

Objective & Strategy

The objective of the Fund is to achieve capital growth in the medium to long-term by investing primarily, in equities and equity-type securities of small and medium-sized companies having their registered office in, or carrying the majority of their activities in, or generating the majority of their revenue from Europe excluding the UK or listed on a European regulated market, excluding the UK ones. These companies may include European emerging markets companies and Russian companies. Mirabaud – Discovery Europe ex-UK was previously known as Mirabaud – Equities Europe ex-UK Small and Mid. The name change was effective as of 02/09/2019. The Fund strategy remains the same.

Investment Manager

Hywel Franklin is head of European Equities at Mirabaud Asset Management. He is responsible for managing the Mirabaud Equities European Small and Mid Cap products. Prior to joining Mirabaud, Franklin was a Senior Portfolio Manager at UBS and held a number of roles including Head of Global Smaller Companies, Portfolio Manager/Analyst Global Equities, and Head of Thematic Equities. Franklin holds an MA degree in French and German from the University of Oxford and is a CFA charterholder.

Risk Information

Investments in equities are subject to market and currency risks that won't be hedged. The fund may invest in emerging markets that may be more volatile and expose to higher operational risk than equity markets of well established economies. The fund may invest in equities through structured instruments that would lose their value if their issuer was to default and be unable to meet its contractual obligations. The fund may invest in securities that are less liquid because buyers/sellers are not always in sufficient numbers to trade these securities readily or because they hold a large portion of their shares. The fund may invest beyond its primary universe which may result in additional risks. Investments in China A Shares in Mainland China are performed through the Shanghai-Hong Kong Stock Connect which may entail additional quota limitation, clearing and settlement, regulatory, operational and counterparty risks. Financial derivative instruments may be used as part of the investment process, which may increase the fund volatility and expose the fund to the risk of default of its counterparties. Investments in share-classes that are not denominated in the fund base currency are exposed to losses and gains caused by currency fluctuations. Cash placed in time deposits or money market funds are exposed to their issuer default risk.
