Investment strategy

The Piguet Fund - Swiss Equities aims to achieve long-term capital growth through a continuous process combining top-down analysis and a bottom-up selection. The manager first determines the market trends and most buoyant themes and focuses on the stocks that offer the best growth potential at attractive prices. The portfolio is concentrated, favouring around twenty stocks, both SMI blue chips and small and mid caps, with sometimes underestimated potential that can add a significant value to the fund. The manager may invest in units of third-party funds, derivatives and cash to reduce volatility or take advantage of any opportunities.
