial instruments

Risk assessment process Commitment approach II:
Art. 35 CISO-FINMA

Position	Amount in CHF	In % of the fund's net asset
Gross overall exposure to derivatives	234 132 676.85	23.29%
Net overall exposure to derivatives	118 764 438.59	11.82%
Commitment arising from securities Lending and Repurchase agreements	–	–

Repurchase agreements

No securities were used in repurchase agreements at balance sheet date.

Remuneration of the Fund Management

Flat fee

- Actual flat fee:
1.04% p.a.;
- Maximum flat fee as specified in the fund contract:
3.00% p.a.;
based on the average net fund assets.

Taking any retrocessions and rebates into account, the management fee of the target funds in which assets of the sub-funds are invested may not exceed 3.0%.

Commission sharing agreements and soft commissions

The fund management company has not concluded commission sharing agreements.

The fund management company has not concluded agreements in respect of soft commissions.

Total Expense Ratio (TER)

This ratio was calculated in accordance with the AMAS "Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of collective investment schemes" in the current version and expresses the sum of all costs and commissions charged on an ongoing basis to the net assets (operating expenses) taken retrospectively as a percentage of the net assets.

Composed TER for the last 12 months: 1.11%

Issue and redemption price

If the sum of a sub-fund's subscriptions and redemptions of units result in a net asset inflow or outflow on an order date, the valuation net asset value of the sub-fund will be increased or reduced (swinging single pricing). The maximum adjustment is 2% of the valuation net asset value. Incidental costs (bid-ask spread, standard brokerage charges, commissions, taxes and duties, etc.) incurred from the investment of the paid-in amount or from the sale of a portion of the investments corresponding to the terminated share are taken into account. The adjustment will lead to an increase in the valuation net asset value if the net movement results in an increase in the number of sub-fund units. The adjustment will lead to a decrease in the valuation net asset value if the net movement results in a reduction in the number of units. The net asset value determined on the basis of swinging single pricing is therefore a modified net asset value in accordance with the first sentence of this point.

Valuation principles and calculation of the net asset value

See appendix to supplementary information.

Supplementary information

Derivative financial instruments

Risk assessment process Commitment approach II:
Art. 35 CISO-FINMA

Position	Amount in CHF	In % of the fund's net asset
Gross overall exposure to derivatives	151 340 475.94	24.53%
Net overall exposure to derivatives	83 276 426.06	13.50%
Commitment arising from securities Lending and Repurchase agreements	–	–

Repurchase agreements

No securities were used in repurchase agreements at balance sheet date.

Remuneration of the Fund Management

Flat fee
– Actual flat fee:
1.11% p.a.;
– Maximum flat fee as specified in the fund contract:
3.00% p.a.
based on the average net fund assets.

Taking any retrocessions and rebates into account, the management fee of the target funds in which assets of the sub-funds are invested may not exceed 3.0%.

Commission sharing agreements and soft commissions

The fund management company has not concluded commission sharing agreements.
The fund management company has not concluded agreements in respect of soft commissions.

Total Expense Ratio (TER)

This ratio was calculated in accordance with the AMAS "Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of collective investment schemes" in the current version and expresses the sum of all costs and commissions charged on an ongoing basis to the net assets (operating expenses) taken retrospectively as a percentage of the net assets.

Composed TER for the last 12 months: 1.18%

Issue and redemption price

If the sum of a sub-fund's subscriptions and redemptions of units result in a net asset inflow or outflow on an order date, the valuation net asset value of the sub-fund will be increased or reduced (swinging single pricing). The maximum adjustment is 2% of the valuation net asset value. Incidental costs (bid-ask spread, standard brokerage charges, commissions, taxes and duties, etc.) incurred from the investment of the paid-in amount or from the sale of a portion of the investments corresponding to the terminated share are taken into account. The adjustment will lead to an increase in the valuation net asset value if the net movement results in an increase in the number of sub-fund units. The adjustment will lead to a decrease in the valuation net asset value if the net movement results in a reduction in the number of units. The net asset value determined on the basis of swinging single pricing is therefore a modified net asset value in accordance with the first sentence of this point.

Valuation principles and calculation of the net asset value

See appendix to supplementary information.

Supplementary information

Derivative financial instruments

Risk assessment process Commitment approach II:
Art. 35 CISO-FINMA

Position	Amount in CHF	In % of the fund's net asset
Gross overall exposure to derivatives	112 776 268.70	25.66%
Net overall exposure to derivatives	63 266 967.66	14.40%
Commitment arising from securities Lending and Repurchase agreements	–	–

Repurchase agreements

No securities were used in repurchase agreements at balance sheet date.

Remuneration of the Fund Management

Flat fee

– Actual flat fee:

1.16% p.a.;

– Maximum flat fee as specified in the fund contract:

3.00% p.a.;

based on the average net fund assets.

Taking any retrocessions and rebates into account, the management fee of the target funds in which assets of the sub-funds are invested may not exceed 3.0%.

Commission sharing agreements and soft commissions

The fund management company has not concluded commission sharing agreements.

The fund management company has not concluded agreements in respect of soft commissions.

Total Expense Ratio (TER)

This ratio was calculated in accordance with the AMAS "Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of collective investment schemes" in the current version and expresses the sum of all costs and commissions charged on an ongoing basis to the net assets (operating expenses) taken retrospectively as a percentage of the net assets.

Composed TER for the last 12 months:

1.23%

Issue and redemption price

If the sum of a sub-fund's subscriptions and redemptions of units result in a net asset inflow or outflow on an order date, the valuation net asset value of the sub-fund will be increased or reduced (swinging single pricing). The maximum adjustment is 2% of the valuation net asset value. Incidental costs (bid-ask spread, standard brokerage charges, commissions, taxes and duties, etc.) incurred from the investment of the paid-in amount or from the sale of a portion of the investments corresponding to the terminated share are taken into account. The adjustment will lead to an increase in the valuation net asset value if the net movement results in an increase in the number of sub-fund units. The adjustment will lead to a decrease in the valuation net asset value if the net movement results in a reduction in the number of units. The net asset value determined on the basis of swinging single pricing is therefore a modified net asset value in accordance with the first sentence of this point.

Valuation principles and calculation of the net asset value

See appendix to supplementary information.

Supplementary information

Derivative financial instruments

Risk assessment process Commitment approach II:
Art. 35 CISO-FINMA

Position	Amount in CHF	In % of the fund's net asset
Gross overall exposure to derivatives	6 121 143.77	19.45%
Net overall exposure to derivatives	3 252 712.58	10.34%
Commitment arising from securities Lending and Repurchase agreements	–	–

Repurchase agreements

No securities were used in repurchase agreements at balance sheet date.

Remuneration of the Fund Management

Flat fee

- Actual flat fee:
1.19% p.a.;
- Maximum flat fee as specified in the fund contract:
3.00% p.a.;
based on the average net fund assets.

Taking any retrocessions and rebates into account, the management fee of the target funds in which assets of the sub-funds are invested may not exceed 3.0%.

Commission sharing agreements and soft commissions

The fund management company has not concluded commission sharing agreements.

The fund management company has not concluded agreements in respect of soft commissions.

Total Expense Ratio (TER)

This ratio was calculated in accordance with the AMAS "Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of collective investment schemes" in the current version and expresses the sum of all costs and commissions charged on an ongoing basis to the net assets (operating expenses) taken retrospectively as a percentage of the net assets.

Composed TER for the last 12 months: 1.31%

Issue and redemption price

If the sum of a sub-fund's subscriptions and redemptions of units result in a net asset inflow or outflow on an order date, the valuation net asset value of the sub-fund will be increased or reduced (swinging single pricing). The maximum adjustment is 2% of the valuation net asset value. Incidental costs (bid-ask spread, standard brokerage charges, commissions, taxes and duties, etc.) incurred from the investment of the paid-in amount or from the sale of a portion of the investments corresponding to the terminated share are taken into account. The adjustment will lead to an increase in the valuation net asset value if the net movement results in an increase in the number of sub-fund units. The adjustment will lead to a decrease in the valuation net asset value if the net movement results in a reduction in the number of units. The net asset value determined on the basis of swinging single pricing is therefore a modified net asset value in accordance with the first sentence of this point.

Valuation principles and calculation of the net asset value

See appendix to supplementary information.

3.00% p.a.;
based on the average net fund assets.

Commission sharing agreements and soft commissions

The fund management company has not concluded commission sharing agreements.

The fund management company has not concluded agreements in respect of soft commissions.

Total Expense Ratio (TER)

This ratio was calculated in accordance with the AMAS "Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of collective investment schemes" in the current version and expresses the sum of all costs and commissions charged on an ongoing basis to the net assets (operating expenses) taken retrospectively as a percentage of the net assets.

TER for the last 12 months:

0.62%

Issue and redemption price

If the sum of a sub-fund's subscriptions and redemptions of units result in a net asset inflow or outflow on an order date, the valuation net asset value of the sub-fund will be increased or reduced (swinging single pricing). The maximum adjustment is 2% of the valuation net asset value. Incidental costs (bid-ask spread, standard brokerage charges, commissions, taxes and duties, etc.) incurred from the investment of the paid-in amount or from the sale of a portion of the investments corresponding to the terminated share are taken into account. The adjustment will lead to an increase in the valuation net asset value if the net movement results in an increase in the number of sub-fund units. The adjustment will lead to a decrease in the valuation net asset value if the net movement results in a reduction in the number of units. The net asset value determined on the basis of swinging single pricing is therefore a modified net asset value in accordance with the first sentence of this point.

Valuation principles and calculation of the net asset value

See appendix to supplementary information.

Supplementary information

Derivative financial instruments

Risk assessment process Commitment approach II:
Art. 35 CISO-FINMA

There were no contracts in derivative financial instruments open at balance sheet date.

Repurchase agreements

No securities were used in repurchase agreements at balance sheet date.

Remuneration of the Fund Management

Flat fee

– Actual flat fee:

Class A: 0.79% p.a.;

Class I: 0.19% p.a.;

– Maximum flat fee as specified in the fund contract:

Class A: 3.00% p.a.;

Class I: 3.00% p.a.;

based on the average net fund assets.

Taking any retrocessions and rebates into account, the management fee of the target funds in which assets of the sub-funds are invested may not exceed 3.0%.

Commission sharing agreements and soft commissions

The fund management company has not concluded commission sharing agreements.

The fund management company has not concluded agreements in respect of soft commissions.

Total Expense Ratio (TER)

This ratio was calculated in accordance with the AMAS "Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of collective investment schemes" in the current version and expresses the sum of all costs and commissions charged on an ongoing basis to the net assets (operating expenses) taken retrospectively as a percentage of the net assets.

Composed TER for the last 12 months:

Class A: 0.81%

Class I: 0.20%

Issue and redemption price

If the sum of a sub-fund's subscriptions and redemptions of units result in a net asset inflow or outflow on an order date, the valuation net asset value of the sub-fund will be increased or reduced (swinging single pricing). The maximum adjustment is 2% of the valuation net asset value. Incidental costs (bid-ask spread, standard brokerage charges, commissions, taxes and duties, etc.) incurred from the investment of the paid-in amount or from the sale of a portion of the investments corresponding to the terminated share are taken into account. The adjustment will lead to an increase in the valuation net asset value if the net movement results in an increase in the number of sub-fund units. The adjustment will lead to a decrease in the valuation net asset value if the net movement results in a reduction in the number of units. The net asset value determined on the basis of swinging single pricing is therefore a modified net asset value in accordance with the first sentence of this point.

Valuation principles and calculation of the net asset value

See appendix to supplementary information.

Supplementary information

Derivative financial instruments

Risk assessment process Commitment approach II:
Art. 35 CISO-FINMA

There were no contracts in derivative financial instruments open at balance sheet date.

Securities lending

The fund management company does not conduct any securities lending transactions.

Repurchase agreements

The fund management company does not conduct any repurchase agreements.

Remuneration of the Fund Management

Flat fee

- Actual flat fee:
1.50% p.a.;
- Maximum flat fee as specified in the fund contract:
3.00% p.a.;
based on the average net fund assets.

Taking any retrocessions and rebates into account, the management fee of the target funds in which assets of the sub-funds are invested may not exceed 3.0%.

Commission sharing agreements and soft commissions

The fund management company has not concluded commission sharing agreements.

The fund management company has not concluded agreements in respect of soft commissions.

Total Expense Ratio (TER)

This ratio was calculated in accordance with the AMAS "Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of collective investment schemes" in the current version and expresses the sum of all costs and commissions charged on an ongoing basis to the net assets (operating expenses) taken retrospectively as a percentage of the net assets.

Composed TER for the last 12 months:

1.51%

Issue and redemption price

If the sum of a sub-fund's subscriptions and redemptions of units result in a net asset inflow or outflow on an order date, the valuation net asset value of the sub-fund will be increased or reduced (swinging single pricing). The maximum adjustment is 2% of the valuation net asset value. Incidental costs (bid-ask spread, standard brokerage charges, commissions, taxes and duties, etc.) incurred from the investment of the paid-in amount or from the sale of a portion of the investments corresponding to the terminated share are taken into account. The adjustment will lead to an increase in the valuation net asset value if the net movement results in an increase in the number of sub-fund units. The adjustment will lead to a decrease in the valuation net asset value if the net movement results in a reduction in the number of units. The net asset value determined on the basis of swinging single pricing is therefore a modified net asset value in accordance with the first sentence of this point.

Valuation principles and calculation of the net asset value

Class I: 0.36%

Issue and redemption price

If the sum of a sub-fund's subscriptions and redemptions of units result in a net asset inflow or outflow on an order date, the valuation net asset value of the sub-fund will be increased or reduced (swinging single pricing). The maximum adjustment is 2% of the valuation net asset value. Incidental costs (bid-ask spread, standard brokerage charges, commissions, taxes and duties, etc.) incurred from the investment of the paid-in amount or from the sale of a portion of the investments corresponding to the terminated share are taken into account. The adjustment will lead to an increase in the valuation net asset value if the net movement results in an increase in the number of sub-fund units. The adjustment will lead to a decrease in the valuation net asset value if the net movement results in a reduction in the number of units. The net asset value determined on the basis of swinging single pricing is therefore a modified net asset value in accordance with the first sentence of this point.

Valuation principles and calculation of the net asset value

See appendix to supplementary information.

Appendix to Supplementary information

Valuation of the fund's assets and calculation of the net asset value

Valuation of the fund's assets

- The net asset value of each sub-fund and the proportions attributable to the individual classes (percentages) is calculated in Swiss francs (CHF) at the market value as at the end of the financial year and for each day on which units are issued or redeemed. The assets of the relevant sub-fund will not be calculated on days on which the exchanges/markets in the sub-fund's main investment countries are closed (e.g. bank and stock exchange holidays).

However, the fund management company may also calculate the net asset value of a unit ("non-tradable net asset value") on days on which no units are issued or redeemed, e.g. if the last calendar day of a month falls on a day specified in point 5.2 of the prospectus. Such non-tradable net asset values may be published but may only be used for performance calculations and statistics (in particular for the purpose of comparing with the benchmark index) or for commission calculations and in no case as a basis for subscription and redemption orders.

- Securities traded on an exchange or other regulated market open to the public are to be valued at the current prices paid on the main market. Other investments or investments for which no current price is available are to be valued at the price that would probably have been obtained in a diligent sale at the time of the estimate. In such cases, the fund management company will use appropriate and recognised valuation models and principles to determine the market value.
- Open-end collective investments are valued using their redemption price or net asset value. If they are listed on a stock exchange or regularly traded on another regulated market open to the public, the fund management company may value them pursuant to prov. 2.

- The value of money market instruments that are not traded on an exchange or other regulated market open to the public is determined as follows:

The valuation price of such investments is based on the yield curve concerned. The valuation based on the yield curve reflects two components: the interest rate and the spread. The following principles are applied in this case: The subsequent interest rates for the residual term are interpolated for each money market instrument. The interest

rate calculated in this manner is then converted into a market price by adding a spread that reflects the underlying borrower's credit rating. This spread is adjusted in the event of a significant change in the borrower's credit rating.

- Bank deposits are valued at the amount of the claim plus accrued interest. If there are significant changes in market conditions or credit rating, the valuation principles for time deposits will be adjusted in line with the new circumstances.
- Derivative financial instruments listed on a stock exchange or traded on another regulated market open to the public shall be valued at the current prices paid on the main market. Derivative financial instruments that are not listed on a stock exchange or traded on another regulated market open to the public (OTC-Derivatives) shall be valued at the price that would probably be obtained in a diligent sale at the time of the valuation. In such cases the fund management company shall use appropriate and recognised valuation models and principles to determine the market value.
- PF - Global Fund PF - High Dividend Fund
The percentages of the market value of the fund's net assets (fund assets less liabilities) attributable to the individual unit classes is determined for the first time at the initial issue of more than one class of units (if this occurs simultaneously) or the initial issue of a further unit class. The calculation is made on the basis of the assets accruing to the fund for each unit class. The percentage is recalculated when one of the following events occurs:
 - when units are issued and redeemed;
 - on the cut-off date for distributions, provided that (i) such distributions are made only for individual unit classes (distribution classes), or provided that (ii) the distributions of the various unit classes differ as percentages of their individual net asset values, or provided that (iii) different commission or costs, as percentages, are charged on the distributions of the various unit classes;
 - when the net asset value is calculated, as part of the allocation of liabilities (including due or accrued costs and commissions) to the various unit classes, provided that the liabilities of the various unit classes differ as percentages of their individual net asset values, especially if (i) different commission rates are applied to the various unit classes or if (ii) class-specific costs are charged;
 - when the net asset value is calculated, as part of the allocation of income or capital gains to the various unit

classes, provided the income or capital gains originate from transactions made solely in the interests of one unit class or in the interests of several unit classes, but not in proportion to their share of a sub-fund's net assets.

Basis of net asset value calculation

The net asset value of a unit of a given class is determined by the proportion of the market value of the sub-fund attributable to that unit class, less any of the sub-fund's liabilities that are attributed to that unit class, divided by the number of units of that class in circulation. This is rounded to CHF 0.01.

OTC-Derivatives and Securities Lending

If the investment fund enters into OTC transactions, it may be exposed to risks related to the creditworthiness of the OTC counterparties: when the investment fund enters into futures contracts, options and swap transactions or uses other derivative techniques it is subject to the risk that an OTC counterparty may not meet (or cannot meet) its obligations under a specific or multiple contracts. Counterparty risk can be reduced by depositing a security. If the investment fund is owed a security pursuant to an applicable agreement, such security shall be held in custody by the Custodian bank/ Custodian in favour of the investment fund. Bankruptcy and insolvency events or other credit events with the OTC counterparty, the Custodian Bank or within their subcustodian/respondent bank network may result in the rights or recognition of the investment fund in connection with the security to be delayed, restricted or even eliminated, which would force the investment fund to fulfill its obligations in the framework of the OTC transaction, in spite of any security that had previously been made available to cover any such obligation.

The Company may lend portions of its securities portfolio to third parties. In general, lendings may only be effected via recognized clearing houses such as Clearstream International or Euroclear, or through the intermediary of prime financial institutions that specialise in such activities and in the modus specified by them. Collateral is received in relation to securities lent. Collateral is composed of high quality securities in an amount typically at least equal to the market value of the securities loaned.

Short report by the statutory auditors

To the Board of Directors of the fund management company on the annual financial statements of

PF Fonds, Basel

Report on the audit of the annual financial statements

Auditor's opinion

We have audited the annual financial statements of the investment fund

PF Fonds

with the sub-funds

- ▶ ESG Bond Fund
- ▶ ESG Yield Strategy Fund
- ▶ ESG Income Strategy Fund
- ▶ ESG Balanced Strategy Fund
- ▶ ESG Growth Strategy Fund
- ▶ ESG Capital Gain Strategy Fund
- ▶ ESG Swiss Equity Fund
- ▶ Global Climate Equity Fund¹
- ▶ Global Fund
- ▶ Swiss Small Caps Fund
- ▶ High Dividend Fund

consisting of the statements of assets as at 31 August 2024, the income statements for the year ending on that date, information on the appropriation of net profit and the disclosure of costs, as well as further details in accordance with Art. 89, para. 1 b–h of the Swiss Federal Act on Collective Investment Schemes (CISA).

In our opinion, the annual financial statements (pages 3 until 123) have been prepared in accordance with the Swiss Federal Act on Collective Investment Schemes, its related ordinances and the fund contract and the prospectus.

Basis for the opinion

We conducted our audit in accordance with Swiss law and Swiss auditing standards (SA-CH). Our responsibilities under these provisions and standards are described in more detail in the section "Responsibilities of the statutory auditors for audit of the annual financial statements" of our report. We are independent of the investment fund and the fund management company in accordance with the Swiss legal provisions and the requirements of the profession, and have met our other professional code of conduct obligations in accordance with these requirements.

We believe that our audit evidence is sufficient and appropriate to provide a basis for our opinion.

¹ Audited income statement for the period from 15 December 2023 to 31 August 2024 for the sub-fund – Global Climate Equity Fund.

**Building a better
working world**

Other information

The fund management company's Board of Directors is responsible for other information. Other information comprises the information that is contained in an annual report but not in the annual financial statements and our associated report.

Our opinion of the annual financial statements does not cover the other information and we do not express any form of audit conclusion on this.

In connection with our audit, we are responsible for reading the other information and acknowledging whether the other information is materially inconsistent with the financial statements or the knowledge we obtained in the audit of the financial statements, or otherwise appears to be materially misstated.

If we conclude, on the basis of the work we have performed, that there has been a material misstatement of this other information, we are required to report on this fact. We have nothing to report in this context.

Responsibilities of the Board of Directors of the fund management company for the annual financial statements

The Board of Directors of the fund management company is responsible for preparing the annual financial statements in accordance with the Swiss Federal Act on Collective Investment Schemes, the related ordinances and the fund contract and the prospectus, and for the internal controls that the Board of Directors deems necessary to enable the preparation of financial statements that are free from material misstatements whether due to fraud or error.

Responsibilities of the statutory auditors for audit of the annual financial statements

Our objectives are to obtain reasonable assurance as to whether the annual financial statements as a whole are free from material misstatement whether due to fraud or error, and to issue a report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Swiss law and SA-CH will always detect a material misstatement, if any. Misstatements may result from fraud or error and are considered material if they could reasonably be expected individually or collectively to influence the economic decisions of users taken on the basis of these annual financial statements.

As part of an audit in accordance with Swiss law and SA-CH, we exercise professional judgment and maintain professional skepticism throughout the audit. In addition:

- ▶ We identify and assess the risks of material misstatements in the annual financial statements whether due to fraud or error, plan and perform audit procedures responsive to these risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal controls.

**Building a better
working world**

- ▶ We obtain an understanding of the internal control system relevant to the audit in order to plan audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control system.
- ▶ We evaluate the appropriateness of accounting methods used and the reasonableness of accounting estimates and related disclosures.

We communicate with the Board of Directors of the fund management company about, among other things, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in the internal control system that we identify during our audit.

Other Information

Report of the Portfolio Managers:

PF - ESG Bond Fund

The financial year from 1 September 2023 to 31 August 2024 started with sparked worries that an escalating conflict in the Middle East could disrupt energy supplies and lead to another round of higher inflation. But the market rebounded as part of the reason for this resilience was a growing confidence in the potential for artificial intelligence (AI) to boost profits. In the first quarter of 2024 global stocks had the best first-quarterly gain since 2019. But markets continued to scale back expectations for the timing and pace of Federal Reserve rate cuts. The Swiss National Bank surprised markets in March by becoming the first developed-nation central bank to cut rates in this cycle. Meanwhile the Bank of Japan ended eight years of negative rates. July was a volatile month for markets, with confidence in the outlook for AI faltering before bouncing back at the end of the month. Progress towards easier monetary policy around the world supported fixed income markets. Fears over the prospect of a US recession, which took hold in early August, eased as economic data pointed to resilient consumer spending and a gradually cooling labor market. Fixed Income benefited from further indications from the Fed that rate cuts are imminent.

During this financial period, the fund posted a positive absolute performance overall, after deduction of fees. CHF denominated bonds as well as global government and corporate bonds hedged in CHF and Emerging market bonds contributed positively to the overall performance during the financial year.

PF - ESG Yield Strategy Fund

The financial year from 1 September 2023 to 31 August 2024 started with sparked worries that an escalating conflict in the Middle East could disrupt energy supplies and lead to another round of higher inflation. But the market rebounded as part of the reason for this resilience was a growing confidence in the potential for artificial intelligence (AI) to boost profits. In the first quarter of 2024 global stocks had the best first-quarterly gain since 2019. But markets continued to scale back expectations for the timing and pace of Federal Reserve rate cuts. The Swiss National Bank surprised markets in March by becoming the first developed-nation central bank to cut rates in this cycle. Meanwhile the Bank of Japan ended eight years of negative rates. July was a volatile month for markets, with confidence in the outlook for AI faltering before bouncing back at the end of the month. Progress towards easier monetary policy around the world supported fixed income markets. Fears over the prospect of a US recession, which took hold in early August, eased as economic data pointed to resilient consumer spending and a gradually cooling labor market. Fixed Income benefited from further indications from the Fed that rate cuts are imminent.

During this financial period, the fund posted a positive absolute performance, after deduction of fees. Global developed market equities were the main contributor on the equity side followed by emerging market equities. In the fixed income space CHF-denominated bonds as well as global government and corporate bonds hedged in CHF contributed positively. Swiss Real Estate exposure contributed as well.

But the market rebounded as part of the reason for this resilience was a growing confidence in the potential for artificial intelligence (AI) to boost profits. In the first quarter of 2024 global stocks had the best first-quarterly gain since 2019. But markets continued to scale back expectations for the timing and pace of Federal Reserve rate cuts. The Swiss National Bank surprised markets in March by becoming the first developed-nation central bank to cut rates in this cycle. Meanwhile the Bank of Japan ended eight years of negative rates. July was a volatile month for markets, with confidence in the outlook for AI faltering before bouncing back at the end of the month. Progress towards easier monetary policy around the world supported fixed income markets. Fears over the prospect of a US recession, which took hold in early August, eased as economic data pointed to resilient consumer spending and a gradually cooling labor market. Fixed Income benefited from further indications from the Fed that rate cuts are imminent.

During this financial period, the fund posted a positive absolute performance, after deduction of fees. Global developed market equities were the main contributor on the equity side followed by emerging market equities. In the fixed income space CHF-denominated bonds as well as global government and corporate bonds hedged in CHF contributed positively. Swiss Real Estate exposure contributed as well.

PF - ESG Growth Strategy Fund

The financial year from 1 September 2023 to 31 August 2024 started with sparked worries that an escalating conflict in the Middle East could disrupt energy supplies and lead to another round of higher inflation. But the market rebounded as part of the reason for this resilience was a growing confidence in the potential for artificial intelligence (AI) to boost profits. In the first quarter of 2024 global stocks had the best first-quarterly gain since 2019. But markets continued to scale back expectations for the timing and pace of Federal Reserve rate cuts. PF - ESG Swiss Equity Fund

The SPI® ESG Index was up by 12.18% during the reporting period, and the fund posted performance (net of fees) of 11.50%.

In the financial year from 1 September 2023 to 31 August 2024, four quarterly index reviews took place with a two-way turnover totaling 3.09%. During the reviews, nine stocks were added to and two stocks were deleted from the index, along with various changes in the shares in issue of the index constituents. Outside of the reviews, significant events include the extraordinary addition of Sandoz Group AG to the index following the spin-off from Novartis, which was then deleted. Additionally, the weight of ams-OSRAM AG in the index increased following a rights issue.

PF - Global Climate Equity Fund

The SPI® ESG Index was up by 12.18% during the reporting period, and the fund posted performance (net of fees) of 11.50%.

PF - Global Fund

Global equities delivered a positive performance over the reporting period. The Swiss Performance Index® rose by 11.91% in CHF terms. The remaining European markets were up by 17.28% (15.64% in CHF). The markets of Asian industrial countries were positive by 17.03% (13.71% in CHF), while the North American markets rose by 26.25% (21.29% in CHF). Emerging markets were positive by 16.25% (10.54% in CHF).

Overall, the fund posted performance (net of fees, in CHF) of 15.67% compared with the benchmark, which posted performance of 14.87%.

PF - Swiss Small Caps Fund

In the financial year, from 1 September 2023 to 31 August 2024, the Swiss stock market posted a positive performance. After a slight pull back last fall, the market has been steadily driven up not only by the technology sector, which is weakly represented in Switzerland, but also increasingly by Swiss small caps. With inflation settling below two percent, the Swiss National Bank kicked off the global rate-cutting cycle at its March 2024 meeting. While the macroeconomic environment looks solid, geopolitical tensions have significantly contributed to market volatility during the start of the second half of 2024. Going forward, several key events seem to determine the investment landscape for global and Swiss investors equally, including elections in the US and Europe, anticipated Federal Reserve (FED) rate cuts and advancing developments in Artificial Intelligence (AI).

The fund followed the positive trend of the broader market, closing the reporting period with a positive absolute return.

PF - High Dividend Fund

The Swiss and global all-countries equity markets generated a strong performance over the financial year from 1 September 2023 to 31 August 2024. Global equity markets rallied from October 2023, largely due to an expected boost in corporate profits thanks to artificial intelligence (AI). Normalizing inflation and moderately slowing earnings growth have pointed to a soft landing. This leaves room for central banks to start cutting interest rates this year and has supported equity price appreciation. Volatility has stayed relatively low across asset classes for most of the reporting period. Yet market swings in August 2024 saw both the largest one-day points fall in Japanese market history and the VIX volatility index spike to its highest level since the pandemic. It is expected that politics, economics, interest rates and geopolitical tensions could lead to continued volatility in the short term.

The fund posted a positive absolute performance over the financial year from 1 September 2023 to 31 August 2024.
