November 2022

KEY FACTS

NAV per Share	EUR 177.41
Monthly return	5.59%
Fund AuM	EUR 256 mio
Firm AuM	EUR 2'372 mio

FUND OBJECTIVES

The Fund seeks to provide investors with returns superior to the STOXX Europe 600 Net Return index by investing primarily in the publicly traded equities of companies worldwide with a special focus on Europe.

The Fund is actively managed and gives emphasis to investing in companies that are perceived to offer a compelling investment opportunity and the possibility of significant capital appreciation as a result of proposed business strategies which may substantially increase shareholders value over the medium term.

INVESTMENT PRINCIPLES

To reach its objectives, the Fund is invested in a concentrated high-conviction portfolio of typically 17-20 positions. Investment horizon is usually 3-5 years, and potentially longer.

A disciplined, bottom-up, free-cash-flow based approach to securities valuation and selection is applied.

Portfolio Companies tend to generate strong, visible and growing free cash flow and to benefit from defensible competitive advantages, strong management teams and good corporate governance.

IMPORTANT INFORMATION

This is a marketing document and is intended for informational and/or marketing purposes only. It is neither directed to, nor intended for distribution or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation. This document is not intended as, and does not constitute or form part of, any offer to issue or sell, or any solicitation of any offer to subscribe or purchase, any shares in Alatus UCITS - Inflection Long Only (the "Fund") or in the products managed by Alatus Capital Ltd. ("Alatus") nor shall it or the fact of its distribution form the basis of, or be relied on in connection with, any contract therefore. Investment in the Fund should not be made without preliminary careful consultation of the most recent Prospectus, KIID, Articles, annual and semi-annual reports and other available documents (the "Fund Documents") which may be obtained free of charge at the address mentioned below and should take into account the personal and fiscal situation of the investors as well as possible restrictions applicable to certain categories of investors. Potential investors should also check prior to considering any possible investments in such funds their status of registration in the country where each investor is domiciled.

The information contained herein has not been provided in a fiduciary capacity, and it is not intended to be, nor should it be considered as, impartial investment advice.

Past performance is not a guide to future performance. The performance data does not take account of the commissions and costs incurred on the issue and redemption of units. The value of investments and any income is not guaranteed and can go down as well as up and may be affected by exchange rate fluctuations. This means that an investor may not get back the amount invested. Index returns assume reinvestment of dividends and capital gains and unlike fund returns do not reflect fees or expenses. Factors affecting fund performance may include changes in market conditions (including currency risk) and interest rates, as well as other economic, political, or financial developments. The Fund's investment policy allows for it to enter into derivatives contracts. Leverage may be generated through the use of such financial instruments and investors must be aware that the use of derivatives may expose the Fund to greater risks, including, but not limited to, unanticipated market developments and risks of illiquidity, and is not suitable for all investors. Please take note of the risk factors listed in the Fund's prospectus that are not intended to be reproduced in full in this document.

Investors should note that the benchmark index of the Fund was changed with effect as of 01.01.2016 from STOXX Europe 600 to STOXX Europe 600 Net Return and that this change may affect the description of the (relative) performance of the Fund.

Glossary

Annualised Alpha shows the annual percentage performance of a fund above or below that explained by its exposure to the broader market.

Annualised volatility is a measure of historical volatility. It is calculated by comparing the average return with the average variance from that return.

Beta shows the average extent a fund's return moves relative to the broader market. A fund with a beta above 1 moves on average more than the market and below 1 moves on average less than the market.

Ongoing charges (OCR) are based over 12 months of expenses ending the 31 December of the previous year. It is annually updated, but may be adjusted more frequently. Performance fees and portfolio transaction costs are excluded except in the case of an entry/exit charge paid by the Compartment when buying or selling units/shares in another collective investment undertaking. Estimate of future charges is used for funds younger than 12 months.

Sharpe ratio shows the fund's risk-adjusted performance. It is calculated by dividing the excess return (portfolio return minus risk free return) by the volatility.

The Synthetic Risk and Reward Indicator ("SRRI") is a volatility gauge as defined by the European Securities and Markets Authority (ESMA) in its guidelines CESR/10-673.
