Ratings & Awards⁴ (31/07/2024)**Morningstar Rating Overall⁵****Investment Strategy**

DJE - Asien invests primarily in solid companies with promising growth prospects in the Asia-Pacific region. The fund management seeks to identify investments with attractive valuations and shareholder-friendly corporate policies such as capital returns and share buybacks (total shareholder return). The fund allocation is independent from market benchmark and uses decades of experience and in-depth Asian expertise of DJE research team to deliver a positive performance.

The Funds are actively managed by DJE and, where a benchmark index is indicated, without reference to it. The presented charts and tables concerning performance are based on our own calculations according to the gross performance (BVI) method² and illustrate past development. Past performance is not indicative for future returns. The BVI method takes into account all costs incurred at the fund level (e.g. management fees), the net performance and the issue fee. Additional individual costs may be incurred at the customer level (e.g. custodian fees, commission and other charges). Model calculation (net): an investor wishes to purchase shares for Euro 1,000. With a maximum issue surcharge of 0.00%, he has to spend a one-off amount of Euro 0.00 when making the purchase. In addition, there may be custodian costs that reduce performance. The custodian costs are decided by your bank's price list and service charges

Environmental score (0-10)	5.7
Social score (0-10)	5.8
Governance score (0-10)	5.2
ESG Rating compared to Peer Group (100% = best value)	45.18%
Peer Group	Equity Asia Pacific ex Japan (684 Funds)
ESG Coverage	79.86%
Weighted Average Carbon Intensity (tCO ₂ e / \$M sales)	126.38

AAA	14.68%	BB	11.84%
AA	26.67%	B	1.89%
A	16.22%	CCC	0.00%
BBB	8.58%	Not Rated	20.14%

ESG Rating What it means

AAA, AA	Leader: The companies that the fund invests in show strong and/or improving management of financially relevant environmental, social and governance issues. These companies may be more resilient to disruptions arising from ESG events.
A, BBB, BB	Average: The fund invests in companies that show average management of ESG issues, or in a mix of companies with both above-average and below-average ESG risk management.
B, CCC	Laggard: The fund is exposed to companies that do not demonstrate adequate management of the ESG risks that they face, or show worsening management of these issues. These companies may be more vulnerable to disruptions arising from ESG events.
Not Rated	Companies in the fund's portfolio that are not yet rated by MSCI, but these are rated as part of our own analysis.

Investment Approach

DJE - Asien invests primarily in companies with attractive and promising business models from the Asia-Pacific region. The RCEP free trade zone (Regional Comprehensive Economic Partnership), which was established in 2020, is the largest in the world in terms of its share of global GDP and is expected to contribute to the region's dynamic growth (see chart). The fund allocation is based on our proprietary fundamental top-down (FMM methodology) and bottom-up analysis. We believe that the combination of global macroeconomic analysis along with bottom-up security selection is essential to balance opportunities and risks. The focus of the fund is companies with attractive revenue and earnings growth, stable earnings, potential for innovation and a leading competitive position. The fund management allocates across regions, countries, and sectors of the Asian economic area, independent from any market benchmarks.

Dynamic growth region Asia

Free Trade Zone RCEP

Source: Weltbank, World EconomicsAs at: 2022

Opportunities

- + Excellent demographic developments make long-term growth in investments in Asia possible
- + The conditions for expansion in many Asian domestic economies, such as China, continue to exist
- + Traditionally higher dividend payments mean that the fund can take advantage of the compounding effect of reinvested dividends

Risks

- Equity prices may exhibit relatively strong fluctuations depending on market conditions
- Currency risks resulting from a high proportion of foreign investments
- Issuer country and credit risks

**Fund Manager****Dr. Jan Ehrhardt**

Responsible Since 01/08/2008

Dr Jan Ehrhardt is Deputy CEO of DJE with responsibility for Research & Portfolio Management and Wealth Management. As a fund manager, he is also responsible for DJE's dividend strategies. The business economist graduated with a PhD from the University of Wuerzburg.

DJE Kapital AG

DJE Kapital AG is part of the DJE Group, can draw on 50 years of experience in asset management and is today one of the leading bank-independent financial service providers in German-speaking Europe. Our investment strategy, both in equities and bonds, is based on the FMM method developed in-house: a systematic analysis which takes three views on securities and the financial markets – fundamental, monetary and market-technical. DJE follows sustainability criteria when selecting securities, takes into account selected sustainable development goals, avoids or reduces adverse sustainability impacts and is a signatory to the United Nations "Principles for Responsible Investment".

Monthly Commentary

The Asian stock markets started August with some volatility, especially in Japan and Hong Kong, while China, India, Korea and Indonesia, among others, were calmer and tended to move sideways. Weak US labor market data at the beginning of the month raised fears that the USA could slide into a recession. In addition, a (moderate) increase in key interest rates by the Bank of Japan jeopardized the usual interest rate differential business, the so-called yen carry trade. As a result, the Japanese stock index Topix suffered a daily loss of -12.2%, which also affected the Hong Kong stock exchange. After August 5, the Japanese and Hong Kong markets were able to make up most of their losses. In China, the ailing real estate market continues to weigh on consumption and retail. In order to strengthen domestic demand, the Chinese government made 300 billion renminbi (approx. 39 billion euros) available to subsidize the exchange of expensive consumer goods and production facilities in the second half of the year. The purchasing managers' index for the manufacturing sector fell for the fourth time in a row in August, falling to 49.1 points (previous month: 49.4), indicating a shrinking economy. The index for services remained stable at 50.3 points (previous month: 50.2). Against this market backdrop, the DJE - Asien fell by -0.80%. At sector level, the Asian investment region showed a mixed picture in August. The real estate (overweight in the fund), industrial (overweight in the fund) and consumer discretionary (overweight in the fund) sectors performed best in relative terms. The healthcare (underweight in the fund), telecommunications (underweight in the fund) and technology (underweight in the fund) sectors performed worst in relative terms. Overall, the sector weighting had a negative impact in August on the fund price development relative to the comparison index. At the individual stock level, the highest performance contributions came from the positions of the Chinese company Great Eagle Holdings (real estate/hotels), the Japanese company KDDI Corp. (telecommunications) and the Chinese company Guangdong Investment (utilities, real estate). In contrast, the positions of the Japanese company Sumitomo Mitsui Financial Group (bank), the Chinese company Kingboard Laminates Holdings (specialty chemicals/laminates) and the Japanese company Tokio Marine Holdings (insurance) had a negative impact. The fund management adjusted the allocation over the course of the month: the overweight in the real estate and utilities sectors was increased. The overweight in the industrial goods & services, banks and insurance sectors was reduced. The underweight in the consumer goods, healthcare and food & beverages sectors was reduced. The underweight in the financial services and technology sectors was increased. At the country level, the share of Chinese and Hong Kong Chinese stocks increased. In contrast, the share of Japanese and South Korean stocks decreased. Due to the adjustments, the investment rate rose to 92.71% (previous month: 89.65%).
