

Mirabaud Fund (CH) - Swiss Equities A cap. CHF

31 August 2023

Investment Overview

The fund aims to outperform the Swiss Performance Index (SPI)[®], which represents the broad investable Swiss equities market. Through an active management style, the fund invests in 30 to 50 stocks based on fundamental analysis. The focus lies on quality companies with visible, stable growth, which also have a high return on their invested capital.

Approach to Sustainability

We adopt a disciplined approach to material ESG issues such as climate change, business ethics and human capital. Through proxy voting and engagement with the companies we invest in, we are able to address extra-financial risks and advocate ESG good practices. We believe that this can improve the companies' prospects, quality and risk profile.

We follow a three-step process: 1. Exclusion of companies operating in controversial sectors, and companies involved in recent major controversies; 2. Positive screening - aiming to minimise downside risk of the portfolio by excluding companies lagging on ESG practices; 3. In-depth analysis of material ESG issues for all companies, along with ongoing engagement.

Risk Information

Investments in equities are subject to market risks which will not be hedged. The fund may invest in securities which are less liquid because buyers/sellers are not always in sufficient numbers to trade these securities readily or because they hold a large portion of their shares. The fund may invest beyond its primary universe which may result in additional risks. Investments in share-classes that are not denominated in the fund base currency are exposed to losses and gains caused by currency fluctuations. Cash placed in time deposits or money market funds are exposed to their issuer's default risk.
