52 Week Low	CHF	199.35
Total Assets in mn	CHF	128.37 (all classes of the fund)
Number of Shares		130'714

## Investment Objective and Investment Policy

The Investment fund invests in gold and silver, as well as in companies involved in drilling, mining and marketing in the precious metals industry. Foreign currency exposures against Swiss Franc could be hedged.

## Characteristics

Due to its balanced structure, the fund offers a combination of stability and growth potential in a world of increasing tensions, economically and politically. It is therefore the suitable investment vehicle for long-term investors.

## Investment Manager's Comment

The fund achieved a good outperformance in August. The main driver for this was our stock selection, in particular the position in Osisko Mining. The stock received a takeover bid from Gold Fields at a substantial premium. This once again confirms our thesis that the major gold miners are still dependent on takeovers if they want to maintain their production rate. We sold our Osisko shares as the price spiked. After a slight pullback, we bought a new position in Franco-Nevada, the largest royalty company, whose valuation has now become attractive. Another new acquisition is Hochschild Mining, which, after a lengthy construction phase, has now successfully commissioned a new mine in Brazil and should be able to generate substantial free cash flows in the near future.

Market data (Quantex, Bloomberg) of August 30, 2024

## Net Asset Value in CHF

## Net Performance in CHF (fund after fees, index without fees)

	Aug 24	YTD	1 Year	5 Years	10 Years	Incept.*
