HIGHLIGHTS

LO Institutional Strategies (CH) - LPP 30 is a long-only multi-asset strategy in place since November 2011. It invests in various asset classes including equities and fixed income securities, with a focus on CHF denominated bonds. It seeks to generate stable returns over the long-term and outperform the LODH LPP 30 index. It complies with the principles and investment requirements of Swiss pension funds (LPP/OPP2). The investment approach aims to benefit from investment opportunities in the Swiss bond market through active management of CHF-denominated bonds and allocation to international equity and fixed income assets using the LOIM Smart Beta approach. This approach aims to offer higher risk-adjusted returns through better diversification than market capitalisation indices. The portfolio is further adjusted taking into account macro indicators that aim to provide a view of the current global economic environment. Risk management is performed by fund managers at a portfolio level, alongside independent teams who oversee investment risks and operational risks.

Before taking any investment decision, please read the latest version of the prospectus, the articles of incorporation, the Key Information Documents (KIDs) and the latest annual report and semi-annual report. Please pay attention to the Appendix B "Risk Factors Annex" of the prospectus.

Incorporation of extra-financial risks into the investment decision process may result in underweighting of profitable investments from the sub-fund's investment universe and may also lead the management of the sub-fund to underweight investments that will continue to perform. Sustainability risks may lead to a significant deterioration in the financial profile, profitability or reputation of an underlying investment and may therefore have a significant impact on its market price or liquidity.
