IMPORTANT INFORMATION

The BCV Multi-Strategy Fund sub-fund invests in target alternative funds that use investment techniques that are not comparable with those of funds investing in traditional securities. The target funds are of all types, open- or closed-ended, which may or may not be traded on stock exchanges or other regulated markets that are open to the public, and these funds can take very different legal forms. Investors should be aware of the increased risks associated with investing in these target funds, particularly as to the possible partial or total loss of their investment. In order to mitigate the risk of such losses being incurred, the asset manager undertakes a rigorous due-diligence procedure for choosing and monitoring target funds and fund managers as well as diversifying the investment strategies pursued. Besides the market and currency risks, investors' attention is drawn to the risks associated with investment management, liquidity of shares in the underlying funds, liquidity of the funds' investments, the impact of share redemptions, the pricing of Fund shares, service providers, lack of transparency and legal risks. These risks are commented more fully in the prospectus.
