

SYSTEMATIC DLT FUND

ACTIVE LONG/SHORT

JANUARY 2025

MONTHLY COMMENT

In January, the Systematic DLT lost -9.0%.

Bitcoin experienced significant volatility throughout the month, fluctuating between \$93.5K and \$106K.

The Systematic DLT trend-following system initially took a short position in mid-January, anticipating further market declines. However, sentiment shifted rapidly following the launch of Trump's memecoin and MicroStrategy's deepened Bitcoin investments. In response, the system switched to a long position, but the market soon corrected again. News-driven events were the primary contributors to the fund's negative performance.

STRATEGY

The Fund performance demonstrates the automated trading system, based on an algorithmic approach with long and short indicators. This system is limited to a maximum of 33% short exposures. Investment decisions are made through generic, algorithmic filter analysis, which reduces the volatility of daily prices. This process allows trends to be identified and exploited without additional subjective analysis parameters from the portfolio management team.

The trend following strategies are stabilised by further quantitative methods, which include features of the price development. The model consists of a variety of different technical methods, such as trend following and mean reversion. The model further relies on additional short only indicators with the effect of efficiently reducing long exposure in a bearish market environment.

FUND EXPOSURE

Average exposure (daily)* 52.9%

THE SYSTEMATIC DLT FUND

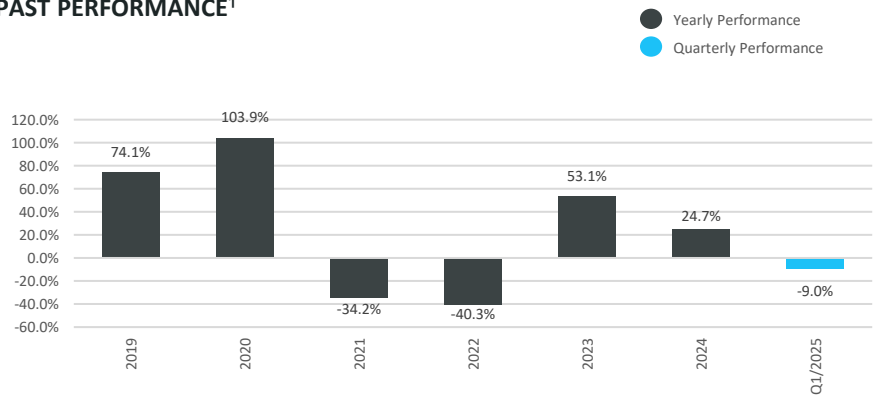

The investment objective of the Systematic DLT Fund is to maximise returns, regardless of the overall market performance of crypto assets. The actively-managed approach allows both long and short positions.

The Systematic DLT Fund, an alternative investment fund (AIF) regulated in Liechtenstein, pursues a systematic, quantitative approach based on daily market prices of crypto assets. To fulfill its investment objective in the most secure and transparent way, the Fund invests into the Bitcoin and Ether futures at the CME. The strategy may also invest directly into other crypto assets according to market environments.

KEY BENEFITS

- Professional FINMA regulated asset manager
- Weekly liquidity
- Diversification from traditional investments
- Upside benefit, downside protection
- Regulated custodian
- Invest directly with fiat currency

ABOUT MATRIXPORT AM

FINMA-supervised pioneer in digital assets

Part of Matrixport Group

Matrixport Asset Management AG is a FINMA-regulated Asset Manager and pioneer in digital assets, offering institutional-grade investment solutions.

Our Asset Management team is fully dedicated to crypto, enabling secure access to the diversification and return potential of this new asset class to our clients. Matrixport Asset Management AG manages the very first FINMA-regulated crypto fund and is an active member of the Asset Management Association Switzerland (AMAS).

RISK AND REWARDS

The Fund is considered to be a high-risk investment as the average return volatility is above conventional assets. Furthermore, crypto assets are based on a new technology that brings disruptive potential, but also unconventional risks. This requires a corresponding risk tolerance and capacity. The value of the Fund unit may fall below the purchase price. Legal, structural and market participant changes have an effect on the value of the portfolio. The Fund exclusively invests in less liquid assets that may be difficult to sell in distressed markets. Crypto assets are considered as carrying high risk profiles. A detailed and comprehensive list of risk descriptions can be found in the Prospectus available upon request.
