Morningstar Rating Overall⁵ ★★★★★

Investment Strategy

DJE - Zins Global invests in bonds from around the world. The fund may take advantage of both international interest rate differentials and currency fluctuations. The broad investment universe offers the option of reacting flexibly to market movements. There is an emphasis on a balanced mix of bonds to achieve a reasonable return. The investment levels in both government and corporate bonds as well as maturities are actively managed. Foreign currency bonds are hedged depending on market conditions.

Performance in % since inception (18/01/2007)

The Funds are actively managed by DJE and, where a benchmark index is indicated, without reference to it. The presented charts and tables concerning performance are based on our own calculations according to the gross performance (BVI) method² and illustrate past development. Past performance is not indicative for future returns. The BVI method takes into account all costs incurred at the fund level (e.g. management fees), the net performance and the issue fee. Additional individual costs may be incurred at the customer level (e.g. custodian fees, commission and other charges). Model calculation (net): an investor wishes to purchase shares for Euro 1,000. With a maximum issue surcharge of 0.00% , he has to spend a one-off amount of Euro 0.00 when making the purchase. In addition, there may be custodian costs that reduce performance. The custodian costs are decided by your bank's price list and service charges

Evaluation by MSCI ESG Research

MSCI ESG Rating (AAA-CCC)	A
ESG Quality Score (0-10)	6.6
Environmental score (0-10)	6.3
Social score (0-10)	5.6
Governance score (0-10)	6.2
ESG Rating compared to Peer Group (100% = best value)	34.69%
Peer Group	Bond Global EUR (640 Funds)
ESG Coverage	80.32%
Weighted Average Carbon Intensity (tCO ₂ e / \$M sales)	62.46

AAA	6.95%	BB	3.06%
AA	9.09%	B	0.41%
A	33.17%	CCC	0.00%
BBB	27.64%	Not Rated	19.68%

ESG Rating What it means

AAA, AA	Leader: The companies that the fund invests in show strong and/or improving management of financially relevant environmental, social and governance issues. These companies may be more resilient to disruptions arising from ESG events.
A, BBB, BB	Average: The fund invests in companies that show average management of ESG issues, or in a mix of companies with both above-average and below-average ESG risk management.
B, CCC	Laggard: The fund is exposed to companies that do not demonstrate adequate management of the ESG risks that they face, or show worsening management of these issues. These companies may be more vulnerable to disruptions arising from ESG events.
Not Rated	Companies in the fund's portfolio that are not yet rated by MSCI, but these are rated as part of our own analysis.

Investment Approach

DJE - Zins Global invests worldwide in a broadly diversified portfolio of high-quality government and corporate bonds. High-yield and emerging market bonds can be added. The selection of individual bonds depends largely on a fundamental assessment of the debtor's solvency and the corresponding yield valuation. The fund management emphasises a balanced mix of bonds with an attractive risk/reward ratio and strives to achieve an appropriate return. The currency risk of securities not denominated in euros can be partially or fully hedged depending on the market situation. The fund thus offers easy access to the global bond market and can serve as a basic investment.

Investment universe - drawing on the full potential

Source: DJE Kapital AG. For illustrative purposes only.

Opportunities

- + Global bond fund with a focus on high-quality bonds.
- + Broad diversification across countries, sectors, issuers and credit ratings.
- + Active interest rate, maturity and risk management.

Risks

- Bonds are subject to price risks when interest rates rise.
- Bonds are also subject to country risks and the creditworthiness and liquidity risks of their issuers.
- In the case of securities not denominated in euros, there is a currency risk for euro investors.

Fund Manager

Dr. Jens Ehrhardt

Responsible Since 18/01/2007

Dr Jens Ehrhardt is the founder and CEO of DJE. He received his doctorate in 1974, the same year he founded today's DJE Kapital AG, which he has managed from the outset. From his doctorate, he developed the DJE investment method, FMM, which has been continuously refined to this day and takes fundamental, monetary and market indicators into account.

Tobias Geishauser

Responsible Since 09/03/2023

Tobias Geishauser joined DJE in 2022. The bond specialist is co-fund manager of DJE - Zins Global and is responsible for other fixed-income special funds as a portfolio manager. Before joining DJE, he worked in fixed-income trading at a private bank and was also responsible for managing the interest rate book.

DJE Kapital AG

DJE Kapital AG is part of the DJE Group, can draw on 50 years of experience in asset management and is today one of the leading bank-independent financial service providers in German-speaking Europe. Our investment strategy, both in equities and bonds, is based on the FMM method developed in-house: a systematic analysis which takes three views on securities and the financial markets – fundamental, monetary and market-technical. DJE follows sustainability criteria when selecting securities, takes into account selected sustainable development goals, avoids or reduces adverse sustainability impacts and is a signatory to the United Nations "Principles for Responsible Investment".

Monthly Commentary

The first half of July saw a rally across all asset classes. For example, the broad US equity index S&P 500 reached an all-time high and the yield on 10-year US government bonds fell by 24 basis points to 4.16% by July 16. However, the rally was not so much triggered by good corporate or economic data, but rather the result of increasingly weak economic data, which fueled hopes of interest rate cuts in the US. The markets also raised their expectations of falling interest rates because US inflation fell to 3.0% in June (May: 3.3%), mainly due to falling energy and commodity prices. In the second half of the month, the markets began to doubt the rally in the technology sector, which has been ongoing since fall 2023. Broad equity indices moved sideways due to the high weighting of technology, and tech indices recorded notable price losses. Bond markets, however, rallied on expectations of falling key interest rates - which Fed Chairman Powell also confirmed for September. The European Central Bank, in turn, announced that it would act "depending on the data". However, the markets are also expecting further interest rate cuts for the eurozone in September, December and March 2024, even though inflation rose slightly to 2.6% in July compared to the previous month (2.5%). The increased expectations of interest rate cuts caused the bond markets to move: The yield on 2-year US government bonds fell by 50 basis points to 4.26% by the end of the month, and that of their German counterparts by 30 basis points to 2.53%. High-quality corporate bonds on both sides of the Atlantic also benefited from interest rate expectations. In the USA, their yield fell by 34 basis points to 5.13% and in Europe by 33 basis points to 3.49%. In the case of high-yield bonds, US securities came out on top. Their yield fell by a similar amount of 31 basis points to 7.59%, while the yield on European bonds fell by only 18 basis points to 6.57%. In this market environment, DJE - Zins Global rose by 0.95%. The fund benefited from the broad decline in yields in July. The lower risk premiums on high-quality and high-yield corporate bonds made a particularly positive contribution to the fund's performance. On the other hand, US dollar-denominated securities also gained slightly as the euro appreciated somewhat against the US dollar. The fund management subscribed to long-dated government bonds from the USA, Italy and Poland (in zloty). It also reduced short-dated US and Italian government bonds in return. This is intended to extend the duration and the zloty bond also contributes to broader currency diversification. In order to reduce the portfolio risk, the fund management also reduced the proportion of high-yield bonds. As a result of the adjustments, the proportion of public-sector bonds rose from 37.72% to 41.27% and the modified duration increased from 3.93% to 4.94%. The fund's overall investment ratio fell slightly to 93.44% (previous month: 94.67%). At the end of the month, securities denominated in US dollars were partially currency-hedged.
