LETTER FROM THE BOARD OF DIRECTORS

2021 Global Financial Markets Review

Global stock markets advanced significantly over the year. The rollout of coronavirus vaccines paved the way for extraordinary gains in the face of the pandemic. Despite persistent virus surges and the emergence of new variants, economic growth was strong, supported in part by government stimulus. Investors were encouraged that corporate earnings growth showed strength and resilience, which helped overcome concerns about the dampening effects of the ongoing pandemic, rising inflation, and interest rates.

U.S. stocks powered up in 2021, ending the year with substantial gains. Many indexes repeatedly reached record highs throughout the year. Strength was broad-based with all sectors recording positive returns, as measured in the large-cap universe by the S&P 500 Index. Equities advanced as the U.S. economy reopened and recovered—facilitated by the rollout of coronavirus vaccines and some federal fiscal relief—and as corporations reported robust earnings growth.

Developed European shares also posted solid gains, especially in local currency terms. Every market advanced, overcoming a variety of challenges, including pandemic headwinds, elevated inflation, labor shortages, and inconsistent central bank policies. Austrian shares led the way, but equities in the Netherlands, Norway, and Sweden rose substantially. Although in positive territory for the year, Portugal, Spain, and Belgium gained the least.

Developed Asian markets advanced slightly overall, with mixed market performance. Japanese shares trended up notably after the general election of a new prime minister at the end of September but ended the year with only modest gains. Australian equity gains were solid, while New Zealand shares slumped significantly. Hong Kong equities also declined, due in part to the Chinese government's regulatory crackdown in certain sectors, as well as concerns about some highly indebted firms in the Chinese property market.

Stocks in emerging markets fell, considerably lagging their developed market counterparts. Currency weakness versus the U.S. dollar muted returns to USD-based investors. Emerging Asian markets were widely mixed. India, Taiwan, and Vietnam were up substantially. On the other hand, Chinese shares fell sharply amid the government's regulatory crackdown in certain sectors, as well as concerns about the property market. Chinese domestic market A shares rose, however. Stocks in emerging Europe appreciated, led by the Czech Republic. Russian shares also gained, boosted substantially by higher oil prices. Turkish equities suffered, as the lira weakened. The Latin America region overall declined, but several countries, including markets in Mexico and Argentina, rose more than 20%. Conversely, Peru and Brazil posted dramatic losses.

Sector performance in the MSCI All Country World Index was entirely positive. Energy, information technology, financials, and real estate posted the highest gains for the period. Consumer discretionary, utilities, communication services, and consumer staples also advanced, but not as strongly.

The U.S. investment-grade fixed income market produced negative returns for the 12-month period ending December 31, 2021, as rising Treasury yields weighed on bond returns. The yield curve flattened with yields in the two- to five-year portion of the Treasury curve increasing the most as the Federal Reserve began moving in a less accommodative direction. Longer-maturity yields, meanwhile, rose sharply early in the year as inflation expectations increased. The major credit sectors all produced negative absolute returns as a result of rising yields; however, investment-grade corporate bonds performed well on a duration-adjusted basis amid strong demand and improving corporate fundamentals. Conversely, mortgage-backed securities faced headwinds as the Fed began reducing its purchases in the sector.

International bond markets produced negative returns in U.S. dollar terms over the year. Rising growth and inflation expectations were prevalent throughout most of the period, leading developed market yield curves steeper. Shifts in policy by several major central banks in the latter half of the year toward tightening cycles—including the announcement of tapering across a number of asset purchase programs and rate hikes in both developed and emerging markets—placed further upward pressure on yields heading into 2022. The strengthening U.S. dollar through the period, most notable after the Federal Reserve's hawkish pivot in November, also weighed on returns in local currency terms.

Sovereign bonds in emerging markets produced negative returns in dollar terms, led by notable declines in locally denominated sovereigns due to U.S. dollar strength. Emerging markets corporates denominated in dollars, however, produced modest gains. During the first half of 2021 accommodative fiscal and monetary policies supported ongoing economic recoveries in many countries. As inflation pressures built, several emerging markets (EM) central banks began hiking rates, while the U.S. began tapering its asset purchases and indicated rate hikes were likely near term, leading to increased yields and yield curve flattening. Waves of coronavirus variants blunted investor risk appetite as renewed restrictions raised concerns about demand, and credit spreads generally widened. Idiosyncratic matters added to pressures in select countries. Amid resurging demand and supply chain bottlenecks, commodities prices increased. Emerging markets corporates in the metals and mining sector led gains in that market, while the real estate sector was sharply lower, largely due to distress in Chinese real estate. Commodities exporters Zambia, Ecuador, and Angola produced gains in the dollar-denominated sovereign market, while El Salvador led declines. Controversial political decisions and the implementation of bitcoin as legal tender weighed on sentiment toward the country. Turkey was the laggard among locally denominated sovereigns. Unconventional monetary policy in Turkey, led to notable declines in assets. Indonesia and Dominican Republic advanced.

Dynamic Credit Fund

INVESTMENT OBJECTIVE

The fund's objective is to seek total return through a combination of income and capital appreciation.

The fund is actively managed and invests mainly in a diversified portfolio of bonds of all types from issuers around the world, including emerging markets.

The fund invests primarily in debt securities issued by governments, government agencies, companies and banks and/or derivatives of these debt securities. These debt securities can be of any credit rating (including investment grade, non-investment grade or high-yield and/or unrated securities). Under most market conditions, the average credit quality of the portfolio will be of below investment grade (i.e. below BBB credit rating as rated by Standard & Poor's or equivalent). On occasion, for defensive purposes, the average credit quality of the portfolio may fall within the investment grade range of BBB to AAA. In accordance with its own internal rating system, the investment manager will ensure that the unrated debt securities in which the fund invests are of the same average quality as the rated securities of the same type. Portfolio debt securities can include fixed and floating rate bonds, inflation-linked bonds, warrants and other transferable debt securities of any type. Portfolio debt securities may also include asset-backed securities (ABS) and mortgage-backed securities (MBS) up to a limit of 20% of net assets, convertible bonds (including contingent convertible bonds) up to a limit of 10% of net assets as well as distressed or defaulted bonds up to a limit of 10% of net assets.

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other types of eligible securities as described in the 'General Investment Powers and Restrictions' section of the current prospectus. However, as at the date of the current prospectus, the fund does not expect to invest in any other eligible securities, on an ancillary basis, to more than a limited extent.

The fund may use derivatives for hedging, efficient portfolio management and investment purposes. The fund may also use derivatives to create synthetic short positions in currencies, debt securities, credit indices and equities. The fund may use total return swaps (TRS) and any use is expected to be on a temporary basis and dependent on market conditions or when prevailing market conditions cause TRS to offer the most efficient or only way to express a view. Use of TRS is expected when they offer the most

efficient or only way to express a view and the impact is expected to be negligible. Investors should refer to the "Total Return Swaps" section of the current prospectus for more details of the expected and maximum use of total return swaps by the fund. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the current prospectus.

Dynamic Emerging Markets Bond Fund

INVESTMENT OBJECTIVE

The fund's objective is to maximise the value of its shares through both growth in the value of, and income from, its investments.

The fund is actively managed and invests mainly in a portfolio of bonds of all types from emerging markets issuers.

The fund invests primarily in debt securities issued by governments, government agencies, supra-national organisations and companies that are either incorporated in one of the economically emerging countries of Latin America, Asia, Europe, Africa and the Middle East or conduct most of their business in such countries. These debt securities can be of any credit rating (including investment grade, non-investment grade or high-yield and/or unrated securities). Typically, the average credit quality of the portfolio will be within the range BBB to BB (as rated by Standard & Poor's or equivalent). The average credit quality of the portfolio may at times be higher or lower depending on market conditions. In accordance with its own internal rating system, the investment manager will ensure that the unrated debt securities in which the fund invests are of the same average quality as the rated securities of the same type. Portfolio debt securities can include fixed and floating rate bonds, warrants and other transferable debt securities of any type, including high yield securities and up to 10% in distressed and/or defaulted bonds. The fund may invest up to 10% of its net assets in asset-backed securities (ABS) and mortgage-backed securities (MBS), up to 10% in convertible bonds and up to 20% in contingent convertible bonds.

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the current prospectus. However, as at the date of the current prospectus, the fund does not expect to invest in any other eligible securities, on an ancillary basis, to more than a limited extent.

For temporary defensive purposes, and during exceptional market conditions, investments in money market securities may exceed 30% of net assets.

The fund may use derivatives for hedging, efficient portfolio management and investment purposes. The fund may also use derivatives to create synthetic short positions in currencies, debt securities, credit indices and equities. The fund may use total return swaps (TRS) and any use is expected to be on a temporary basis and dependent on market conditions or when prevailing market conditions cause TRS to be the most efficient instrument to express a view in a fixed income market. Use of TRS is expected for efficient portfolio management and the impact is expected to be negligible. Investors should refer to the "Total Return Swaps" section of the current prospectus for more details on the expected and maximum use of total return swaps by the fund. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the current prospectus.

Dynamic Global Bond Fund

INVESTMENT OBJECTIVE

The fund's objective is to generate income while offering some protection against rising interest rates and a low correlation with equity markets.

The fund is actively managed and invests mainly in a portfolio of bonds of all types from issuers around the world, including emerging markets.

The fund invests primarily in debt securities issued by governments, government agencies, companies and banks. Portfolio debt securities can include fixed and floating rate bonds, warrants and other transferable debt securities of any type, including high yield securities (including up to 10% in distressed and/or defaulted bonds). The fund may invest more than 20% of net assets in asset-backed securities (ABS) and mortgage-backed securities (MBS) and invest up to 25% in convertible bonds (including up to 20% in contingent convertible bonds).

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the current prospectus. However, as at the date of the current prospectus, the fund does not expect to invest in any other eligible securities, on an ancillary basis, to more than a limited extent.

For temporary defensive purposes, and during exceptional market conditions, investments in money market securities may exceed 30% of net assets.

The fund may use derivatives for hedging, efficient portfolio management and investment purposes. The fund may also use derivatives to create synthetic short positions in currencies, debt securities, credit indices and equities. The fund may use total return swaps (TRS) and any use is expected to be on a temporary basis and dependent on market conditions or when prevailing market conditions cause TRS to be the most efficient instrument to express a view in a fixed income market. Use of TRS is expected for efficient portfolio management and the impact is expected to be negligible. Investors should refer to the "Total Return Swaps" section of the current prospectus for more details of the expected and maximum use of total return swaps by the fund. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the current prospectus.

§ Security is currently in default.

The accompanying notes are an integral part of these financial statements.

Dynamic Global Investment Grade Bond Fund

INVESTMENT OBJECTIVE

The fund's objective is to generate income while offering some protection against rising interest rates and a low correlation with equity markets.

The fund is actively managed and invests mainly in a portfolio of bonds of all types from issuers around the world, including emerging markets.

The fund invests primarily in debt securities issued by governments, government agencies, companies and banks. Portfolio debt securities can include fixed and floating rate bonds, warrants and other transferable debt securities of any type, with a rating of investment grade by major rating agencies or if unrated of equivalent quality. In accordance with its own internal rating system, the investment manager will ensure that the unrated corporate debt securities in which the fund invests are of the same quality as the rated securities of the same type. The fund may invest more than 20% of net assets in asset-backed securities (ABS) and mortgage-backed securities (MBS) and invest up to 25% in convertible bonds (including up to 20% in contingent convertible bonds).

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the current prospectus. However, as at the date of the current prospectus, the fund does not expect to invest in any other eligible securities, on an ancillary basis, to more than a limited extent.

For temporary defensive purposes, and during exceptional market conditions, investments in money market securities may exceed 30% of net assets.

The fund may use derivatives for hedging, efficient portfolio management and investment purposes. The fund may also use derivatives to create synthetic short positions in currencies, debt securities, credit indices and equities. The fund may use total return swaps (TRS) and any use is expected to be on a temporary basis and dependent on market conditions or when prevailing market conditions cause TRS to be the most efficient instrument to express a view in a fixed income market. Use of TRS is expected for efficient portfolio management and the impact is expected to be negligible. Investors should refer to the "Total Return Swaps" section of the current prospectus for more details of the expected and maximum use of

total return swaps by the fund. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the current prospectus.

Emerging Local Markets Bond Fund

INVESTMENT OBJECTIVE

The fund's objective is to maximise the value of its shares through both growth in the value of, and income from, its investments.

The fund is actively managed and invests mainly in a diversified portfolio of bonds of all types from emerging market issuers, with a focus on bonds that are denominated in the local currency.

The fund invests primarily in debt securities issued by governments, government agencies, supra-national organisations and companies that are either incorporated in one of the economically emerging countries of Latin America, Asia, Europe, Africa and the Middle East or conduct most of their business in such countries. Portfolio debt securities can include fixed and floating rate bonds, warrants and other transferable debt securities of any type, including high yield securities (including up to 10% in distressed and/or defaulted bonds). The fund may also invest up to 25% in convertible bonds (including up to 20% in contingent convertible bonds).

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the current prospectus. However, as at the date of the current prospectus, the fund does not expect to invest in any other eligible securities, on an ancillary basis, to more than a limited extent.

The fund may use derivatives for hedging, efficient portfolio management and investment purposes. The fund may also use derivatives to create synthetic short positions in currencies and debt securities. The fund may use total return swaps (TRS) and any use is expected to be on a temporary basis and dependent on market conditions or when prevailing market conditions cause TRS to offer the most efficient or only way to express a view. Use of TRS is expected when they offer the most efficient or only way to express a view and the impact is expected to be limited and lead leading to marginal improvement in risk-adjusted returns. Investors should refer to the "Total Return Swaps" section of the current prospectus for more details of the expected and maximum use of total return swaps by the fund.

For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the current prospectus.

Emerging Markets Bond Fund

INVESTMENT OBJECTIVE

The fund's objective is to maximise the value of its shares through both growth in the value of, and income from, its investments.

The fund is actively managed and invests mainly in a diversified portfolio of bonds of all types from emerging market issuers.

The fund invests primarily in debt securities issued by governments, government agencies, supra-national organisations and companies that are either incorporated in one of the economically emerging countries of Latin America, Asia, Europe, Africa and the Middle East or conduct most of their business in such countries. Portfolio debt securities can include fixed and floating rate bonds, warrants and other transferable debt securities of any type, including high yield securities (including up to 10% in distressed and/or defaulted bonds). The fund may invest up to 25% in convertible bonds (including up to 20% in contingent convertible bonds).

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the current prospectus. However, as at the date of the current prospectus, the fund does not expect to invest in any other eligible securities, on an ancillary basis, to more than a limited extent.

The fund may use derivatives for hedging, efficient portfolio management and investment purposes. The fund may also use derivatives to create synthetic short positions in currencies and debt securities. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the current prospectus.

Global Government Bond Fund

INVESTMENT OBJECTIVE

The fund's objective is to seek total return through a combination of income and capital appreciation.

The fund is actively managed and invests mainly in a portfolio of bonds issued by governments, government-related entities and government agencies around the world, including emerging markets.

The fund invests primarily in debt securities issued by governments, government-related entities and government agencies. Generally, debt securities held in the portfolio will be those rated BBB- or higher by Standard & Poor's or have an equivalent rating (or, if unrated, are of equivalent quality). However, the fund may invest up to 10% of its portfolio in high yield securities. In accordance with its own internal rating system, the investment manager will ensure that the unrated debt securities in which the fund invests are of the same quality as the rated securities of the same type. Portfolio debt securities can include fixed and floating rate bonds, inflation-linked bonds, convertible bonds, warrants and other transferable debt securities of any type. The fund may also invest in preferred shares, hybrids (subordinated financial bonds) and money market securities.

Portfolio debt securities may also include agency mortgage-backed securities (MBS) which may exceed 20% of net assets. These instruments are considered as guaranteed by the US government and the exposure to them will comply with the "Six Issue" rule, as described in the current prospectus, to the extent that the exposure to a single government exceeds 35%.

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the current prospectus. However, as at the date of the current prospectus, the fund does not expect to invest in any other eligible securities, on an ancillary basis, to more than a limited extent.

The fund may use derivatives for hedging, efficient portfolio management and investment purposes. The fund may also use derivatives to create synthetic short positions in debt securities and credit indices. The fund may use total return swaps (TRS) and any use is expected to be on a temporary basis and dependent on market conditions or when prevailing market conditions

cause TRS to be the most efficient instrument to express a view in a fixed income market. Use of TRS is expected for efficient portfolio management and the impact is expected to be negligible. Investors should refer to the "Total Return Swaps" section of the current prospectus for more details of the expected and maximum use of total return swaps by the fund. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the current prospectus.

Global High Income Bond Fund

INVESTMENT OBJECTIVE

The fund's objective is to maximise the value of its shares through both growth in the value of, and income from, its investments.

The fund is actively managed and invests mainly in a diversified portfolio of high yield corporate bonds from issuers around the world, including emerging markets.

The fund invests primarily in debt securities that are rated below BBB by Standard & Poor's or have an equivalent rating (or, if unrated, are of equivalent quality) and are issued by companies. In accordance with its own internal rating system, the investment manager will ensure that the unrated corporate debt securities in which the fund invests are of the same quality as the rated securities of the same type. Portfolio debt securities can include fixed and floating rate bonds, preferred shares, warrants and other transferable debt securities of any type. The fund may also invest up to 25% in convertible bonds (including up to 15% in contingent convertible bonds).

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the current prospectus. However, as at the date of the current prospectus, the fund does not expect to invest in any other eligible securities, on an ancillary basis, to more than a limited extent.

The fund may use derivatives for hedging, efficient portfolio management and investment purposes. The fund may also use derivatives to create synthetic short positions in debt securities and credit indices. The fund may use total return swaps (TRS) and any use is expected to be on a temporary basis and dependent on market conditions or when prevailing market conditions cause TRS to be the most efficient instrument to express a view in a particular credit. Use of TRS is expected for efficient portfolio management and the impact is expected to be an increase in risk-adjusted returns. Investors should refer to the "Total Return Swaps" section of the current prospectus for more details of the expected and maximum use of total return swaps by the fund. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the current prospectus.

Global High Yield Bond Fund

INVESTMENT OBJECTIVE

The fund's objective is to maximise the value of its shares through both growth in the value of, and income from, its investments.

The fund is actively managed and invests mainly in a diversified portfolio of high yield corporate bonds from issuers around the world, including emerging markets.

The fund invests primarily in debt securities that are rated below BBB by Standard & Poor's or have an equivalent rating (or, if unrated, are of equivalent quality) and are issued by companies. In accordance with its own internal rating system, the investment manager will ensure that the unrated corporate debt securities in which the fund invests are of the same quality as the rated securities of the same type. Portfolio debt securities can include fixed and floating rate bonds, preferred shares, warrants and other transferable debt securities of any type. The fund may also invest up to 25% in convertible bonds (including up to 10% in contingent convertible bonds). In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the current prospectus. However, as at the date of the current prospectus, the fund does not expect to invest in any other eligible securities, on an ancillary basis, to more than a limited extent.

The fund may use derivatives for hedging, efficient portfolio management and investment purposes. The fund may also use derivatives to create synthetic short positions in debt securities and credit indices. The fund may use total return swaps (TRS) and any use is expected to be on a temporary basis and dependent on market conditions or when prevailing market conditions cause TRS to be the most efficient instrument to express a view in a particular credit. Use of TRS is expected for efficient portfolio management and the impact is expected to be negligible. Investors should refer to the "Total Return Swaps" section of the current prospectus for more details of the expected and maximum use of total return swaps by the fund. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the current prospectus.

Responsible Asia Credit Bond Fund⁽¹⁾

INVESTMENT OBJECTIVE

The fund's objective is to maximize total return through income generation and capital appreciation, consistent with prudent investment management.

The fund is actively managed and invests mainly in a diversified portfolio of transferable U.S. dollar denominated fixed income securities of issuers domiciled, or exercising the predominant part of their economic activity, in Asian countries including emerging markets, excluding Japan.

Although the fund does not have sustainable investment as an objective, the promotion of environmental and social characteristics is achieved through the investment manager's avoidance of sectors or companies, whose activities may be considered harmful to the environment and/or society through the application of its proprietary socially responsible screen (exclusion list). As a consequence, specific companies whose business activities involve controversial weapons (cluster munitions, anti-personnel mines, incendiary, chemical, biological and nuclear weapons), tobacco production, coal production, assault style weapons for civilian use, adult entertainment, direct gambling operations and certain conduct-based criteria are excluded.

For further details see the T. Rowe Price Responsible Exclusion List section of the current prospectus.

The fund invests primarily in (i) debt securities issued by companies that are either incorporated in Asia ex-Japan, or conduct most of their business in such countries, (ii) debt securities of sovereign and (iii) official (quasi-sovereign) institutions in Asia ex-Japan. Generally, debt securities held in the portfolio, as rated by Standard & Poor's or equivalent, are expected to produce an average credit rating within the range of A to BB credit rating categories. In accordance with its own internal rating system, the investment manager will ensure that the unrated corporate debt securities in which the fund invests are of the same quality as the rated securities of the same type. Portfolio debt securities can include fixed and floating rate bonds, warrants and other transferable debt securities of any type, including high yield securities. The fund may invest up to 10% in convertible bonds and contingent convertible bonds and to a limited extent in distressed or defaulted bonds.

The fund normally limits exposure to corporate issuers to 5% of its net asset value. Non-U.S. dollar currency exposure is limited to 10% of the fund's net asset value.

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the current prospectus. However, as at the date of the current prospectus, the fund does not expect to invest in any other eligible securities, on an ancillary basis, to more than a limited extent.

The fund may use derivatives for hedging, efficient portfolio management and investment purposes. The fund may also use derivatives to create synthetic short positions in currencies, debt securities, credit indices and equities. The fund may use total return swaps (TRS) and any use is expected to be on a temporary basis and dependent on market conditions or when prevailing market conditions cause TRS to offer the most efficient or only way to express a view. Use of TRS is expected when they offer the most efficient or only way to express a view and the impact is expected to be limited and lead to marginal improvement in risk-adjusted returns. Investors should refer to the "Total Return Swaps" section of the prospectus for more details of the expected and maximum use of total return swaps by the fund. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the current prospectus. Any use of derivatives aims to be consistent with the fund objectives and the environmental and social characteristics described within the 'Objective and Investment Policy' of the fund.

⁽¹⁾ Fund renamed from Asia Credit Bond Fund effective 2 November 2021.
The accompanying notes are an integral part of these financial statements.

Responsible Asian ex-Japan Equity Fund⁽²⁾

INVESTMENT OBJECTIVE

The fund's objective is to increase the value of its shares, over the long term, through growth in the value of its investments.

The fund is actively managed and invests mainly in a diversified portfolio of shares of companies in Asia (excluding Japan).

Although the fund does not have sustainable investment as an objective, the promotion of environmental and social characteristics is achieved through the investment manager's avoidance of sectors or companies, whose activities may be considered harmful to the environment and/or society through the application of its proprietary socially responsible screen (exclusion list). As a consequence, specific companies whose business activities involve controversial weapons (cluster munitions, anti-personnel mines, incendiary, chemical, biological and nuclear weapons), tobacco production, coal production, assault-style weapons for civilian use, adult entertainment, direct gambling operations and certain conduct-based criteria are excluded.

For further details see the T. Rowe Price Responsible Exclusion List section of the current prospectus. The fund invests primarily in equity and equity-related securities issued by companies that are either incorporated in any Asian country except Japan or conduct most of their business in such countries. Types of securities may include common shares, preferred shares, warrants, American Depositary Receipts (ADRs), European Depositary Receipts (EDRs) and Global Depositary Receipts (GDRs).

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the current prospectus. However, as at the date of the current prospectus, the fund does not expect to invest in any other eligible securities, on an ancillary basis, to more than a limited extent.

The fund may use derivatives for hedging and efficient portfolio management. Any use of derivatives aims to be consistent with the fund objectives and the environmental and social characteristics described within the 'Objective and Investment Policy' of the fund. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the current prospectus.

⁽²⁾ Fund renamed from Asian ex-Japan Equity Fund effective 2 November 2021. The accompanying notes are an integral part of these financial statements.

Responsible Diversified Income Bond Fund⁽³⁾

INVESTMENT OBJECTIVE

The fund's objective is to maximise the value of its shares through both growth in the value of, and income from, its investments.

The fund is actively managed and invests mainly in a diversified portfolio of bonds of all types from issuers around the world, including emerging markets.

Although the fund does not have sustainable investment as an objective, the promotion of environmental and social characteristics is achieved through the investment manager's avoidance of sectors or companies, whose activities may be considered harmful to the environment and/or society through the application of its proprietary socially responsible screen (exclusion list). As a consequence, specific companies whose business activities involve controversial weapons (cluster munitions, anti-personnel mines, incendiary, chemical, biological and nuclear weapons), tobacco production, coal production, assault-style weapons for civilian use, adult entertainment, direct gambling operations and certain conduct-based criteria are excluded.

For further details see the T. Rowe Price Responsible Exclusion List section of the current prospectus.

The fund invests primarily in debt securities issued by governments, government agencies, supra-national organisations, companies and banks. Portfolio debt securities can include fixed and floating rate bonds, warrants and other transferable debt securities of any type, including high yield securities. The fund may invest more than 20% of assets in asset-backed securities (ABS) and mortgage-backed securities (MBS) and up to 25% in convertible bonds (including up to 20% in contingent convertible bonds).

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the current prospectus. However, as at the date of the current prospectus, the fund does not expect to invest in any other eligible securities, on an ancillary basis, to more than a limited extent.

The fund may use derivatives for hedging, efficient portfolio management and investment purposes. The fund may also use derivatives to create synthetic short positions in currencies, debt securities, credit indices and equities. The fund may use total return swaps (TRS)

and any use is expected to be on a temporary basis and dependent on market conditions or when prevailing market conditions cause TRS to offer the most efficient or only way to express a view. Use of TRS is expected when it is more efficient, to express beta views, and for both hedging purposes and at times seeking risk and the impact is expected to be negligible. Investors should refer to the "Total Return Swaps" section of the current prospectus for more details of the expected and maximum use of total return swaps by the fund. Any use of derivatives aims to be consistent with the fund objectives and the environmental and social characteristics described within the 'Objective and Investment Policy' of the fund. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the current prospectus.

⁽³⁾ Fund renamed from Diversified Income Bond Fund effective 2 November 2021.

The accompanying notes are an integral part of these financial statements.

Responsible Emerging Markets Corporate Bond Fund⁽⁴⁾

INVESTMENT OBJECTIVE

The fund's objective is to maximise the value of its shares through both growth in the value of, and income from, its investments.

The fund is actively managed and invests mainly in a diversified portfolio of corporate bonds from emerging market issuers.

Although the fund does not have sustainable investment as an objective, the promotion of environmental and social characteristics is achieved through the investment manager's avoidance of sectors or companies, whose activities may be considered harmful to the environment and/or society through the application of its proprietary socially responsible screen (exclusion list). As a consequence, specific companies whose business activities involve controversial weapons (cluster munitions, anti-personnel mines, incendiary, chemical, biological and nuclear weapons), tobacco production, coal production, assault-style weapons for civilian use, adult entertainment, direct gambling operations and certain conduct-based criteria are excluded.

For further details see the T. Rowe Price Responsible Exclusion List section of the current prospectus.

The fund invests primarily in debt securities issued by companies that are either incorporated in one of the economically emerging countries of Latin America, Asia, Europe, Africa and the Middle East or conduct most of their business in such countries. Portfolio debt securities can include fixed and floating rate bonds, warrants and other transferable debt securities of any type, including high yield securities (including up to 10% in distressed and/or defaulted bonds). The fund may invest up to 25% in convertible bonds (including up to 20% in contingent convertible bonds).

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the current prospectus. However, as at the date of the current prospectus, the fund does not expect to invest in any other eligible securities, on an ancillary basis, to more than a limited extent.

The fund may use derivatives for hedging, efficient portfolio management and investment purposes. The fund may also use derivatives to create synthetic short positions in currencies and debt securities. The fund may

SCHEDULE OF INVESTMENTS

As at 31 December 2021

use total return swaps (TRS) and any use is expected to be on a temporary basis and dependent on market conditions or when prevailing market conditions cause TRS to offer the most efficient or only way to express a view. Use of TRS is expected when they offer the most efficient or only way to express a view and the impact is expected to be limited and lead to marginal improvement in risk-adjusted returns. Investors should refer to the "Total Return Swaps" section of the current prospectus for more details on the expected and maximum use of total return swaps by the fund.

For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives usage' section of the current prospectus.

⁽⁴⁾ Fund renamed from Emerging Markets Corporate Bond Fund effective 2 November 2021.

The accompanying notes are an integral part of these financial statements.

Responsible Euro Corporate Bond Fund⁽⁵⁾

INVESTMENT OBJECTIVE

The fund's objective is to maximise the value of its shares through both growth in the value of, and income from, its investments.

The fund is actively managed and invests mainly in a diversified portfolio of corporate bonds that are denominated in euro.

Although the fund does not have sustainable investment as an objective, the promotion of environmental and social characteristics is achieved through the investment manager's avoidance of sectors or companies, whose activities may be considered harmful to the environment and/or society through the application of its proprietary socially responsible screen (exclusion list). As a consequence, specific companies whose business activities involve controversial weapons (cluster munitions, anti-personnel mines, incendiary, chemical, biological and nuclear weapons), tobacco production, coal production, assault-style weapons for civilian use, adult entertainment, direct gambling operations and certain conduct-based criteria are excluded.

For further details see the T. Rowe Price Responsible Exclusion List section of the current prospectus.

The fund invests primarily in debt securities denominated in euro. The fund may also invest in debt securities issued by Eurozone governments and government agencies, and in securities denominated in other currencies than the euro. Portfolio debt securities can include fixed and floating rate bonds as well as preferred shares and other transferable debt securities of any type, including high yield securities. The fund may invest up to 25% in convertible bonds (including, to a limited extent, in contingent convertible bonds).

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the current prospectus. However, as at the date of the current prospectus, the fund does not expect to invest in any other eligible securities, on an ancillary basis, to more than a limited extent.

The fund may use derivatives for hedging, efficient portfolio management and investment purposes. The fund may also use derivatives to create synthetic short positions in debt securities and credit indices. The fund may use total return swaps (TRS) and any use is expected to be on a temporary basis and dependent on

SCHEDULE OF INVESTMENTS

As at 31 December 2021

market conditions or when prevailing market conditions cause TRS to be the most efficient instrument to express a view in a particular credit and to manage significant cash flows. Use of TRS is expected for efficient portfolio management and the impact is expected to be an increase in risk-adjusted returns and the reduction of cash drag. Investors should refer to the "Total Return Swaps" section of the current prospectus for more details on the expected and maximum use of total return swaps by the fund. Any use of derivatives aims to be consistent with the fund objectives and the environmental and social characteristics described within the 'Objective and Investment Policy' of the fund. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the current prospectus.

⁽⁵⁾ Fund renamed from Euro Corporate Bond Fund effective 2 November 2021.

The accompanying notes are an integral part of these financial statements.

Responsible European High Yield Bond Fund⁽⁶⁾

INVESTMENT OBJECTIVE

The fund's objective is to maximise the value of its shares through both growth in the value of, and income from, its investments.

The fund is actively managed and invests mainly in a diversified portfolio of high yield corporate bonds that are denominated in European currencies.

Although the fund does not have sustainable investment as an objective, the promotion of environmental and social characteristics is achieved through the investment manager's avoidance of sectors or companies, whose activities may be considered harmful to the environment and/or society through the application of its proprietary socially responsible screen (exclusion list). As a consequence, specific companies whose business activities involve controversial weapons (cluster munitions, anti-personnel mines, incendiary, chemical, biological and nuclear weapons), tobacco production, coal production, assault-style weapons for civilian use, adult entertainment, direct gambling operations and certain conduct-based criteria are excluded.

For further details see the T. Rowe Price Responsible Exclusion List section of the current prospectus.

The fund invests primarily in debt securities that are rated below BBB by Standard & Poor's or have an equivalent rating (or, if unrated, are of equivalent quality), and are issued by companies and denominated in euro or another European currency. In accordance with its own internal rating system, the investment manager will ensure that the unrated corporate debt securities in which the fund invests are of the same quality as the rated securities of the same type. Portfolio debt securities can include fixed and floating rate bonds as well as preferred shares, and other transferable debt securities of any type (including up to 10% in distressed and/or defaulted bonds). The fund may invest up to 25% in convertible bonds (including, to a limited extent, contingent convertible bonds).

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the current prospectus. However, as at the date of the current prospectus, the fund does not expect to invest in any other eligible securities, on an ancillary basis, to more than a limited extent.

SCHEDULE OF INVESTMENTS

As at 31 December 2021

The fund may use derivatives for hedging, efficient portfolio management and investment purposes. The fund may also use derivatives to create synthetic short positions in debt securities and credit indices. The fund may use total return swaps (TRS) and any use is expected to be on a temporary basis and dependent on market conditions or when prevailing market conditions cause TRS to be the most efficient instrument to express a view in a particular credit. Use of TRS is expected for efficient portfolio management and the impact is expected to be an increase in risk-adjusted returns. Investors should refer to the "Total Return Swaps" section of the current prospectus for more details on the expected and maximum use of total return swaps by the fund. Any use of derivatives aims to be consistent with the fund objectives and the environmental and social characteristics described within the 'Objective and Investment Policy' of the fund. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the current prospectus.

⁽⁶⁾ Fund renamed from European High Yield Bond Fund effective 2 November 2021.

The accompanying notes are an integral part of these financial statements.

Responsible Global Aggregate Bond Fund⁽⁷⁾

INVESTMENT OBJECTIVE

The fund's objective is to maximise the value of its shares through both growth in the value of, and income from, its investments.

The fund is actively managed and invests mainly in a diversified portfolio of bonds of all types from issuers around the world including emerging markets.

Although the fund does not have sustainable investment as an objective, the promotion of environmental and social characteristics is achieved through the investment manager's avoidance of sectors or companies, whose activities may be considered harmful to the environment and/or society through the application of its proprietary socially responsible screen (exclusion list). As a consequence, specific companies whose business activities involve controversial weapons (cluster munitions, anti-personnel mines, incendiary, chemical, biological and nuclear weapons), tobacco production, coal production, assault-style weapons for civilian use, adult entertainment, direct gambling operations and certain conduct-based criteria are excluded.

For further details see the T. Rowe Price Responsible Exclusion List section of the current prospectus.

The fund invests primarily in debt securities issued by governments, government agencies, supra-national organisations, companies and banks. Generally, debt securities held in the portfolio, as rated by Standard & Poor's or equivalent, are expected to produce an average credit rating within the range of AAA to BBB- credit rating categories. In accordance with its own internal rating system, the investment manager will ensure that the unrated corporate debt securities in which the fund invests are of the same quality as the rated securities of the same type.

Portfolio debt securities can include fixed and floating rate bonds as well as preferred shares, and other transferable debt securities of any type, including high yield securities (including up to 10% in distressed and/or defaulted bonds). The fund may invest more than 20% of net assets in asset-backed securities (ABS) and mortgagebacked securities (MBS) and invest up to 25% in convertible bonds (including up to 20% in contingent convertible bonds).

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and

SCHEDULE OF INVESTMENTS

As at 31 December 2021

Restrictions' section of the current prospectus. However, as at the date of the current prospectus, the fund does not expect to invest in any other eligible securities, on an ancillary basis, to more than a limited extent.

The fund may use derivatives for hedging, efficient portfolio management and investment purposes. The fund may also use derivatives to create synthetic short positions in currencies, debt securities and credit indices. The fund may use total return swaps (TRS) and any use is expected to be on a temporary basis and dependent on market conditions or when prevailing market conditions cause TRS to be the most efficient instrument to express a view in a fixed income market. Use of TRS is expected for efficient portfolio management and the impact is expected to be negligible. Investors should refer to the "Total Return Swaps" section of the current prospectus for more details on the expected and maximum use of total return swaps by the fund. Any use of derivatives aims to be consistent with the fund objectives and the environmental and social characteristics described within the 'Objective and Investment Policy' of the fund. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the current prospectus.

Responsible Global Investment Grade Corporate Bond Fund⁽⁸⁾

INVESTMENT OBJECTIVE

The fund's objective is to maximise the value of its shares through both growth in the value of, and income from, its investments.

The fund is actively managed and invests mainly in a diversified portfolio of investment-grade corporate bonds from issuers around the world, including emerging markets.

Although the fund does not have sustainable investment as an objective, the promotion of environmental and social characteristics is achieved through the investment manager's avoidance of sectors or companies, whose activities may be considered harmful to the environment and/or society through the application of its proprietary socially responsible screen (exclusion list). As a consequence, specific companies whose business activities involve controversial weapons (cluster munitions, anti-personnel mines, incendiary, chemical, biological and nuclear weapons), tobacco production, coal production, assault-style weapons for civilian use, adult entertainment, direct gambling operations and certain conduct-based criteria are excluded.

For further details see the T. Rowe Price Responsible Exclusion List section of the current prospectus.

The fund invests primarily in debt securities that are rated BBB- or higher by Standard & Poor's or have an equivalent rating (or, if unrated, are of equivalent quality) and are issued by companies. In accordance with its own internal rating system, the investment manager will ensure that the unrated corporate debt securities in which the fund invests are of the same quality as the rated securities of the same type. Portfolio debt securities can include fixed and floating rate bonds, warrants and other transferable debt securities of any type, including high-yield securities. The fund may also invest in preferred shares, hybrids, as well as government securities. The fund may also invest up to 25% in convertible bonds (including up to 10% in contingent convertible bonds). In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the current prospectus. The fund may invest in asset-backed securities (ABS) and mortgage-backed securities (MBS), on an ancillary basis, to more than a limited extent.

SCHEDULE OF INVESTMENTS

As at 31 December 2021

The fund may use derivatives for hedging, efficient portfolio management and investment purposes. The fund may also use derivatives to create synthetic short positions in debt securities and credit indices. The fund may use total return swaps (TRS) and any use is expected to be on a temporary basis and dependent on market conditions or when prevailing market conditions cause TRS to be the most efficient instrument to express a view in a particular credit. Use of TRS is expected for efficient portfolio management and the impact is expected to be an increase in risk-adjusted returns. Investors should refer to the "Total Return Swaps" section of the current prospectus for more details on the expected and maximum use of total return swaps by the fund. Any use of derivatives aims to be consistent with the fund objectives and the environmental and social characteristics described within the 'Objective and Investment Policy' of the fund. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the current prospectus.

⁽⁸⁾ Fund renamed from Global Investment Grade Corporate Bond Fund effective 2 November 2021.

The accompanying notes are an integral part of these financial statements.

Responsible US Aggregate Bond Fund⁽⁹⁾

INVESTMENT OBJECTIVE

The fund's objective is to maximise the value of its shares through both growth in the value of, and income from, its investments.

The fund is actively managed and invests mainly in a diversified portfolio of US bonds. Although the fund does not have sustainable investment as an objective, the promotion of environmental and social characteristics is achieved through the investment manager's avoidance of sectors or companies, whose activities may be considered harmful to the environment and/or society through the application of its proprietary socially responsible screen (exclusion list). As a consequence, specific companies whose business activities involve controversial weapons (cluster munitions, anti-personnel mines, incendiary, chemical, biological and nuclear weapons), tobacco production, coal production, assault-style weapons for civilian use, adult entertainment, direct gambling operations and certain conduct-based criteria are excluded. For further details see the T. Rowe Price Responsible Exclusion List section of the current prospectus.

The fund invests primarily in debt securities denominated in U.S. dollars, which may include securities issued by governments, government agencies, supra-national organisations, companies and banks from developed and emerging markets. Portfolio debt securities can also include fixed and floating rate bonds, warrants and other transferable debt securities of any type, including high yield securities. The fund may invest more than 20% of net assets in asset-backed securities (ABS) and mortgage-backed securities (MBS) and invest up to 25% in convertible bonds (including up to 10% in contingent convertible bonds).

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the current prospectus. However, as at the date of the current prospectus, the fund does not expect to invest in any other eligible securities, on an ancillary basis, to more than a limited extent.

The fund may use derivatives for hedging, efficient portfolio management and investment purposes. The fund may also use derivatives to create synthetic short positions in debt securities. The fund may use total return swaps (TRS) and any use is expected to be on a

SCHEDULE OF INVESTMENTS

As at 31 December 2021

temporary basis and dependent on market conditions or when prevailing market conditions cause TRS to offer the most efficient or only way to express a view. Use of TRS is expected when they offer the most efficient or only way to express a view and the impact is expected to be negligible. Investors should refer to the "Total Return Swaps" section of the current prospectus for more details on the expected and maximum use of total return swaps by the fund. Any use of derivatives aims to be consistent with the fund objectives and the environmental and social characteristics described within the 'Objective and Investment Policy' of the fund. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the current prospectus.

Responsible US Investment Grade Corporate Bond Fund⁽¹⁰⁾

INVESTMENT OBJECTIVE

The fund's objective is to maximise the value of its shares through both growth in the value of, and income from, its investments.

The fund is actively managed and invests mainly in a diversified portfolio of investment-grade corporate bonds that are denominated in US Dollar including those from emerging markets issuers.

Although the fund does not have sustainable investment as an objective, the promotion of environmental and social characteristics is achieved through the investment manager's avoidance of sectors or companies, whose activities may be considered harmful to the environment and/or society through the application of its proprietary socially responsible screen (exclusion list). As a consequence, specific companies whose business activities involve controversial weapons (cluster munitions, anti-personnel mines, incendiary, chemical, biological and nuclear weapons), tobacco production, coal production, assault-style weapons for civilian use, adult entertainment, direct gambling operations and certain conduct-based criteria are excluded.

For further details see the T. Rowe Price Responsible Exclusion List section of the current prospectus.

The fund invests primarily in corporate debt securities that are rated BBB- or higher by Standard & Poor's or have an equivalent rating (or, if unrated, are of equivalent quality) and are denominated in US Dollar. In accordance with its own internal rating system, the investment manager will ensure that the unrated corporate debt securities in which the fund invests are of the same quality as the rated securities of the same type.

Portfolio debt securities can include fixed and floating rate bonds, warrants and other transferable debt securities of any type, including, to a limited extent, high-yield securities. The fund may also invest in preferred shares, hybrids, as well as U.S. Treasury and agency securities. The fund may invest up to 5% of net assets in asset-backed securities (ABS) and mortgage-backed securities (MBS) and invest up to 25% in convertible bonds (including, to a limited extent, in contingent convertible bonds).

Non-U.S. Dollar currency exposure is limited to 10% of the fund's net asset value.

SCHEDULE OF INVESTMENTS

As at 31 December 2021

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the current prospectus. However, as at the date of the current prospectus, the fund does not expect to invest in any other eligible securities, on an ancillary basis, to more than a limited extent.

The fund may use derivatives for hedging, efficient portfolio management and investment purposes. The fund may also use derivatives to create synthetic short positions in debt securities and credit indices. The fund may use total return swaps (TRS) and any use is expected to be on a temporary basis and dependent on market conditions or when prevailing market conditions cause TRS to offer the most efficient or only way to express a view. Use of TRS is expected when they offer the most efficient or only way to express a view and the impact is expected to be negligible. Investors should refer to the "Total Return Swaps" section of the current prospectus for more details on the expected and maximum use of total return swaps by the fund. Any use of derivatives aims to be consistent with the fund objectives and the environmental and social characteristics described within the 'Objective and Investment Policy' of the fund. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the current prospectus.

⁽¹⁰⁾ Fund renamed from US Investment Grade Corporate Bond Fund effective 2 November 2021.

The accompanying notes are an integral part of these financial statements.

US High Yield Bond Fund

INVESTMENT OBJECTIVE

The fund's objective is to maximise the value of its shares through both growth in the value of, and income from, its investments.

The fund is actively managed and invests mainly in a diversified portfolio of high yield corporate bonds from issuers in the United States.

The fund invests primarily in debt securities, typically within a credit rating range of BB to CCC as rated by Standard & Poor's or have an equivalent rating (or, if unrated, are of equivalent quality) and are issued by companies in the United States. In accordance with its own internal rating system, the investment manager will ensure that the unrated corporate debt securities in which the fund invests are of the same quality as the rated securities of the same type. Portfolio debt securities can include fixed and floating rate bonds, preferred shares, warrants and other transferable debt securities of any type including up to 10% in distressed or defaulted bonds. The fund may also invest up to 10% in convertible bonds and contingent convertible bonds.

Non-U.S. dollar currency exposure is limited to 20% of the fund's net asset value.

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the current prospectus. However, as at the date of the current prospectus, the fund does not expect to invest in any other eligible securities, on an ancillary basis, to more than a limited extent.

The fund may use derivatives for hedging, efficient portfolio management and investment purposes. The fund may also use derivatives to create synthetic short positions in debt securities and credit indices. The fund may use total return swaps (TRS) and any use is expected to be on a temporary basis and dependent on market conditions or when prevailing market conditions cause TRS to offer the most efficient or only way to express a view. Use of TRS is expected when they offer the most efficient or only way to express a view and the impact is expected to be negligible. Investors should refer to the "Total Return Swaps" section of the current prospectus for more details on the expected and maximum use of total return swaps by the fund. For a summary of the main types of derivatives that may be used for, refer to the 'Fund Derivatives Usage' section of the current prospectus.

Asian Opportunities Equity Fund

INVESTMENT OBJECTIVE

The fund's objective is to increase the value of its shares, over the long term, through growth in the value of its investments.

The fund is actively managed and invests mainly in a diversified portfolio of shares of companies in Asia.

The fund invests primarily in equity and equity-related securities issued by companies that are either incorporated in any Asian country or conduct most of their business in such countries. Types of securities may include common shares, preferred shares, warrants, American Depositary Receipts (ADRs), European Depositary Receipts (EDRs) and Global Depositary Receipts (GDRs).

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the current prospectus. However, as at the date of the current prospectus, the fund does not expect to invest in any other eligible securities, on an ancillary basis, to more than a limited extent.

The fund may use derivatives for hedging and efficient portfolio management. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the current prospectus.

China Evolution Equity Fund

INVESTMENT OBJECTIVE

The fund's objective is to increase the value of its shares, over the long term, through growth in the value of its investments.

The fund is actively managed and invests mainly in a diversified portfolio of shares of Chinese companies and may have significant exposure to smaller capitalisation companies.

The fund invests primarily in equity and equity-related securities issued by companies that are either incorporated in China, Hong Kong, Macau or Taiwan, or conduct most of their business in China. The securities may be listed within and/or outside of China. Types of securities may include common shares (including A, B and H shares, Red-chips and P-chips), preferred shares, warrants, American Depositary Receipts (ADRs), Chinese Depositary Receipts (CDRs), European Depositary Receipts (EDRs) and Global Depositary Receipts (GDRs). Investments in China A shares may be made through the Shanghai-Hong Kong Stock Connect or the Shenzhen-Hong Kong Stock Connect programs and the QFII program.

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the current prospectus. However, as at the date of the current prospectus, the fund does not expect to invest in any other eligible securities, on an ancillary basis, to more than a limited extent.

The fund may use derivatives for hedging and efficient portfolio management. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' of the current prospectus.

China Growth Leaders Equity Fund⁽¹¹⁾

INVESTMENT OBJECTIVE

The fund's objective is to increase the value of its shares, over the long term, through growth in the value of its investments.

The fund is actively managed and invests mainly in a diversified portfolio of shares of Chinese companies.

The fund invests primarily in equity and equity-related securities issued by companies, considered by the investment manager to be market leaders or future market leaders in their respective sectors, that are either incorporated in China, Hong Kong or Macau, or conduct most of their business in China. The securities may be listed within and/or outside of China. Types of securities may include common shares, preferred shares, American Depositary Receipts (ADRs), Chinese Depositary Receipts (CDRs), European Depositary Receipts (EDRs) and Global Depositary Receipts (GDRs). Investments in China may include A, B and H shares, Red-chips and P-chips. Investments in China A shares may be made through the Shanghai-Hong Kong Stock Connect or the Shenzhen-Hong Kong Stock Connect programs and the QFII program.

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the current prospectus. However, as at the date of the current prospectus, the fund does not expect to invest in any other eligible securities, on an ancillary basis, to more than a limited extent.

The fund may use derivatives for hedging and efficient portfolio management. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the current prospectus.

Continental European Equity Fund

INVESTMENT OBJECTIVE

The fund's objective is to increase the value of its shares, over the long term, through growth in the value of its investments.

The fund is actively managed and invests mainly in a diversified portfolio of shares of companies in Europe (excluding the UK).

The fund invests primarily in equity and equity-related securities issued by companies that are either incorporated in any European country (excluding the United Kingdom) or conduct most of their business in such countries. Types of securities may include common shares, preferred shares, warrants, American Depository Receipts (ADRs), European Depository Receipts (EDRs) and Global Depository Receipts (GDRs).

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the current prospectus. However, as at the date of the current prospectus, the fund does not expect to invest in any other eligible securities, on an ancillary basis, to more than a limited extent.

The fund may use derivatives for hedging and efficient portfolio management. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the current prospectus.

Emerging Markets Discovery Equity Fund

INVESTMENT OBJECTIVE

The fund's objective is to increase the value of its shares, over the long term, through growth in the value of its investments.

The fund is actively managed and invests mainly in a widely diversified portfolio of shares of emerging market companies.

The fund invests primarily in equity and equity-related securities issued by companies that are either incorporated in one of the economically emerging countries of Latin America, Asia, Europe, Africa and the Middle East or conduct most of their business in such countries. Types of securities may include common shares, preferred shares, warrants, American Depositary Receipts (ADRs), European Depositary Receipts (EDRs) and Global Depositary Receipts (GDRs).

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the current prospectus. However, as at the date of the current prospectus, the fund does not expect to invest in any other eligible securities, on an ancillary basis, to more than a limited extent.

The fund may use derivatives for hedging and efficient portfolio management. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the current prospectus.

Emerging Markets Equity Fund

INVESTMENT OBJECTIVE

The fund's objective is to increase the value of its shares, over the long term, through growth in the value of its investments.

The fund is actively managed and invests mainly in a diversified portfolio of shares of emerging market companies.

The fund invests primarily in equity and equity-related securities issued by companies that are either incorporated in one of the economically emerging countries of Latin America, Asia, Europe, Africa and the Middle East or conduct most of their business in such countries. Types of securities may include common shares, preferred shares, warrants, American Depositary Receipts (ADRs), European Depositary Receipts (EDRs) and Global Depositary Receipts (GDRs).

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the current prospectus. However, as at the date of the current prospectus, the fund does not expect to invest in any other eligible securities, on an ancillary basis, to more than a limited extent.

The fund may use derivatives for hedging and efficient portfolio management. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the current prospectus.

European Equity Fund

INVESTMENT OBJECTIVE

The fund's objective is to increase the value of its shares, over the long term, through growth in the value of its investments.

The fund is actively managed and invests mainly in a diversified portfolio of shares of European companies.

The fund invests primarily in equity and equity-related securities issued by companies that are either incorporated in Europe or conduct most of their business there. Types of securities may include common shares, preferred shares, warrants, American Depository Receipts (ADRs), European Depository Receipts (EDRs) and Global Depository Receipts (GDRs). The fund may invest in Russia.

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the current prospectus. However, as at the date of the current prospectus, the fund does not expect to invest in any other eligible securities, on an ancillary basis, to more than a limited extent.

The fund may use derivatives for hedging and efficient portfolio management. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the current prospectus.

Frontier Markets Equity Fund

INVESTMENT OBJECTIVE

The fund's objective is to increase the value of its shares, over the long term, through growth in the value of its investments.

The fund is actively managed and invests mainly in a diversified portfolio of shares of frontier markets companies.

The fund invests primarily in equity and equity-related securities of companies that are either incorporated in those countries that are included in the MSCI Frontier Emerging Markets Index as well as any other countries not covered by the MSCI AC World Index. Types of securities may include common shares, preferred shares, warrants, American Depository Receipts (ADRs), European Depository Receipts (EDRs) and Global Depository Receipts (GDRs).

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the current prospectus. However, as at the date of the current prospectus, the fund does not expect to invest in any other eligible securities, on an ancillary basis, to more than a limited extent.

The fund may use derivatives for hedging and efficient portfolio management. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the current prospectus.

Global Equity Dividend Fund

INVESTMENT OBJECTIVE

The fund's objective is to increase the value of its shares, over the long term, through growth in the value of, and income from, its investments.

The fund is actively managed and invests mainly in a diversified portfolio of shares of companies that have the potential for above average and sustainable rates of income as well as the potential for capital appreciation. The companies may be anywhere in the world, including emerging markets.

The fund invests primarily in equity and equity-related securities of listed companies. Types of securities may include common shares, preferred shares, warrants, American Depository Receipts (ADRs), European Depository Receipts (EDRs) and Global Depository Receipts (GDRs).

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the current prospectus. However, as at the date of the current prospectus, the fund does not expect to invest in any other eligible securities, on an ancillary basis, to more than a limited extent.

The fund may use derivatives for hedging and efficient portfolio management. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the current prospectus.

Global Focused Growth Equity Fund

INVESTMENT OBJECTIVE

The fund's objective is to increase the value of its shares, over the long term, through growth in the value of its investments.

The fund is actively managed and invests mainly in a diversified portfolio of shares of companies that have the potential for above average and sustainable rates of earnings growth. The companies may be anywhere in the world, including emerging markets.

The fund invests primarily in equity and equity-related securities of listed companies. Types of securities may include common shares, preferred shares, warrants, American Depositary Receipts (ADRs), European Depositary Receipts (EDRs) and Global Depositary Receipts (GDRs).

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the current prospectus. However, as at the date of the current prospectus, the fund does not expect to invest in any other eligible securities, on an ancillary basis, to more than a limited extent.

The fund may use derivatives for hedging and efficient portfolio management. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the current prospectus.

Global Growth Equity Fund

INVESTMENT OBJECTIVE

The fund's objective is to increase the value of its shares, over the long term, through growth in the value of its investments.

The fund is actively managed and invests mainly in a diversified portfolio of shares of companies that have the potential for above average and sustainable rates of earnings growth. The companies may be anywhere in the world, including emerging markets.

The fund invests primarily in equity and equity-related securities of listed companies whose market capitalisation, at the time of purchase, falls within or above the range covered by the MSCI All Country World Index. Types of securities may include common shares, preferred shares, warrants, American Depository Receipts (ADRs), European Depository Receipts (EDRs) and Global Depository Receipts (GDRs).

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the current prospectus. However, as at the date of the current prospectus, the fund does not expect to invest in any other eligible securities, on an ancillary basis, to more than a limited extent.

The fund may use derivatives for hedging and efficient portfolio management. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the current prospectus.

Global Impact Equity Fund⁽¹²⁾

INVESTMENT OBJECTIVE

To have a positive impact on the environment and society by investing primarily in sustainable investments, where the companies' current or future business activities are expected to generate a positive impact whilst at the same time seeking to increase the value of its shares, over the long term, through growth in the value of its investments.

The fund is actively managed and invests mainly in a diversified portfolio of shares of companies which may be anywhere in the world, including emerging markets. The investment manager will focus on companies that it believes have the potential to create positive social or environmental impact through their products or services, and that appear to offer superior growth prospects and investment characteristics.

The fund invests primarily in equity and equity-related securities. Types of securities may include common shares, preferred shares, American Depositary Receipts (ADRs), European Depositary Receipts (EDRs) and Global Depositary Receipts (GDRs). Investments in China may include A and H shares. Investments in China A shares may be made through the Shanghai-Hong Kong Stock Connect or the Shenzhen-Hong Kong Stock Connect programs.

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the current prospectus. However, as at the date of the current prospectus, the fund does not expect to invest in any other eligible securities, on an ancillary basis, to more than a limited extent.

The fund may use derivatives for hedging and efficient portfolio management. Any use of derivatives aims to be consistent with the fund's objective. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the current prospectus.

The accompanying notes are an integral part of these financial statements.

Global Natural Resources Equity Fund

INVESTMENT OBJECTIVE

The fund's objective is to increase the value of its shares, over the long term, through growth in the value of its investments.

The fund is actively managed and invests mainly in a widely diversified portfolio of shares of natural resources or commodities-related companies. The companies may be anywhere in the world, including emerging markets.

The fund invests primarily in equity and equity-related securities of companies that own or develop natural resources and other basic commodities, such as common shares, preferred shares, warrants, American Depository Receipts (ADRs), European Depository Receipts (EDRs) and Global Depository Receipts (GDRs).

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the current prospectus. However, as at the date of the current prospectus, the fund does not expect to invest in any other eligible securities, on an ancillary basis, to more than a limited extent.

The fund may use derivatives for hedging and efficient portfolio management. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the current prospectus.

Global Real Estate Securities Fund

INVESTMENT OBJECTIVE

The fund's objective is to increase the value of its shares in the long term through both growth in the value of, and income from, its investments.

The fund is actively managed and invests mainly in a diversified portfolio of securities issued by real-estate related companies. The companies may be anywhere in the world, including emerging markets.

The fund invests primarily in equity and equity-related securities of companies that commit most of their assets to, or derive most of their revenues or profits from, real-estate related activities. These activities may include owning, operating, managing, financing, servicing, developing, acquiring or selling real estate. The portfolio may include investments in real estate operating companies (REOCs), real estate investment trusts (REITs) or similar entities. The fund may invest in common shares, preferred shares, warrants, American Depository Receipts (ADRs), European Depository Receipts (EDRs) and Global Depository Receipts (GDRs).

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the current prospectus. However, as at the date of the current prospectus, the fund does not expect to invest in any other eligible securities, on an ancillary basis, to more than a limited extent.

The fund may use derivatives for hedging and efficient portfolio management. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the current prospectus.

Global Select Equity Fund

INVESTMENT OBJECTIVE

The fund's objective is to increase the value of its shares, over the long term, through growth in the value of its investments.

The fund is actively managed and invests mainly in a high conviction portfolio of shares of companies anywhere in the world, including emerging markets.

The fund invests primarily in equity and equity-related securities. Types of securities may include common shares, preferred shares, American Depositary Receipts (ADRs), European Depositary Receipts (EDRs) and Global Depositary Receipts (GDRs). Investment in China A shares may be made through the Shanghai-Hong Kong Stock Connect or the Shenzhen-Hong Kong Stock Connect programs.

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the current prospectus. However, as at the date of the current prospectus, the fund does not expect to invest in any other eligible securities, on an ancillary basis, to more than a limited extent.

The fund may use derivatives for hedging and efficient portfolio management. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the current prospectus.

Global Technology Equity Fund

INVESTMENT OBJECTIVE

The fund's objective is to increase the value of its shares, over the long term, through growth in the value of its investments.

The fund is actively managed and invests mainly in a diversified portfolio of shares of technology development or utilisation companies, with a focus on leading global technology companies. The companies may be anywhere in the world, including emerging markets.

The fund invests primarily in equity and equity-related securities of technology-focused companies, such as common shares, preferred shares, warrants, American Depository Receipts (ADRs), European Depository Receipts (EDRs) and Global Depository Receipts (GDRs). In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the current prospectus. However, as at the date of the current prospectus, the fund does not expect to invest in any other eligible securities, on an ancillary basis, to more than a limited extent.

The fund may use derivatives for hedging and efficient portfolio management. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the current prospectus.

Global Value Equity Fund

INVESTMENT OBJECTIVE

The fund's objective is to increase the value of its shares, over the long term, through growth in the value of its investments.

The fund is actively managed and invests mainly in a widely diversified portfolio of undervalued shares of companies anywhere in the world, including emerging markets.

The fund invests primarily in undervalued equity and equity-related securities such as common shares, preferred shares, warrants, American Depository Receipts (ADRs), European Depository Receipts (EDRs) and Global Depository Receipts (GDRs).

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the current prospectus. However, as at the date of the current prospectus, the fund does not expect to invest in any other eligible securities, on an ancillary basis, to more than a limited extent.

The fund may use derivatives for hedging and efficient portfolio management. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the current prospectus.

Japanese Equity Fund

INVESTMENT OBJECTIVE

The fund's objective is to increase the value of its shares, over the long term, through growth in the value of its investments.

The fund is actively managed and invests mainly in a widely diversified portfolio of shares of companies in Japan.

The fund invests primarily in equity and equity-related securities of companies that are either incorporated in Japan or conduct most of their business there. Types of securities may include common shares, preferred shares, warrants, American Depository Receipts (ADRs), European Depository Receipts (EDRs) and Global Depository Receipts (GDRs).

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the current prospectus. However, as at the date of the current prospectus, the fund does not expect to invest in any other eligible securities, on an ancillary basis, to more than a limited extent.

The fund may use derivatives for hedging and efficient portfolio management. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the current prospectus.

Middle East & Africa Equity Fund

INVESTMENT OBJECTIVE

The fund's objective is to increase the value of its shares, over the long term, through growth in the value of its investments.

The fund is actively managed and invests mainly in a diversified portfolio of shares of companies in the developing countries of the Middle East and Africa.

The fund invests primarily in equity and equity-related securities of companies that are either incorporated in the developing countries of the Middle East and Africa or conduct most of their business in such countries. Types of securities may include common shares, preferred shares, warrants, American Depository Receipts (ADRs), European Depository Receipts (EDRs) and Global Depository Receipts (GDRs).

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the current prospectus. However, as at the date of the current prospectus, the fund does not expect to invest in any other eligible securities, on an ancillary basis, to more than a limited extent.

The fund may use derivatives for hedging and efficient portfolio management. For a summary of the main types of derivatives that may be used within the fund and what they may be used, refer to the 'Fund Derivatives Usage' section of the current prospectus.

Responsible European Select Equity Fund⁽¹³⁾

INVESTMENT OBJECTIVE

The fund's objective is to increase the value of its shares, over the long term, through growth in the value of its investments.

The fund is actively managed and invests mainly in a high conviction portfolio of shares of European companies.

Although the fund does not have sustainable investment as an objective, the promotion of environmental and social characteristics is achieved through the investment manager's avoidance of sectors or companies, whose activities may be considered harmful to the environment and/or society through the application of its proprietary socially responsible screen (exclusion list). As a consequence, specific companies whose business activities involve controversial weapons (cluster munitions, anti-personnel mines, incendiary, chemical, biological and nuclear weapons), tobacco production, coal production, assault-style weapons for civilian use, adult entertainment, direct gambling operations and certain conduct-based criteria are excluded. For further details see the T. Rowe Price Responsible Exclusion List section of the current prospectus.

The fund invests primarily in equity and equity-related securities issued by companies that are either incorporated in Europe or conduct a significant part of their business there. Types of securities may include common shares, preferred shares, warrants, American Depository Receipts (ADRs), European Depository Receipts (EDRs) and Global Depository Receipts (GDRs).

The fund may invest in Russia.

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the current prospectus. However, as at the date of the current prospectus, the fund does not expect to invest in any other eligible securities, on an ancillary basis, to more than a limited extent.

The fund may use derivatives for hedging and efficient portfolio management. Any use of derivatives aims to be consistent with the fund objectives and the environmental and social characteristics described within the 'Objective and Investment Policy' of the fund. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the current prospectus.

⁽¹³⁾ Fund renamed from European Select Equity Fund effective 2 November 2021.

The accompanying notes are an integral part of these financial statements.

Responsible European Smaller Companies Equity Fund⁽¹⁴⁾

INVESTMENT OBJECTIVE

The fund's objective is to increase the value of its shares, over the long term, through growth in the value of its investments.

The fund is actively managed and invests mainly in a diversified portfolio of shares of smaller publicly traded European companies.

Although the fund does not have sustainable investment as an objective, the promotion of environmental and social characteristics is achieved through the investment manager's avoidance of sectors or companies, whose activities may be considered harmful to the environment and/or society through the application of its proprietary socially responsible screen (exclusion list). As a consequence, specific companies whose business activities involve controversial weapons (cluster munitions, anti-personnel mines, incendiary, chemical, biological and nuclear weapons), tobacco production, coal production, assault-style weapons for civilian use, adult entertainment, direct gambling operations and certain conduct-based criteria are excluded. For further details see the T. Rowe Price Responsible Exclusion List section of the current prospectus.

The fund invests primarily in equity and equity-related securities issued by companies that are either incorporated in Europe or conduct most of their business there, and that, at the time of purchase, are no larger than those in the MSCI Europe Small Cap Index. Types of securities may include common shares, preferred shares, warrants, American Depositary Receipts (ADRs), European Depositary Receipts (EDRs) and Global Depositary Receipts (GDRs).

The fund may invest in Russia.

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the current prospectus. However, as at the date of the current prospectus, the fund does not expect to invest in any other eligible securities, on an ancillary basis, to more than a limited extent.

The fund may use derivatives for hedging and efficient portfolio management. Any use of derivatives aims to be consistent with the fund objectives and the environmental and social characteristics described within the 'Objective and Investment Policy' of the fund. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the current prospectus.

⁽¹⁴⁾ Fund renamed from European Smaller Companies Equity Fund effective 2 November 2021.

The accompanying notes are an integral part of these financial statements.

Responsible Global Structured Research Equity Fund⁽¹⁵⁾

INVESTMENT OBJECTIVE

To increase the value of its shares, over the long term, through growth in the value of its investments.

The fund is actively managed and invests mainly in a widely diversified portfolio of shares of companies. The companies may be anywhere in the world, including emerging markets. Although the fund does not have sustainable investment as an objective, the promotion of environmental and social characteristics is achieved through the investment manager's avoidance of sectors or companies, whose activities may be considered harmful to the environment and/or society through the application of its proprietary socially responsible screen (exclusion list). As a consequence, specific companies whose business activities involve controversial weapons (cluster munitions, anti-personnel mines, incendiary, chemical, biological and nuclear weapons), tobacco production, coal production, assault-style weapons for civilian use, adult entertainment, direct gambling operations and certain conduct-based criteria are excluded.

For further details see the T. Rowe Price Responsible Exclusion List section of the current prospectus.

The fund invests primarily in equity and equity-related securities. Types of securities may include common shares, preferred shares, American Depositary Receipts (ADRs), European Depositary Receipts (EDRs) and Global Depositary Receipts (GDRs). Investments in China may include A and H shares. Investments in China A shares may be made through the Shanghai-Hong Kong Stock Connect or the Shenzhen-Hong Kong Stock Connect programs.

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section commencing of the current prospectus. However, as at the date of the current prospectus, the fund does not expect to invest in any other eligible securities, on an ancillary basis, to more than a limited extent.

The fund may use derivatives for hedging and efficient portfolio management. Any use of derivatives aims to be consistent with the fund objectives and the environmental and social characteristics described within the 'Objective and Investment Policy' of the fund.

For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the current prospectus.

The accompanying notes are an integral part of these financial statements.

Science and Technology Equity Fund

INVESTMENT OBJECTIVE

The fund's objective is to increase the value of its shares, over the long term, through growth in the value of its investments.

The fund is actively managed and invests mainly in a widely diversified portfolio of shares of companies expected to benefit from the development and use of science and/or technology. The companies may be anywhere in the world, including emerging markets.

The fund invests primarily in equity and equity related securities of companies that operate in such industries as:

- information technology, including software, services, hardware, semiconductors, and technology equipment;
- telecommunication equipment and services;
- health care, including pharmaceuticals, biotechnology, life sciences, and health care equipment and services;
- business services and technology solutions;
- media, including advertising, broadcasting, cable and satellite, movies and entertainment, and publishing;
- internet commerce and advertising;
- alternative energy;
- aerospace and defence; and
- materials and chemicals.

Types of securities may include common shares, preferred shares, warrants, American Depositary Receipts (ADRs), European Depositary Receipts (EDRs) and Global Depositary Receipts (GDRs).

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the current prospectus. However, as at the date of the current prospectus, the fund does not expect to invest in any other eligible securities, on an ancillary basis, to more than a limited extent.

The fund may use derivatives for hedging and efficient portfolio management. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the current prospectus.

US Blue Chip Equity Fund

INVESTMENT OBJECTIVE

The fund's objective is to increase the value of its shares, over the long term, through growth in the value of its investments.

The fund is actively managed and invests mainly in a diversified portfolio of shares of large and medium sized "blue chip" companies in the United States.

The fund invests primarily in equity and equity-related securities of companies that are either incorporated in the United States of America or conduct most of their business there, that have a market capitalisation equal to or greater than the companies in the Russell Midcap Index or S&P Mid-cap 400 Index, and that have a leading market position, seasoned management and strong financial fundamentals.

Types of securities may include common shares, preferred shares, warrants, American Depository Receipts (ADRs), European Depository Receipts (EDRs) and Global Depository Receipts (GDRs).

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the current prospectus. As at the date of this prospectus, this may include eligible securities from other countries, to more than a limited extent.

The fund may use derivatives for hedging and efficient portfolio management. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the current prospectus.

US Equity Fund

INVESTMENT OBJECTIVE

The fund's objective is to increase the value of its shares, over the long term, through growth in the value of its investments.

The fund is actively managed and invests mainly in a diversified portfolio of shares of companies in the United States.

The fund invests primarily in equity and equity-related securities of companies that are either incorporated in the United States of America or conduct most of their business there and that have a market capitalisation equal to or greater than the companies in the Russell 1000 Index. Types of securities may include common shares, preferred shares, warrants, American Depository Receipts (ADRs), European Depository Receipts (EDRs) and Global Depository Receipts (GDRs).

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the current prospectus. As at the date of this prospectus, this may include eligible securities from other countries, to more than a limited extent.

The fund may use derivatives for hedging and efficient portfolio management. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the current prospectus.

US Large Cap Growth Equity Fund

INVESTMENT OBJECTIVE

The fund's objective is to increase the value of its shares, over the long term, through growth in the value of its investments.

The fund is actively managed and invests mainly in a diversified portfolio of shares from large capitalisation companies in the United States that have the potential for above-average and sustainable rates of earnings growth. The fund invests primarily in equity and equity-related securities of companies that are either incorporated in the United States of America or conduct most of their business there and that have a market capitalisation equal to or greater than the companies in the Russell 1000 Index. Types of securities may include common shares, preferred shares, warrants, American Depositary Receipts (ADRs), European Depositary Receipts (EDRs) and Global Depositary Receipts (GDRs).

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the current prospectus. The fund may invest in eligible securities from other countries, to more than a limited extent.

The fund may use derivatives for hedging and efficient portfolio management. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the current prospectus.

US Large Cap Value Equity Fund

INVESTMENT OBJECTIVE

The fund's objective is to increase the value of its shares, over the long term, through growth in the value of its investments.

The fund is actively managed and invests mainly in a diversified portfolio of shares from large capitalisation companies in the United States that are selling at discounted valuations relative to their historical average and/or the average of their industries.

The fund invests primarily in equity and equity-related securities of companies that are either incorporated in the United States of America or conduct most of their business there and that have a market capitalisation equal to or greater than the companies in the Russell 1000 Index. Types of securities may include common shares, preferred shares, warrants, American Depositary Receipts (ADRs), European Depositary Receipts (EDRs) and Global Depositary Receipts (GDRs).

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the current prospectus. As at the date of the current prospectus, this may include real estate investment trusts (REITs) or eligible securities from other countries, to more than a limited extent.

The fund may use derivatives for hedging and efficient portfolio management. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the current prospectus.

US Select Value Equity Fund

INVESTMENT OBJECTIVE

To increase the value of its shares, over the long term, through growth in the value of its investments.

The fund is actively managed and invests mainly in a high conviction portfolio of shares of companies in the United States that are selling at discounted valuations relative to their historical average and/or the average of their industries.

The fund invests primarily in equity and equity-related securities of companies that are either incorporated in the United States of America or conduct most of their business there. Types of securities may include common shares, preferred shares, warrants, closed-ended real estate investment trusts (REITs), American Depositary Receipts (ADRs), European Depositary Receipts (EDRs) and Global Depositary Receipts (GDRs).

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the current prospectus. As at the date of the current prospectus, this may include eligible securities from other countries, to more than a limited extent.

The fund may use derivatives for hedging and efficient portfolio management. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the current prospectus.

US Smaller Companies Equity Fund

INVESTMENT OBJECTIVE

The fund's objective is to increase the value of its shares, over the long term, through growth in the value of its investments.

The fund is actively managed and invests mainly in a widely diversified portfolio of shares from smaller capitalisation companies in the United States.

The fund invests primarily in equity and equity-related securities of companies that are either incorporated in the United States of America or conduct most of their business there and that, at the time of purchase, have a market capitalisation that is equal to or smaller than the companies in the Russell 2500 Index. Types of securities may include common shares, preferred shares, warrants, American Depository Receipts (ADRs), European Depository Receipts (EDRs) and Global Depository Receipts (GDRs).

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the current prospectus. As at the date of the current prospectus, this may include real estate investment trusts (REITs) or eligible securities from other countries, to more than a limited extent.

The fund may use derivatives for hedging and efficient portfolio management. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the current prospectus.

Global Allocation Extended Fund

INVESTMENT OBJECTIVE

The fund's objective is to maximise the value of its shares, over the long term, through both growth in the value of, and income from, its investments.

The fund is actively managed and invests mainly in a diversified portfolio of bonds, shares and other investments, from issuers around the world, including emerging markets.

The fund invests primarily in equity and equity related securities of companies as well as a wide range of debt securities of issuers across sectors and credit quality. Portfolio debt securities can include fixed and floating rate bonds, convertible bonds (including, to a limited extent, contingent convertible bonds), warrants and other transferable debt securities of any type, including high yield securities and, to a limited extent, distressed and defaulted bonds. The fund may also make investments in collective investment schemes that pursue absolute return strategies and seek to generate returns that are positive in all market conditions and demonstrate a low correlation with equity and bond markets. The fund may invest up to 20% of net assets in asset-backed securities (ABS) and mortgage-backed securities (MBS), and more than 10% of net assets in other collective investment schemes.

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the current prospectus. However, as at the date of the current prospectus, the fund does not expect to invest in any other eligible securities, on an ancillary basis, to more than a limited extent.

The fund may use derivatives for hedging, efficient portfolio management and investment purposes. The fund may also use derivatives to create synthetic short positions in currencies, debt securities and equities. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the current prospectus.

Global Allocation Fund

INVESTMENT OBJECTIVE

The fund's objective is to maximise the value of its shares, over the long term, through both growth in the value of, and income from, its investments.

The fund is actively managed and invests mainly in a diversified portfolio of bonds, shares and other investments from issuers around the world, including emerging markets.

The fund invests primarily in equity and equity related securities of companies as well as a wide range of debt securities of issuers across sectors and credit quality. Portfolio debt securities can include fixed and floating rate bonds, convertible bonds (including, to a limited extent, contingent convertible bonds), warrants and other transferable debt securities of any type, including high yield securities and, to a limited extent, distressed and defaulted bonds. The fund may invest up to 20% of net assets in asset-backed securities (ABS) and mortgage-backed securities (MBS).

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the current prospectus. However, as at the date of the current prospectus, the fund does not expect to invest in any other eligible securities, on an ancillary basis, to more than a limited extent.

The fund may use derivatives for hedging, efficient portfolio management and investment purposes. The fund may also use derivatives to create synthetic short positions in currencies and debt securities. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the current prospectus.

Multi-Asset Global Income Fund

INVESTMENT OBJECTIVE

The fund's objective is to provide income and long term capital appreciation through investment in a portfolio of income generating global securities.

Employing a flexible asset allocation approach, the fund is actively managed and invests mainly in a diversified portfolio of income generating equities, bonds and money market securities, from issuers around the world, including emerging markets.

The fund invests primarily in equity and equity related securities of companies including American Depository Receipts (ADRs), European Depository Receipts (EDRs) and Global Depository Receipts (GDRs), as well as in a wide range of debt securities of issuers across sectors and credit quality. Asset allocation across security types is flexible and may change depending upon market conditions. Portfolio debt securities can include fixed and floating rate bonds, inflation-linked bonds, warrants and other transferable debt securities of any type, including high yield securities. Under most market conditions, the average credit quality of the debt securities within the portfolio will be of investment grade (i.e. BBB or higher credit rating as rated by Standard & Poor's or equivalent). However, on occasion, the investment manager may pursue opportunities to invest in debt securities such that the average credit quality of the debt securities falls below BBB. Investments in debt securities of below investment grade (i.e. BB- or lower credit rating, as rated by Standard & Poor's or equivalent) will not exceed 30% of the fund's net assets. In accordance with its own internal rating system, the investment manager will ensure that the unrated debt securities in which the fund invests are of the same quality as the rated securities of the same type. The fund may invest up to a limit of 20% of net assets in asset-backed securities (ABS) and mortgage-backed securities (MBS), up to a limit of 10% of net assets in convertible bonds (including contingent convertible bonds) as well as up to a limit of 10% of net assets in distressed or defaulted bonds.

The fund will limit investment in other collective investment schemes to 5% of net assets.

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the current prospectus. However, as at the date of the current prospectus, the fund does

not expect to invest in any other eligible securities, on an ancillary basis, to more than a limited extent.

The fund may use derivatives for hedging, efficient portfolio management and investment purposes. The fund may also use derivatives to create synthetic short positions in currencies, debt securities, credit indices and equities. The fund may use total return swaps (TRS) and is expected to do so on a continuous basis. Use of TRS is necessary to implement the investment strategy for shorting equities and the impact is expected to be an increase in risk-adjusted returns. Investors should refer to the "Total Return Swaps" section of the current prospectus for more details of the expected and maximum use of total return swaps by the fund. For a summary of the main types of derivatives that may be used within each fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the current prospectus.

Notes to the Financial Statements

As at 31 December 2021

1. THE COMPANY

T. Rowe Price Funds SICAV (the "Company") is an open-ended investment company organised under the laws of the Grand Duchy of Luxembourg as a Société d'Investissement à Capital Variable ("SICAV") and was authorised under Part I of the Law of 17 December 2010, as amended, relating to Undertakings for Collective Investment. The Company was incorporated on 5 June 2001 and qualifies as an Undertaking for Collective Investment in Transferable Securities ("UCITS").

On 1 October 2014, the Company has appointed T. Rowe Price (Luxembourg) Management S.à r.l. as its management company (the "Management Company"), responsible for management, administration and distribution of the Company.

The Company is structured to provide both institutional and individual investors with a choice of investment portfolios ("Fund(s)") each offering different investment objectives designed to meet specific risk expectations and diversification requirements. During the year ended 31 December 2021, the following Funds had the following share classes launches:

TYPES OF SHARE CLASSES

Within each fund, the SICAV can create and issue share classes with various characteristics and investor eligibility requirements. Each class represents a proportional share of the underlying portfolio of the fund.

Each share class is identified by a basic share class designation (A, I, J, Q, S or Z). Where appropriate, one or more suffixes (each defined below) may be added to indicate certain characteristics. (For instance, "Ih (USD)" would designate Class I shares that are currency hedged and denominated in U.S. dollars.)

BASIC SHARE CLASS DESIGNATIONS

A: Shares available for all investors.

Q: Shares intended for (i) independent investment advisers, (ii) discretionary investment managers, (iii) intermediaries, in each case where the regulatory environment to which they are subject prohibits the receipt and/or retention of retrocessions, (iv) investors having a written, fee based advisory or discretionary arrangement with entities listed in (i), (ii) and (iii), or (v) clients of non-independent advisers with whom they have a written, fee based agreement that prohibits the receipt and/or retention of retrocessions.

I, S, Z, J: Shares available for institutional investors only, as defined on the last page of the prospectus. J, S and Z shares are restricted to investors who have a professional services agreement with the investment manager and/or the management company.

SHARE CLASS SUFFIXES

d: Indicates that the shares are net income distributing shares. Substantially all income earned by the class over the distribution period is distributed after the deduction of fees and expenses charged to the class.

x: Indicates that the shares are gross income distributing shares. Substantially all income earned by the class over the distribution period is distributed prior to the deduction of fees and expenses charged to the class. In effect, fees and expenses will be deducted from capital. While this will increase the amount of income (which may be taxable) available for distribution to holders of the shares, investors should be aware that such charging to capital amounts to a return, or withdrawal, of part of an investor's original investment, or from any capital gains attributable to that original investment, this could erode capital and constrain future growth. Furthermore, where fees and expenses are deducted from capital and gross income is distributed, this may have tax implications for investors, especially those for whom income and capital gains are subject to different treatment and personal tax rates.

Share classes that carry neither a "d" nor an "x" suffix are accumulating shares.

h: Indicates that the shares are 'portfolio hedged'. Such hedging is intended to reduce or eliminate the effects of changes in the exchange rate between the currency exposure(s) of a fund's portfolio and the share class currency. Although the hedging will seek to fully eliminate these effects, it is unlikely that the hedging will eliminate 100% of the difference, because fund cash flows, foreign exchange rates, and market prices are all in constant flux.

b: Indicates that shares are 'benchmark hedged'. Such shares will be hedged, with reference to a relevant index, with the intention to preserve currency exposure taken as part of the investment strategy.

Notes to the Financial Statements continued

As at 31 December 2021

n: Indicates that the shares are 'NAV hedged'. Such shares will be hedged with the intention to reduce or eliminate the effects of changes in the exchange rate between the fund's base currency (not the underlying currency exposures) and the share class currency.

Number: Indicates that the shares are reserved shares. Typically, these shares are limited to investors who have a specific arrangement with the investment manager or the management company permitting access to one or more reserved share classes. Reserved shares have the same characteristics as their corresponding non-reserved shares, except that reserved shares may seek income from additional sources, distribute it more frequently (if they are distributing shares), publish the NAV to more than 2 decimal places and/or the management company may waive more of its fees.

2. SIGNIFICANT ACCOUNTING POLICIES

a) General

These financial statements are prepared in accordance with Luxembourg legal and regulatory requirements relating to investments funds. The financial statements of the Company and each of its Funds are prepared on a going concern basis of accounting, except for European Structured Research Equity Fund which has been closed during the year where the liquidation basis is applied.

The financial statements as at 31 December 2021 are prepared based on the last Net Asset Value ("NAV") as at the current financial year-end, being the one as at 31 December 2021. The last NAV as at the current financial year-end for Middle East & Africa Equity Fund is the one as at 30 December 2021, which is the last business day of the financial year with respect to this Fund.

b) Valuation of Securities

In determining the value of the assets of the Funds, securities which are quoted or dealt in on an official exchange or another regulated market are valued at the latest available sale price, or official closing price for certain markets, on the official exchange or market which is normally the principal market for such securities.

Securities which are not quoted or dealt in on an official exchange or another regulated market, as well as securities which are so quoted or dealt in but for which the last sale price is not available, and securities for which the last sale price is not representative of fair value are valued in good faith by and under the direction of the Board of Directors on the basis of reasonably expected sale prices. Shares/units of investment funds are valued at the latest available published net asset value per shares/units.

c) Securities Transactions and Investment Income

Securities transactions are recorded on a trade date basis. Realised gains and losses are determined on the basis of the average cost of securities sold.

Dividend income is accrued on the ex-dividend date. Interest income and expenses are recorded on the accrual basis. Premiums and discounts on debt securities are amortised in income on a straight-line basis.

d) Cash at Bank and Brokers

Cash at bank includes cash balances in time deposits ranging from overnight to three months in duration with various financial institutions meeting certain credit standards. Cash collateral received is included in the cash at bank in assets but is also recorded as cash due to brokers in liabilities in the Statement of Net Assets. Cash collateral paid/owed to brokers is recorded as part of cash at brokers. Each Fund could experience a delay in recovering the value of these deposits and a possible loss of income or value if the counterparty fails to return deposited amounts. Earnings, net of fees, are accrued daily as bank interest and bank overdraft charges are included in other expenses in the accompanying Statement of Operations and Changes in Net Assets,

cash at broker and cash deposits, which are used as margin accounts or as collateral, may be restricted.

e) Class Accounting and Formation Expenses

Expenses incurred by each Class are charged directly to the Class to which they relate. In particular, the costs and related liabilities and benefits arising from instruments entered into for the purposes of hedging the currency exposure of any particular hedged share class of a Fund is exclusively attributed to that share class. Expenses common to all Classes, investment income and realised and net change in unrealised gains and losses are allocated daily to each Class based on relative net assets.

The costs and expenses incurred in connection with the formation of a new Fund and the initial issuance of shares may be deferred and amortised over a period not exceeding five years against the assets of that Fund and in such amounts in each year as determined by the Board of Directors on an equitable basis.

3. CONVERSION OF FOREIGN CURRENCIES

The books and records of each Fund are kept in the base currency of that Fund. Amounts denominated in other currencies are translated into the base currency on the following basis: (i) investment valuations and other assets and liabilities initially expressed in other currencies are converted each business day into the base currency using currency prevailing on each such business day, and (ii) purchases and sales of foreign investments, income and expenses are converted into the base currency using currency exchange rates prevailing on the respective dates of such transactions.

Net realised gains and losses on foreign currency transactions represent:

(i) foreign exchange gains and losses from the holding and sale of foreign currencies, (ii) gains and losses between trade date and settlement date on securities transactions, and (iii) gains and losses arising from the difference between amounts of dividends and interest recorded and the amounts actually received. The Funds do not isolate that portion of the results of operations resulting from changes in foreign exchange rates on investments from the fluctuations arising from changes in market prices of investments held during the year.

The reference currency of the Company's combined statements is the US dollar ("USD"). For those Funds and Share Classes that are denominated in a base currency other than USD, financial statement items are translated on the following basis: (i) assets and liabilities are converted at currency exchange rates prevailing on the date of the financial statements, and (ii) balances in the Statement of Operations and Changes in Net Assets are converted at the average currency exchange rate for the year. Exchange rates, expressed as 1 USD equivalent, used in such translations are as follows:

Currency USD = 1	Rate
AUD	1.3771
BRL	5.5703
CAD	1.2694
CHF	0.9138
EUR	0.8815
GBP	0.7399
HKD	7.7986
JPY	115.0830
NOK	8.8322
SEK	9.0718
SGD	1.3487

Notes to the Financial Statements continued

As at 31 December 2021

4. INVESTMENT TRANSACTIONS

a) Derivatives

Each Fund may enter into forward currency exchange, financial futures, option and swap contracts which, except for purchased options, represent market risk in excess of the amount reflected in the Statement of Net Assets. The amount of the contracts represents the extent of each Fund's participation in these financial instruments. Forward currency exchange and financial futures contracts are valued daily using prevailing forward exchange rates and current settlement prices, respectively. Option and swap contracts are valued daily using an independent pricing service. Changes in contract value are recorded daily as unrealised gains or losses until termination or maturity. Realized gains or losses are recorded on termination of derivatives contracts. Net periodic receipts or payments required by swap contracts are accrued daily as interest income or interest expense on swaps.

Market risks associated with such contracts arise due to the possible movements in foreign exchange rates, interest rates, credit quality, indices and security values underlying these instruments. Other market and credit risks include the possibility that there may be an illiquid market for the contracts, that a change in the value of the contracts may not directly correlate with changes in the value of currencies, indices, or securities being hedged or that the counterparty to a contract defaults on its obligation to perform under the terms of the contract. Open contracts attributable to all classes of a Fund, if applicable, are reflected in each Fund's Schedule of Investments.

The Funds may deposit cash into an account held at the broker in order to meet initial margin requirements on open future contracts and funds to settle future variation margin liabilities. The deposits held at the broker are included in Deposits on financial future contracts in the Statement of Net Assets.

Hedged Share Classes are intended to reduce a Shareholder's currency exposure to those net assets attributable to the specific Hedged Share Class that are not denominated in that specific hedge open share class currency. As at 31 December 2021, the unrealised gain (loss) on forward currency exchange contracts reflected in the Statement of Net Assets includes contracts attributable to Hedged Shares. Detail of forward currency exchange contracts is also disclosed in the Schedule of Investments.

b) China A shares

Funds of the Company may invest in certain Chinese equity securities (A shares) that have limited availability to investors outside of China. The Fund gains access to the A share market through the Shanghai-Hong Kong Stock Connect program (Shanghai Stock Connect), through the Shenzhen-Hong Kong Stock Connect program (Shenzhen Stock Connect), or through a wholly owned subsidiary of Price Associates, which serves as the registered Qualified Foreign Institutional Investor (QFII) for all participating T. Rowe Price-sponsored products (each a participating account). Related to A shares held through the QFII, investment decisions are specific to each participating account, and each account bears the economic consequences of its holdings and transactions in A shares. Further, the Fund's ability to repatriate cash associated with its A shares held through the QFII is subject to certain restrictions and administrative processes involving the Chinese government; consequently, the Fund may experience substantial delays in gaining access to its assets or incur a loss of value in the event of noncompliance with governmental requirements. A shares acquired through the QFII are valued using the onshore renminbi exchange rate (CNY), and those acquired through the Shanghai Stock Connect and the Shenzhen Stock Connect are valued using the offshore renminbi exchange rate (CNH). CNY and CNH exchange rates may differ; accordingly, A shares of the same issue purchased through different channels may not have the same value. Generally, the Funds are not subject to capital gains tax related to their A share investments.

c) TBA Purchase Commitments

Certain Funds may enter into to be announced ("TBA") purchase commitments, pursuant to which they agreed to purchase mortgage-backed securities for a fixed unit price, with payment and delivery at a scheduled future date beyond the customary settlement period for such mortgage-backed securities. With TBA transactions, the particular securities to be delivered are not identified at the trade date; however, delivered securities must meet specified terms, including issuer, rate and mortgage term, and be within industry-accepted "good delivery" standards. The Funds generally enter into TBA transactions with the intention of taking possession of the underlying mortgage securities. Until settlement, the Funds maintain cash reserves and liquid assets sufficient to settle its TBA commitments.

5. DIVIDENDS

The Company intends to declare and distribute dividends representing substantially all of the net investment income attributable to Distributing Shares. Dividends in respect of these Shares will be declared in the currency of denomination of the relevant Class and will be recorded on ex-date. Interim dividends in respect of the Distributing Shares of any particular Fund may be paid from the attributable net investment income and realised capital gains with a frequency and at such intervals as the Board of Directors may decide.

The following dividend payments were made during the year ended 31 December 2021:

⁽⁸⁾ Fund renamed from US Aggregate Bond Fund effective 02 November 2021.

⁽⁹⁾ Fund renamed from European Smaller Companies Equity Fund effective 02 November 2021.

* Share class was launched during the year.

** Share class was closed during the year.

6. DEPOSITARY FEES

The Funds are subject to an annual depositary fee, based upon a reducing scale, from 0.017% to 0.0005% depending upon the value of the assets held in depositary. This fee is calculated and accrued each business day and paid monthly in arrears.

7. ADMINISTRATION AND TRANSFER AGENCY FEES

The Funds are subject to an annual administration fee, based upon a reducing scale, from 0.07% to 0.01% depending upon the value of the Company's net assets. Each Fund is, however, subject to a minimum annual administration fee of USD 40,000. This fee is calculated and accrued each business day and paid monthly. Transfer Agency Fees are based on the number of transactions processed, number of holdings and include but are not limited to fund/class set-up and annual maintenance fee, and out-of-pocket expenses.

8. TAXATION

Under current law and practice, the Company is not liable for any Luxembourg income tax, nor are dividends paid by the Company subject to any Luxembourg withholding tax. Additionally, no Luxembourg tax is payable on the realised or unrealised capital appreciation of the assets of the Company.

a) Taxe d'Abonnement

For the year ended 31 December 2021, the Funds are subject to a tax ("Taxe d'Abonnement") of 0.05% per annum in respect to Class A and Q Shares ("Advisers Classes") and 0.01% per annum in respect to Class I, J, S and Z Shares ("Institutional Classes"), as provided by the relevant Luxembourg laws. The Taxe d'Abonnement is payable quarterly on the basis of the value of the net assets of each class at the end of the relevant calendar quarter.

b) Provision for Foreign Taxes

Each Fund is subject to foreign income taxes imposed by certain countries in which it invests. Taxes attributable to income are accrued by each Fund as a reduction of income. Capital gains realised by a Fund upon disposition of securities issued in or by certain foreign countries are subject to capital gains tax imposed by those countries. All taxes are computed in accordance with the applicable foreign tax law, and, to the extent permitted, capital losses are used to offset capital gains. To the extent that tax rates vary based upon holding period, each Fund accrues a deferred tax liability using the minimum applicable tax rate.

Current and deferred tax expenses attributable to net capital gains are reflected net of eligible refunds (as a component of realised and/or change in unrealised, respectively gain (loss) from investments. For the year ended 31 December 2021, there were current or deferred tax expense amounts attributable to realised or unrealised Indian capital gains as presented in the Statement of Operations and Changes in Net Assets for the below funds.

Asian Opportunities Equity Fund	USD	112,858
Emerging Markets Discovery Equity Fund	USD	366,853
Emerging Markets Equity Fund	USD	3,415,134
Global Focused Growth Equity Fund	USD	2,229,562
Global Growth Equity Fund	USD	1,027,993
Responsible Asian ex-Japan Equity Fund	USD	1,101,824

The capital loss carry forwards would be eligible to be off set against the realised gains for a period of 8 years from the year when the loss was first incurred.

As at 31 December 2021, none of the Funds have the capital loss carry forwards to offset future realised gains on Indian securities subject to Indian capital gain taxes.

9. RELATED PARTY TRANSACTIONS

a) Management Company Fee

The Funds are managed by T. Rowe Price (Luxembourg) Management S.à r.l. (the "Management Company"). The Management Company is entitled to receive from the Company a Management Company Fee. The Management Company pays the Investment Manager out of the Management Company Fee. This fee is payable monthly in arrears and calculated on the daily net assets of each Fund at the following maximum annual rates:

⁽⁸⁾ Fund renamed from Global Investment Grade Corporate Bond Fund effective 02 November 2021.

⁽⁹⁾ Fund renamed from US Aggregate Bond Fund effective 02 November 2021.

⁽¹⁰⁾ Fund renamed from US Investment Grade Corporate Bond Fund effective 02 November 2021.

⁽¹¹⁾ This Fund was launched on 19 January 2021.

⁽¹²⁾ This Fund was launched on 08 October 2021.

⁽¹³⁾ Fund renamed from European Select Equity Fund effective 02 November 2021.

⁽¹⁴⁾ Fund renamed from European Smaller Companies Equity Fund effective 02 November 2021.

⁽¹⁵⁾ This Fund was launched on 25 October 2021.

^{*} Share Class was launched during the year.

[^] The Total Expense Ratio expresses the total fees and expenses borne by a particular Class, net of any expenses waived, during the year ended 31 December 2021 as a percentage of the average net assets of that Class.

^{^^} The expense limit disclosed in the annual report includes the effective management fees and the maximum of operating and administrative expenses. Expense limit not applicable for classes J due to a different fee arrangement.

c) Related Party Shareholder

The Investment Manager or its affiliates may invest in a new Fund for the purpose of providing seed capital ("Direct Investment"), with the intent of remaining invested until the Fund has substantial net assets. Additionally, other Funds and accounts managed by the Investment Manager or its affiliates may invest in the Funds ("Affiliated Accounts"). However, no affiliated party may invest for the purpose of exercising management or control over any Fund or the Company.

As at 31 December 2021, the following Funds had a percentage of their net assets expressed in U.S. Dollars held by the Investment Manager or its affiliates.

Fund Name	Percentage
Dynamic Credit Fund	98%
Dynamic Emerging Markets Bond Fund	100%
Dynamic Global Investment Grade Bond Fund	1%

⁽⁵⁾ Fund renamed from US Aggregate Bond Fund effective 02 November 2021.

12. SWING PRICING (DILUTION ADJUSTMENT)

Swing pricing is intended to protect the interests of all shareholders by mitigating the negative impact of dilution on the fund's returns.

The actual total cost of purchasing or selling the underlying securities in a fund may be higher or lower than the mid-market value used in calculating the NAV. The difference can be attributed to a variety of factors including dealing charges, commissions, taxes and dealing spreads as well as other market and trading considerations and can, over time, have a materially disadvantageous effect on a shareholder's interest in a fund if not otherwise accounted for in the calculation of the NAV.

To prevent this effect, known as "dilution", on business days when the amount of trading in a fund's shares will precipitate significant purchases or sales of underlying securities, we will adjust the fund's NAV by an amount estimated to more closely reflect the actual prices and costs of the underlying transactions. This is often referred to as "swing pricing". These adjustment amounts, called swing factors, can vary with market conditions and transaction volumes and this means that the amount of dilution adjustment applied can change at any time.

Ordinarily, we apply the swing pricing process on a systematic basis across all funds. However, we periodically review the principles on which the process is based, including the operational application, the net subscription / redemption related trigger points and the swing factor calculation methodology.

It is not possible to predict accurately whether a price swing will occur at any point in time. In general, the NAV per share applied to all subscription and redemption requests, in the relevant fund on that day, will be adjusted upward when we consider that the demand to buy fund shares is material and downward when we consider that the demand to redeem fund shares is material.

Typically, on any business day, any adjustment is limited to a maximum of 2% of a fund's NAV except in the case of the Frontier Markets Equity Fund for which the maximum adjustment is 4% of the fund's NAV. However, in the event of extreme or exceptional market conditions and on a temporary basis, it may be necessary for any swing factor to be set at a level which exceeds this maximum. We review these estimates on a regular basis and they can change at any time. As at 31 December 2021, there was no swing factor applied to any of the Funds.

13. TRANSACTION COSTS

The transaction costs are costs incurred by the Funds in connection with transactions on securities and derivatives instruments. They consist of commissions and taxes relating to these transactions.

For the year ended 31 December 2021, the amounts are as follows:

Fund	Fund Currency	Total transaction costs
Dynamic Credit Fund	USD	10,980
Dynamic Emerging Markets Bond Fund	USD	143
Dynamic Global Bond Fund	USD	291,208
Dynamic Global Investment Grade Bond Fund	USD	6,111

⁽⁹⁾ Fund renamed from US Aggregate Bond Fund effective 02 November 2021.

⁽¹⁰⁾ Fund renamed from US Investment Grade Corporate Bond Fund effective 02 November 2021.

⁽¹¹⁾ This Fund was launched on 19 January 2021.

⁽¹²⁾ Fund liquidated operations on 31 March 2021.

⁽¹³⁾ This Fund was launched on 08 October 2021.

⁽¹⁴⁾ Fund renamed from European Select Equity Fund effective 02 November 2021.

⁽¹⁵⁾ Fund renamed from European Smaller Companies Equity Fund effective 02 November 2021.

⁽¹⁶⁾ This Fund was launched on 25 October 2021.

There are no brokerage fees charged separately for transactions on fixed income instruments and derivatives (except for futures). The transaction costs are included in the transaction price, which is known as "marked up".

PERFORMANCE DISCLOSURE

Past performance is not indicative of current or future performance. Investment in the Shares of the Funds is subject to risks, including possible loss of principal amount invested. Performance data provided for the Funds is based on the base currency of denomination of the relevant Fund shares (unless otherwise noted) and include changes in principal value and reinvested dividends but does not take into account any commissions and costs incurred on the issue and redemption of Fund shares. For performance calculation purposes, securities are valued using prices as of the close of each primary market on 31 December 2021, except for Middle East & Africa Equity Fund for which prices as of the close of market on 30 December 2021 are used, as Fridays are not an ordinary business day for this fund.

The Management Company fees and administration agent fees attributable to Class J Shares, Management Company fees to the Class S Shares and Management Company fees to Class Z Shares are not charged directly to the Share Classes. Therefore, performance of those Shares is shown gross of such charges. Investors should understand that returns would be reduced by such charges if they were, Class J, S and Z Shares are available for an initial purchase of 10 million, 10 million and 25 million in base currency, respectively, and are only available to institutional investors having a professional services arrangement with the Investment Manager. For availability of other Classes of Shares and their respective fees and expenses, please refer to the Prospectus or contact the Funds' Distributor.

14. CREDIT FACILITY

As from October 2021, the Funds, together with the other investment funds managed by the Management Company and certain other T.Rowe Price U.S. registered funds, are party to a \$1 billion, 364-day syndicated credit facility (the "facility"). Excluding commitments designated for the foreign investment Funds, the Funds can borrow up to an aggregate commitment amount of \$150 million on a first-come, first-served basis. The facility provides a source of liquidity to the participating funds for temporary and emergency purposes.

During the year ended 31 December 2021, the Funds have not used the facility and therefore have no borrowing outstanding under the facility as at 31 December 2021.

15. SUBSEQUENT EVENTS

In February 2022, Russian forces entered Ukraine and commenced an armed conflict. Economic sanctions have since been imposed on Russia and certain of its citizens, including the exclusion of Russia from the SWIFT global payments network. As a result, Russia's central bank closed the country's stock market on 28 February 2022, and Russian-related stocks and debt and the Russian ruble have since suffered significant declines in value. In addition, this armed conflict and the related sanctions may cause significant disruptions to global business activity and volatility in global financial markets resulting in increased operational risk, as well as valuation, liquidity and market risk for securities issued by Ukraine, Belarus and Russia, and to a certain extent, most global markets. As of the date of this report, the resolution of this event, and the potential impact on the funds, continues to be uncertain. The Board is closely monitoring the situation with respect to all securities held in our funds and to the increased operational risk. The duration of the conflict and related economic sanctions and their effects on the financial markets cannot be determined with certainty. Market disruptions associated with current geopolitical events could adversely affect performance.

⁽¹⁶⁾ This Fund was launched on 25 October 2021.

* Returns for the T. Rowe Price Funds SICAV are presented for the period since inception for those classes with operations less than one year.

Appendix 2: Risk Measurement and Global Exposure Appendix (unaudited)

The global exposure is calculated for all Funds regardless of their investment strategies. The methods used to measure the global exposure are the commitment approach or the (absolute or relative) VaR approach according to the CSSF Circular 11/512. The commitment approach is used by all of the equity Funds. The Funds in the table hereafter use the VaR approach.

Funds	Global Exposure Methodology	Level of Leverage % (Av)	Relative VaR ratio / Absolute VaR %			Reference Portfolio
			Lowest	Highest	Average	
Dynamic Credit Fund	Absolute VaR	183%	0.02	0.06	0.04	N/A

Further Information (unaudited)

STATEMENT OF CHANGES IN PORTFOLIO

A statement giving the changes in the portfolio of investments for the year ended 31 December 2021 can be obtained free of charge from the registered office of the Company. Additional information regarding the portfolio of each Fund may be requested from the registered office of the Company.

DEALING COMMISSIONS AND INVESTMENT RESEARCH

In choosing broker-dealers to execute trades involving portfolio securities, the investment manager and the Company have fiduciary and regulatory requirements to seek broker-dealers that offer "best execution".

Because price is not the only factor to be assessed when determining which firm offers "best execution", the investment manager may choose a broker-dealer who charges a higher commission on trades if the investment manager determines, in good faith, that the commission paid is reasonable in relation to the value of the brokerage services provided.

The investment manager and investment sub-managers may acquire equity and fixed income research designed to assist in the investment decision-making process from independent providers and broker-dealers (i.e. "third party research").

Third party research utilised by the equity and fixed income investment staff of the investment manager and investment sub-managers will be borne by the investment manager or the relevant investment sub-manager. The Funds will not pay for third party research.

No soft commissions / soft dollars were paid by the Funds for the year ended 31 December 2021.

GENERAL INFORMATION

The Company's articles of incorporation ("Articles of Incorporation") may be amended from time to time by a meeting of Shareholders, subject to the quorum and majority requirements as provided for by Luxembourg law. Any amendment thereto shall be published in the *Recueil électronique des sociétés et associations*, in a Luxembourg daily newspaper and, if necessary, in the official publications specified for the respective countries in which Company shares are sold. Such amendments become legally binding on all Shareholders, following their approval by the General Meeting of Shareholders.

Any amendments affecting the rights of the holders of shares of any Class vis-à-vis those of any other Class shall be subject further to the said quorum and majority requirements in respect of each relevant Class.

The Company is a single legal entity. However, each Fund is regarded as being separate from the others and is liable for all of its own obligations, unless other terms have been specifically agreed with its creditors.

The Annual General Meeting of Shareholders of the Company will be held each year in accordance with Luxembourg law, in the commune of Niederanven in the Grand-Duchy of Luxembourg at the registered office of the Company, or at such other place in the Grand-Duchy of Luxembourg as may be specified in the notice of meeting, within six months of the Company's accounting year end. The annual general meeting may be held abroad if, in the absolute and final judgement of the Board, exceptional circumstances so require.

Notices of all Annual General Meetings are sent by mail to all registered Shareholders at their registered address at least eight days prior to each such meeting, and notices of all extraordinary general meetings at least 21 days prior to each such meeting. Such notice will indicate the time and place of such meeting and the conditions of admission thereto, will contain the agenda and will refer to the requirements of Luxembourg law with regard to the

necessary quorum and majorities at such meeting. To the extent required by Luxembourg law, further notices will be published in the *Recueil électronique des sociétés et associations* and in one Luxembourg newspaper.

The annual report, containing the audited combined financial accounts of the Company expressed in US dollars and of each Fund expressed in the relevant currency of denomination, with respect to the preceding financial year will be made available at troweprice.com and at the registered office within four months of the end of the financial year.

Unaudited semi-annual reports will also be sent, on demand, to Shareholders whose names appear in the register and will be made available at the Company's registered office within two months of the end of the year to which they relate.

The list of countries where the Company has regulatory approvals to market its Funds to institutional and / or retail clients can be obtained from www.troweprice.lu/luxfundregistrations.

Copies of the Company's latest Prospectus, Key Investor Information Document, Application Form, Articles of Incorporation and the latest annual and (where applicable) semi-annual reports may be obtained free of charge from the offices of the Administrator or the Distributor. Furthermore, the Company's latest Prospectus, Key Investor Information Document, Application Form, Articles of Incorporation and the latest annual and (where applicable) semi-annual reports may be downloaded from the Distributor's website at www.troweprice.com, where the daily issue and redemption prices are also published.

KIID is available to the investors at www.trpfundssicavkiid.com.

Brexit Financial Impact:

The Company applied for the Temporary Permission Regime, allowing UCITS and AIFs with a passport to continue temporarily marketing in the United Kingdom.

Additional Information on the Management Company:

The Management Company has committed to adhere to the Association of the Luxembourg Fund Industry (ALFI) Code of Conduct for Luxembourg Investment Funds. The purpose of the ALFI Code of Conduct is to provide persons responsible for the management and supervision of a Fund with a framework of high-level principles and best practice recommendations for the governance of Luxembourg investment funds.

Additional Information for Investors in the Federal Republic of Germany:

REPRESENTATIVE AND PAYING AGENT

JP Morgan AG
Junghofstraße 14
60311 Frankfurt am Main, Germany

1. The Company has appointed the above party as paying and information agent in the Federal Republic of Germany (the "German Paying and Information Agent").
2. Requests for the transfer, redemption and conversion of shares can be filed at the German Paying and Information Agent. Redemption proceeds, distributions or other payments, will be paid to the shareholder, in Euro, through the German Paying and Information Agent, on request.
3. The current Prospectus, the key investor information document for each fund, the articles of incorporation of the Company, as well as, the semi-annual and annual reports, are obtainable from the German Paying and Information Agent, free of charge in hard copy. Further information, as required under applicable law, including the documents listed in "Notices and Publications", under "The Company", in the current prospectus, is also available to shareholders or potential investors, free of charge. Notices to shareholders will be communicated by mail.

Further Information (unaudited) continued

4. The NAV of all funds as well as the purchase, redemption and conversion prices are available free of charge on every bank business day at the German Paying and Information Agent. Any notices to shareholders will be available upon request at the German Paying and Information Agent free of charge. In addition, the subscription, conversion and redemption prices together with the interim profit and total profit value, which are calculated for the holders of the foreign investment shares after 31st December 1993, are published on every day the stock exchange is open on the website "www.fundinfo.com".
5. In addition, shareholders in the Federal Republic of Germany will be informed by an additional publication on the Company's website troweprice.com/institutional in any of the following cases:
- suspension of the redemption of shares
 - termination of the management of the fund or its liquidation
 - any amendments to the articles of incorporation that are inconsistent with the previous investment principles, that affect material shareholder rights or that relate to remuneration and reimbursement of expenses that may be paid or made out of the asset pool
 - merger of the fund with one or more other funds
 - the change of the fund into a feeder fund or the modification to a master fund.

PUBLICATIONS

The net asset value together with the reference stating "excluding commissions" shall be published daily on the fundinfo.com website.

PLACE OF PERFORMANCE AND PLACE OF JURISDICTION

In respect of the shares distributed in and from Switzerland, the place of performance and jurisdiction is the registered office of the Representative.

PAYMENT OF RETROCESSIONS AND REBATES

The management company does not pay retrocessions. The investment manager may, at its own initiative and expense, make retrocession payments to intermediaries and platforms, including its affiliates. Such payments may be made as remuneration for distribution activity in respect of fund shares in and from Switzerland. Distribution is understood in particular as being any activity aimed at promoting the distribution of fund shares, such as the issuing of marketing materials, training of distribution staff, the organising of events etc.

The recipients of the retrocessions must ensure transparent disclosure and inform investors, unsolicited and free of charge, about the amount of remuneration they may receive for distribution. Retrocessions are not deemed to be rebates even if they are ultimately passed on, in full or in part, to the investors.

On request, the recipients of retrocessions must disclose the amounts they actually receive for distributing the collective investment schemes of the investors concerned.

In the case of distribution activity in or from Switzerland, the investment manager may, upon request, pay rebates directly to investors. The purpose of rebates is to reduce the fees or costs incurred by the investor in question. Rebates are permitted provided that:

- they are paid from fees received by the investment manager and therefore do not represent an additional charge on the fund assets; and
- they are granted on the basis of terms set out in a written agreement entered into between the investor and the investment manager.
- all investors who meet these objective criteria and demand rebates are also granted these within the same timeframe and to the same extent.

The objective criteria for the granting of rebates by the Management Company are as follows:

- Agree to the terms and conditions set out in a written agreement to be entered into between the investor and the investment manager.
- Amount invested
- Investment behaviour shown by the investor
- Investment period
- Share class purchased

At the request of the investor, the Investment Manager must disclose the amounts of such rebates free of charge.

The portfolio turnover ratios, the total expense ratio and the performance summary disclosed in the financial statements notes have been calculated in accordance with the Swiss Funds & Asset Management Association Guidelines.

Additional Information for Investors in Hong Kong:

REPRESENTATIVE AGENT:

T. Rowe Price Hong Kong Limited
6/F, Chater House, 8 Connaught Road
Central, Hong Kong

Information about Remuneration:

As required by the law of 17 December 2010 relating to Undertakings for Collective Investment, as amended, (the "Law of 2010") the Management Company shall provide general information relating to the financial and nonfinancial criteria of the remuneration policies and practices for relevant categories of staff to enable investors to assess the incentives created. In accordance with the principles set out in art. 111bis and 111ter of the Law of 2010, the Management Company shall disclose at least the information necessary to provide an understanding of the risk profile of the Company and the measures it adopts to avoid or manage conflicts of interest. As such, the Management Company has established a Remuneration Policy Statement (RPS) setting out policies, practices and procedures to comply with the Law of 2010.

The RPS is designed to reward individuals who contribute to the long-term value creation for all clients and investors. The Management Company seeks to accomplish this through a balance of short-term fixed and variable compensations, and long-term equity-based incentives. Further, the RPS is intended to be consistent with, and promotes sound and effective risk management and does not encourage risk-taking that is inconsistent with the risk profile, rules or governing documents of the funds managed. The Board of the Management Company reviews the RPS annually to ensure remuneration practices are consistent with the firm's risk profile. The RPS is available on request to all investors in the funds the Management Company manages.

Further Information (unaudited) continued

The Management Company has paid the following amounts to its identified staff, as defined in the Law of 2010, for the year ended 31 December 2021. As required by Article 151(3) a) and b) of the Law of 2010, the aggregate amount of remuneration is to be broken down by a) fixed and variable amounts and b) senior management and non-senior management identified staff of the Management Company whose actions have a material impact on the risk profile of the funds.

However, the Management Company's compensation systems do not allow for such amounts to be identified per fund managed. Therefore, the figures show the total remuneration of the staff of the Management Company and the relevant delegates fully or partly involved in the activities of the funds the Management Company manages and which is attributable to such activities are:

- Number of identified staff is 54.
- Total gross amount of the remuneration of the identified staff fully or partly involved in the activities of the funds the Management Company manages (including the Company) which is attributable to such activities is EUR 30,229,488.

(a) Aggregate amount of senior management is EUR 1,145,182.

- Including a fixed compensation of EUR 412,700 and
- A short-term variable compensation of EUR 518,757 and a long-term variable compensation of EUR 213,724.

(b) Aggregate amount of non-senior management having a material impact on the risk profile of the Company is EUR 29,084,306.

- Including a fixed compensation of EUR 4,580,379 and
- A short-term variable compensation of EUR 15,400,450 and a long-term variable compensation of EUR 9,103,477.

(c) Combined is EUR 30,229,488.

- Including a fixed compensation of EUR 4,993,079 and
- A short-term variable compensation of EUR 15,919,208 and a long-term variable compensation of EUR 9,317,201.

Securities Financing Transactions Regulation (unaudited)

The Company engages in Securities Financing Transactions (as defined in Article 3 of Regulation (EU) 2015/2365, securities financing transactions include repurchase transactions, securities or commodities lending and securities or commodities borrowing, buy-sell back transactions or sell-buy back transactions and margin lending transactions). In accordance with Article 13 of the Regulation, the Company's only involvement in exposures related to securities financing transactions is its engagement on Total Return Swaps for the year ended 31 December 2021 as detailed below:

TOTAL RETURN SWAPS

GLOBAL DATA

Amount of assets engaged in Total Return Swaps

The following table represents the total value engaged in Total Return Swaps as at the reporting date:

Fund Name	Fund Currency	Unrealised Gain and Loss in Fund Currency (in absolute value)	% of Total Net Asset Value
Dynamic Credit Fund	USD	58,479	0.21
Dynamic Global Bond Fund	USD	313,916	0.02

CONCENTRATION DATA

Ten largest collateral issuers

There are no collaterals received in respect of total return swap contracts. Therefore the ten largest collateral issuers disclosure is not applicable.

Top ten counterparties

The following table provides details of the top ten counterparties (based on gross volume of outstanding transactions) in respect of the total return swaps as at the reporting date. It also includes all counterparties in respect of the total return swaps at the reporting date.

Counterparties	Incorporation Country	Unrealised Gain and Loss in Fund Currency (in absolute value)	
		Dynamic Credit Fund USD	Dynamic Global Bond Fund USD
Goldman Sachs International	United States of America	16,030	-
JPMorgan Chase Bank N.A.	United States of America	-	313,916
Morgan Stanley & Co. International PLC	United States of America	42,449	-

AGGREGATE TRANSACTION DATA

Type, quality and currency of collateral

This disclosure is required for collateral received only where there is a counterparty risk.

At the time of writing, it is not possible to identify the value of cash collateral specific to the different types of OTC derivatives where multiple types of OTC derivatives are traded with the same counterparty. This is a consequence of counterparties calculating and recording cash collateral based on the aggregated position of all OTC derivatives traded between the counterparty and its client. This calculation methodology is compliant with the International Swaps and Derivatives Associations, Inc. Master Agreement ("ISDA Master Agreement") in place and is considered standard market practice within the industry. As a result, it is not practically possible to disclose cash collateral values specific to individual positions held by the Funds in total return swaps.

Any cash collateral disclosures provided below are in respect of all OTC derivative transactions entered into by the Funds under the ISDA Master Agreement, not just total return swaps.

Maturity tenor of total return swaps transactions

The following table provides an analysis of the maturity tenor in respect of the total return swaps as at the reporting date:

Maturity	Unrealised Gain and Loss in Fund Currency (in absolute value)	
	Dynamic Credit Fund USD	Dynamic Global Bond Fund USD
1 day	-	-
2 to 6 days	-	-
1 to 4 weeks	-	-
1 to 3 months	16,030	-
3 to 12 months	-	313,916
more than 1 year	42,449	-

The above maturity tenor analysis has been based on the contractual maturity date.

Country in which counterparties are established

The country in which counterparties are established is disclosed under the section "Top Ten Counterparties".

Settlement and clearing

OTC derivative transactions are entered into by the Funds under an ISDA Master Agreement, a bilateral agreement between the Funds and a counterparty that governs OTC derivative transactions (including total return swaps) entered into by the parties.

RE-USE OF COLLATERAL

Cash collateral received in respect of OTC derivative transactions is not reinvested.

SAFEKEEPING OF COLLATERAL

There are no collaterals received or granted in respect of total return swaps.

RETURN AND COST

All returns from OTC derivative transactions will accrue to the Funds and are not subject to any returns sharing arrangements with the Fund's Manager or any other third parties. Returns from those instruments are disclosed in the statement of operations and changes in net assets.

Sustainable Finance Disclosure Regulation (unaudited)

All funds of T. Rowe Price Funds SICAV are classified as Article 6 or Article 8 under the Sustainable Finance Disclosure Regulation (SFDR), except Global Impact Equity Fund which is classified under Article 9. Further details are provided in the following pages.

Responsible Asia Credit Bond Fund

Performance of Sustainability Indicators

2 November 2021 to 31 December 2021 *

Although the Fund does not have sustainable investment as an objective, the promotion of environmental and social characteristics is achieved through the investment manager's avoidance of sectors or companies, whose activities may be considered harmful to the environment and/or society through the application of its proprietary socially responsible screen (exclusion list).

As a consequence, specific companies whose business activities involve controversial weapons (cluster munitions, anti-personnel mines, incendiary, chemical, biological and nuclear weapons), tobacco production, coal production, assault-style weapons for civilian use, adult entertainment, direct gambling operations and certain conduct-based criteria are excluded.

The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

For further details about the T. Rowe Price Responsible Exclusion list, please refer to the Fund's prospectus.

Sustainability Indicator	Description of Sustainability Indicator	Target Exposure (%)	Actual Exposure (%)	Duration of Exposure
Indicator 1	Holdings in companies involved in the production of controversial weapons (cluster munitions, anti-personnel mines, incendiary, chemical, biological and nuclear weapons). Comments: During the period under review, the fund's holdings were in compliance with the security exclusion objectives as defined in the prospectus.	0.00%	0.00%	–
Indicator 2	Holdings in companies involved in the production or retail of assault-style weapons for civilian use. Comments: During the period under review, the fund's holdings were in compliance with the security exclusion objectives as defined in the prospectus.	0.00%	0.00%	–
Indicator 3	Holdings in companies whose main business activities involve the production of tobacco. Comments: During the period under review, the fund's holdings were in compliance with the security exclusion objectives as defined in the prospectus.	0.00%	0.00%	–
Indicator 4	Holdings in companies that generate >5% of revenues from adult entertainment. Comments: During the period under review, the fund's holdings were in compliance with the security exclusion objectives as defined in the prospectus.	0.00%	0.00%	–
Indicator 5	Holdings in companies that generate >5% of revenues from the production of coal. Comments: During the period under review, the fund's holdings were in compliance with the security exclusion objectives as defined in the prospectus.	0.00%	0.00%	–
Indicator 6	Holdings in companies that generate >5% of revenues from direct gambling operations. Comments: During the period under review, the fund's holdings were in compliance with the security exclusion objectives as defined in the prospectus.	0.00%	0.00%	–
Indicator 7	Holdings in corporate or sovereign issuers that have been involved in an extreme environmental, social, ethical or governance breach and, in the opinion of the investment manager, are not taking adequate steps to remediate the issue. Comments: During the period under review, the fund's holdings were in compliance with the security exclusion objectives as defined in the prospectus.	0.00%	0.00%	–

The Target Exposure (%) is the maximum permitted exposure to the companies described in the Sustainability Indicator.

The Actual Exposure (%) is the average daily exposure to companies described in the Sustainability Indicator during the Duration of Exposure.

The Duration of Exposure is the period of time in days for which the Actual Exposure exceeds the Target Exposure.

*2 November 2021 is the date that the Fund converted to Article 8 under the SFDR Regulations.

The Target Exposure (%) is the maximum permitted exposure to the companies described in the Sustainability Indicator.

The Actual Exposure (%) is the average daily exposure to companies described in the Sustainability Indicator during the Duration of Exposure.

The Duration of Exposure is the period of time in days for which the Actual Exposure exceeds the Target Exposure.

*2 November 2021 is the date that the Fund converted to Article 8 under the SFDR Regulations.

Responsible Euro Corporate Bond Fund

Performance of Sustainability Indicators

2 November 2021 to 31 December 2021 *

Although the Fund does not have sustainable investment as an objective, the promotion of environmental and social characteristics is achieved through the investment manager's avoidance of sectors or companies, whose activities may be considered harmful to the environment and/or society through the application of its proprietary socially responsible screen (exclusion list).

As a consequence, specific companies whose business activities involve controversial weapons (cluster munitions, anti-personnel mines, incendiary, chemical, biological and nuclear weapons), tobacco production, coal production, assault-style weapons for civilian use, adult entertainment, direct gambling operations and certain conduct-based criteria are excluded.

The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

For further details about the T. Rowe Price Responsible Exclusion list, please refer to the Fund's prospectus.

Global Impact Equity Fund Performance of Sustainability Indicators

8 October 2021 to 31 December 2021 *

The Fund’s objective is to have a positive impact on the environment and society by investing primarily in sustainable investments, where the companies’ current or future business activities are expected to generate a positive impact whilst at the same time seeking to increase the value of its shares, over the long term, through growth in the value of its investments.

The Fund’s sustainable investment objective is achieved through the investment manager’s impact inclusion criteria, investment process alignment with one or more of the UN Sustainable Development Goals (UN SDGs) and the application of the T. Rowe Price Impact Exclusion List. The following sustainability indicators are used to measure the extent to which the Fund attains its sustainable investment objective.

- The Fund’s investment in companies aligned to one of the following three impact pillars:
 - climate and resource impact
 - social equity and quality of life
 - sustainable innovation and productivity
- The Fund’s carbon footprint, compared to that of its benchmark, in the context of the climate and resource impact pillar.
- 0% holdings in companies that do significant harm to the environment and/or society as per the categories listed in the T. Rowe Price Impact Exclusion List.

For further details please refer to the Fund’s prospectus.

Source: T. Rowe Price uses a proprietary custom structure for impact pillar and sub-pillar classification.

FUND HOLDINGS BY IMPACT PILLAR (AS OF 31 DECEMBER 2021)

CARBON FOOTPRINT (AS OF 31 DECEMBER 2021)

	Data Availability				Carbon Metrics		
	Total Percentage of Data Available	Percentage of Data Reported	Percentage of Data Estimated	Percentage of Carbon Metrics Pro-rated	Total Carbon Emissions	Carbon Emissions per US\$1 mn Invested	Weighted Average Carbon Intensity
	%	%	%	%	mtCO ₂ e	mtCO ₂ e / US\$1 mn AuM	mtCO ₂ e / US\$1 mn Revenue
Fund	98.56	60.27	38.29	1.44	276	27.26	174.16
Benchmark	99.01	77.37	21.64	0.99	903	89.14	172.08
Fund vs Benchmark					-69.4%	-69.4%	1.2%

The benchmark carbon metrics are calculated using the total net assets of the Fund invested according to the composition of the benchmark. The comparator benchmark of the Fund is the MSCI All Country World Index with net dividends reinvested. This benchmark is shown for comparison purposes only.

GLOSSARY OF TERMS

mtCO₂e - Metric tons of carbon dioxide equivalent.

Percentage of Data Reported - The percentage for which Carbon Emissions data is reported by Companies.

Percentage of Data Estimated - The percentage for which Carbon Emissions data is estimated by Sustainalytics.

Percentage of Carbon Metrics Pro-rated - The percentage of the Fund and Benchmark which are pro-rated based on the Carbon Metrics of the remainder.

Total Carbon Emissions - Total amount of Scope 1 and Scope 2 greenhouse gas (GHG) emissions that are released by the Fund holdings that are attributable to the % ownership of the Fund in each company, aggregated to give the total carbon emissions equivalent for the Fund. This metric is grossed up using the percentage of data available to give the overall carbon footprint of the Fund. Only applicable to equities.

Carbon Emissions per US\$1mn investment in the Fund - This metric enables an investor to calculate the carbon emissions of their investment in the Fund. Only applicable to equities.

Weighted Average Carbon Intensity - The weighted average, by Fund weight, of the total carbon emissions per US\$1mn of revenues for each of the Fund holdings. This metric gives the Fund's exposure to carbon intensive companies and can be applied across equity and fixed income portfolios. This is the Task Force on Climate-Related Financial Disclosures (TCFD) recommended metric.

EXCLUSION LISTS

The promotion of environmental and social characteristics is achieved through the investment manager's avoidance of sectors or companies, whose activities may be considered harmful to the environment and/or society through the application of its proprietary socially responsible screen (exclusion list).

As a consequence, specific companies whose business activities involve controversial weapons (cluster munitions, anti-personnel mines, incendiary, chemical, biological and nuclear weapons), tobacco production, coal production, assault-style weapons for civilian use, adult entertainment, direct gambling operations and certain conduct-based criteria are excluded.

Description of Sustainability Indicator	Target Exposure (%)	Actual Exposure (%)	Duration of Exposure
Holdings in companies that do significant harm to the environment and/or society as per the categories listed in the T. Rowe Price Impact Exclusion List	0.00%	0.00%	-
Comments: During the period under review, the fund's holdings were in compliance with the security exclusion objectives as defined in the prospectus.			

The Target Exposure (%) is the maximum permitted exposure to the companies described in the Sustainability Indicator.

The Actual Exposure (%) is the average daily exposure to companies described in the Sustainability Indicator during the Duration of Exposure.

The Duration of Exposure is the period of time in days for which the Actual Exposure exceeds the Target Exposure.

TAXONOMY

As well as investing in securities that contribute to environmental objectives, the Fund may invest in securities that contribute to social or other objectives. No minimum exposure to an objective is imposed upon the Fund, which means the Fund may at times invest only in securities that contribute to non-environmental objectives. As a result, during the reference period the Fund's exposure to Taxonomy-aligned investments was low (including enabling and transitional activities).

The aforementioned is also due to the current regulatory framework in which many companies in the Fund's investible universe are not legally required to publish data on their Taxonomy aligned activities. It is expected that with the implementation of new regulations in the EU, such as the Corporate Sustainability Reporting Directive, the availability of data for EU issuers will change in the future. In the meantime, the investment manager relies on third party data providers to be able to supply further information and disclosures on the alignment of the Fund with the Taxonomy regulation.

More information on how and to what extent the Fund will be able to make Taxonomy aligned investments will be disclosed in the prospectus and the next annual reports following the entry into force of the Taxonomy related Regulatory Technical Standards. To the extent that the Fund invests in companies with an environmental objective, the Fund will review the alignment with the Taxonomy regulation as far as the underlying economic activities are in scope of the environmental objectives under the Taxonomy regulation.

*8 October 2021 is the inception date of the Fund.

Responsible European Select Equity Fund

Performance of Sustainability Indicators

2 November 2021 to 31 December 2021 *

Although the Fund does not have sustainable investment as an objective, the promotion of environmental and social characteristics is achieved through the investment manager's avoidance of sectors or companies, whose activities may be considered harmful to the environment and/or society through the application of its proprietary socially responsible screen (exclusion list).

As a consequence, specific companies whose business activities involve controversial weapons (cluster munitions, anti-personnel mines, incendiary, chemical, biological and nuclear weapons), tobacco production, coal production, assault-style weapons for civilian use, adult entertainment, direct gambling operations and certain conduct-based criteria are excluded.

The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

The Target Exposure (%) is the maximum permitted exposure to the companies described in the Sustainability Indicator.

The Actual Exposure (%) is the average daily exposure to companies described in the Sustainability Indicator during the Duration of Exposure.

The Duration of Exposure is the period of time in days for which the Actual Exposure exceeds the Target Exposure.

*2 November 2021 is the date that the Fund converted to Article 8 under the SFDR Regulations.

Responsible Global Structured Research Equity Fund

Performance of Sustainability Indicators

25 October 2021 to 31 December 2021 *

Although the Fund does not have sustainable investment as an objective, the promotion of environmental and social characteristics is achieved through the investment manager's avoidance of sectors or companies, whose activities may be considered harmful to the environment and/or society through the application of its proprietary socially responsible screen (exclusion list).

As a consequence, specific companies whose business activities involve controversial weapons (cluster munitions, anti-personnel mines, incendiary, chemical, biological and nuclear weapons), tobacco production, coal production, assault-style weapons for civilian use, adult entertainment, direct gambling operations and certain conduct-based criteria are excluded.

The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

For further details about the T. Rowe Price Responsible Exclusion list, please refer to the Fund's prospectus.

Sustainability Indicator	Description of Sustainability Indicator	Target Exposure (%)	Actual Exposure (%)	Duration of Exposure
Indicator 1	Holdings in companies involved in the production of controversial weapons (cluster munitions, anti-personnel mines, incendiary, chemical, biological and nuclear weapons). Comments: During the period under review, the fund's holdings were in compliance with the security exclusion objectives as defined in the prospectus.	0.00%	0.00%	–
Indicator 2	Holdings in companies involved in the production or retail of assault-style weapons for civilian use. Comments: During the period under review, the fund's holdings were in compliance with the security exclusion objectives as defined in the prospectus.	0.00%	0.00%	–
Indicator 3	Holdings in companies whose main business activities involve the production of tobacco. Comments: During the period under review, the fund's holdings were in compliance with the security exclusion objectives as defined in the prospectus.	0.00%	0.00%	–
Indicator 4	Holdings in companies that generate >5% of revenues from adult entertainment. Comments: During the period under review, the fund's holdings were in compliance with the security exclusion objectives as defined in the prospectus.	0.00%	0.00%	–

Audit report

To the Shareholders of
T. ROWE PRICE FUNDS SICAV

Our opinion

In our opinion, the accompanying financial statements give a true and fair view of the financial position of T. ROWE PRICE FUNDS SICAV (the “Fund”) and of each of its sub-funds as at 31 December 2021, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

What we have audited

The Fund’s financial statements comprise:

- the statement of net assets as at 31 December 2021;
- the schedule of investments as at 31 December 2021;
- the statement of operations and changes in net assets for the year then ended; and
- the notes to the financial statements, which include a summary of significant accounting policies.

Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the “Commission de Surveillance du Secteur Financier” (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the “Responsibilities of the “Réviseur d’entreprises agréé” for the audit of the financial statements” section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements. We have fulfilled our other ethical responsibilities under those ethical requirements.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our audit report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

R.C.S. Luxembourg B 65 477 - TVA LU25482518*

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or close any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the “Réviseur d’entreprises agréé” for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control;
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund;

- conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Fund or any of its sub-funds to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.
