Fund description

Investment concept

The Valitas Institutional Fund is an umbrella fund comprised of, among others, the subfunds Valitas Diversified Sustainable 3.0 and Valitas Diversified Sustainable 5.0. These include portfolios with a focus on indirect investments diversified across different investment classes. The two subfunds differ in the weighting of their investment classes in order to achieve long-term target returns between 3% (3.0 variant) and 5% (5.0 variant) with tiered risk levels. They can be combined in an individually customisable ratio to enable the specific profitability and risk preferences of the investor to be realised.

Investment policy

The Valitas Diversified Sustainable Fund 3.0 and Valitas Diversified Sustainable Fund 5.0 mostly focus on indirect investments (fund-of-funds principle). The investments are made while maintaining a broad diversification across the various investment categories. The weighting of each investment class in the portfolio is flexibly adapted by Globalance Bank according to the respective market environment. The focus when choosing investments is on their positive impact on society, the economy and the environment, for which purpose Globalance Bank AG has developed a special and unique methodology measuring the footprint (Globalance Footprint®) of the investments. This footprint is an integral selection criterion for investments.

Report of the Investment Manager

The inflation rate in Switzerland was 0.6% in October compared to the same month of the previous year and has therefore fallen further since September. In Germany, on the other hand, the inflation rate rose to 2% in October, up from 1.6% in September. The inflation rate also increased in the USA, reaching 2.6% in October after 2.4% in September. The year 2024 will be characterized by key interest rate cuts: In October, the European Central Bank (ECB) lowered its key interest rate for the third time this year, which now stands at 3.25%. October was characterized by high volatility on the global markets, triggered by the escalating conflict in the Middle East as well as increasing uncertainty regarding the US presidential elections and the further course of the global interest rate cut cycles. The S&P 500 recorded -0.92% in October (YTD +20.96%), while the SMI fell by -3.09% (YTD +9.32%). The bond markets also had a difficult month: the Swiss SBI closed October almost unchanged at +0.03% (YTD +4.02%), while the global bond index ended the month at -1.8% (YTD -0.7%).
