This summary risk indicator (SRI) is a guide to the level of risk of this product compared to other products. Where there are less than 5 years worth of data, missing returns are simulated using an appropriate benchmark. The SRI may change over time and should not be used as an indicator of future risk or returns. Even the lowest risk classification does not imply that the Sub-Fund is risk-free or that capital is necessarily guaranteed or protected.

HIGHLIGHTS

LO Funds - All Roads Conservative is a long-only multi-asset risk-based strategy launched in January 2017. The Fund invests in various traditional risk premia such as equities, sovereign and corporate credit (in both DMs and EMs) and commodities. The strategy further diversifies the portfolio by building exposure to alternative risk premia to harvest market inefficiencies in a systematic and transparent manner. The Fund seeks to generate steady performance over market cycles, and aims to offer higher risk-adjusted returns while controlling risk. The fund takes a conservative stance with no economic leverage. The Fund's investment approach applies a systematic, liquid and transparent risk-based allocation methodology. This is complemented by a separate risk budgeting approach based on dynamic drawdown management that aims to limit excessive losses.

The following risks may be materially relevant but may not always be adequately captured by the synthetic risk indicator and may cause additional loss:

Counterparty risk: When a fund is backed by a guarantee from a third party, or where its investment exposure is obtained to a material degree through one or more contracts with a counterparty, there could be a material risk that the counterparty to the transactions will fail to honor its contractual obligations. This may result in a financial loss to the Fund.

Risks linked to the use of derivatives and financial techniques: Derivatives and other financial techniques used substantially to obtain, increase or reduce exposure to assets may be difficult to value, may generate leverage, and may not yield the anticipated results. All of this could be detrimental to fund performance.

Model Risk: Models may be misspecified, badly implemented or may become inoperative when significant changes take place in the financial markets or in the organization. Such a model could unduly influence portfolio management and expose to losses.

Before taking any investment decision, please read the latest version of the prospectus, the articles of incorporation, the Key Information Documents (KIDs) and the latest annual report and semi-annual report. Please pay attention to the Appendix B "Risk Factors Annex" of the prospectus.

Incorporation of extra-financial risks into the investment decision process may result in underweighting of profitable investments from the sub-fund's investment universe and may also lead the management of the sub-fund to underweight investments that will continue to perform. Sustainability risks may lead to a significant deterioration in the financial profile, profitability or reputation of an underlying investment and may therefore have a significant impact on its market price or liquidity.

The Fund has been classified as a financial product subject to Article 8 of Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial sector (the "SFDR"). The Fund promotes, among other characteristics, environmental or social characteristics, or a combination of those characteristics, provided that the companies in which the investments are made follow good governance practices.

GLOSSARY

Credit Ratings: The credit ratings breakdown mentioned for convertible funds is a blend of ratings performed internally as well as ratings provided by external sources.

Risk and Reward Profile: This summary risk indicator (SRI) is a guide to the level of risk of this product compared to other products. Where there are less than 5 years worth of data, missing returns are simulated using an appropriate benchmark. The SRI may change over time and should not be used as an indicator of future risk or returns. Even the lowest risk classification does not imply that the Sub-Fund is risk-free or that capital is necessarily guaranteed or protected.

Total Expense Ratio (TER): The total fees involved in managing and operating a fund. The TER included the annual management fee and other charges, for example legal, admin, and audit costs (source: annual audited reports or semi annual non audited reports). The Total Expense Ratio (TER) is calculated twice per year and is subject to change between calculation dates.

OGC: The OGC (Ongoing Charge) refers to the recurring charges levied on the assets of a fund in the context of PRIIP KIDs. These charges include all expenses necessary for the operation of the fund, such as manager remuneration, depository fees, accounting and audit costs, as well as other administrative costs. However, they exclude certain costs such as entry and exit fees, performance fees.

Volatility: A statistical measure of the fluctuations of a security's price. It can also be used to describe fluctuations in a particular market. High volatility is an indication of higher risk.

Sharpe Ratio: A measure of risk-adjusted performance. The higher the ratio, the better risk-adjusted performance has been.

Drawdown: A draw down is usually quoted as the percentage between the peak and trough of an investment during a specific period. It can help to compare an investment's possible reward to its risk.

Correlation: Correlation is a measure of how securities or asset classes move in relation to each other. Highly correlated investments tend to move up and down together while investments with low correlation tend to perform in different ways in different market

Important Information on Fund awards:

Morningstar: Morningstar Category: Morningstar assigns ratings based on comparisons of all funds within a specific Morningstar Category, rather than all funds in a broad asset class. The information contained herein is proprietary to Morningstar and/or its providers, may not be copied or distributed and is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are not responsible for any damages or losses arising from any use of this information. For more information about the Morningstar Category:

Morningstar stars: The star rating is based on risk-adjusted performance. A fund must have a record of more than three years. Star ratings are graded on a curve: the top 10% of funds receive five stars, the next 22.5% receive four stars, the middle 35% receive three stars, the next 22.5% receive two stars and the bottom 10% get one star. A rating alone is an insufficient basis for an investment decision. A rating is drawn for illustration purposes only and is subject to change. It is not a recommendation to invest in the Fund. It does not predict future performance of the Fund. There is no guarantee that the investment objective of the Fund will be reached.
