

The fund "Tellco Classic - Swiss Equities" invests in a diversified stock portfolio and is based on the Swiss Performance Index. The fund's assets are invested in shares with a sufficient market capitalisation and an adequate free-float. The allocation is made with an semi-active approach, based on the analysis of the economic environment and of the related sector and country. Are selected in particular companies holding a leading position in the relevant industry, showing a healthy financial structure with high profitability and long-term growth prospects.

Sustainability policy (ESG): Companies/issuers with sustainable value creation are selected taking into account a) an exclusion approach (SVVK-ASIR exclusion list, companies with >10% revenue from coal production) and b) a positive screening approach (MSCI ESG minimum rating BBB). Overall, at least 80% of the invested companies/issuers must be considered companies/issuers with sustainable value creation using both sustainability approaches. A voting approach is also used. Further information on the sustainability policy (ESG) can be found in the prospectus.
