

The Tellco Classic Best Idea fund aims at a long-term appreciation of invested capital, by investing in listed equities issued by companies whose expected growth is a multiple of global GDP growth, thanks to innovations primarily, and without limitation, in the technology, healthcare and energy fields. The fund is managed actively on the ground of constant research in industry fundamentals and innovations in those fields, with the purpose of identifying attractive growth themes. This work is complemented by fundamental equity analysis to pick those companies which are positioned to make the most of these growth themes, coming from both developed and emerging markets.

Sustainability policy (ESG): Companies/issuers with sustainable value creation are analysed under a) an exclusion approach (exclusion list SVVK-ASIR, companies with >10% revenue from coal production) and b) a positive screening approach (MSCI ESG minimum rating BBB). In total at least 80% of the invested companies/issuers must qualify as companies/issuers both sustainability approaches as companies/issuers with sustainable value creation. Further information on the sustainability policy (ESG) can be found in the prospectus.
