Objectives and investment universe

Asset class	Commodities
Style	Semi-active strategy

BCV COMMODITY FUND is an investment fund incorporated under Swiss law with multiple sub-funds, in the category "Other traditional investment funds". The investment objective of the BCV Commodity Subfund is to generate returns close to or greater than those of the commodities market by focusing on a "long only" approach. The Subfund includes the four main commodity sectors, namely energy, base metals, precious metals, and agricultural material. The portfolio is managed according to a fundamental approach based on the portfolio manager's convictions. At least two-thirds of the Subfund's assets are invested in commodities and precious metals. This exposure is achieved primarily via derivatives (swaps and futures). Forward derivatives are used to hedge currency exchange risks.

(USD) A Class, open to all investors. US dollar is the reference currency
