31 August 2024

**Share Class**

[I] Institutional Investors

**Fund Objective**

The objective of the Fund is to provide a return in excess of the performance of emerging market equities.

**Investment Strategy**

The investment policy of the Fund is to outperform MSCI Emerging Markets Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) over the medium and long term while investing in companies which exhibit lower carbon emissions in the way of current emissions and future emissions (measured by fossil fuel reserves), produce green revenues, and are better positioned for the physical risks posed by climate change and screening out securities based on an assessment of their adherence to international norms in relation to environmental protection, human rights, labour standards, anticorruption, tobacco, alcohol, adult entertainment, gambling and controversial weapons.

The Investment Manager and/or the Sub-Investment Manager, on behalf of the Fund, will invest actively with limited risk parameters relative to the Index, using the Sustainable Climate Quantitative Equity Strategy as further described in the "Investment Strategies" section of the Prospectus.

**Past performance is not a reliable indicator of future performance.**

**Investing involves risk including the risk of loss of capital.**

The performance figures contained herein are provided on a gross and net of fees basis. Gross of fees do not reflect the deduction of advisory or other fees which could reduce the return. Index returns reflect capital gains and losses, income, and the reinvestment of dividends. The performance includes the reinvestment of dividends and other corporate earnings and is calculated in the currency stated in the Fund Facts. Calendar year inception performance returns will be partial for the year where the inception date for either the Fund in question or the historic performance-linked Fund (whichever is the earliest) falls within that period. The calculation method for value added returns may show rounding differences. When the Fund is closed according to its official Net Asset Value (NAV) calendar but, nonetheless, a significant portion of the underlying security prices can be determined, a Technical NAV is calculated. Past Performance indicated herein has therefore been calculated using a Technical NAV when required, as well as the official NAV of the Fund as at each other business day for the relevant period.

If your account holds Russian securities and instruments, then as of the date of this publication, they have been fair valued. Such fair value may be zero. If your portfolio holds such Russian securities and instruments, then the portfolio may not be able to dispose of such securities and instruments depending on the relevant market, applicable sanctions requirements, and/or Russian capital controls or other counter measures. In such circumstances, the portfolio would continue to own and have exposure to Russian-related issuers and markets. Please refer to your portfolio holdings report.

## R-Factor™ Summary

R-Factor™ is built off a transparent scoring methodology that leverages the Sustainability Accounting Standards Board (SASB) Materiality Map, corporate governance codes, and inputs from four best-in-class ESG data providers. R-Factor supports the development of sustainable capital markets by giving investors the ability to invest in solutions that integrate financially material ESG data while incentivizing companies to improve their ESG practices and disclosure in areas that matter.

## Climate Metrics

Climate Metrics	Fund
Carbon Intensity (Direct + Indirect)	338.17
Weighted Average Carbon Intensity (Direct + Indirect)	253.24
Total Reserves Carbon Emissions	34.29
Scope 1 + 2 Carbon Emissions	4687330.42
TCFD Total Carbon Emissions**	94,977.63*
TCFD Carbon Footprint	104.49
TCFD Carbon Intensity	173.59
TCFD Weighted Average Carbon Intensity (WACI)	188.72
Brown Revenue %	2.36
Green Revenue %	19.02

See "Glossary" for detailed calculation notes such as missing data treatment, data lag and exclusions. Source: State Street Global Advisors, S&P Trucost, FactSet, Task Force on Climate-related Financial Disclosures (TCFD). The results are estimates based on assumptions and analysis made by State Street Global Advisors. They are not intended to represent actual results of any offering. Actual results may differ. \* The TCFD Total Carbon Emission metric allocates emissions to investors based on an equity ownership approach. In the case of commingled funds, the results represent the environmental responsibility of the entire fund's assets under management. For individual unitholder's responsibility, an apportioned responsibility can be calculated based on the individual holding percentage. \*\* The metric is not used to compare portfolios and benchmarks because the data is not normalised.

## Stewardship Profile

As of 31 Aug 2024

## Stewardship Profile

Q2 2024

<b>Number of Meetings Voted</b>	348
<b>Number of Countries</b>	29
<b>Management Proposals</b>	3,766
Votes "For"	83.94%
Votes "Against"	16.06%
<b>Shareholder Proposals</b>	169
With Management	95.86%
Against Management	4.14%

Figures are based on State Street Global Advisors' general approach to voting at the companies held by the Fund at quarter end. This information is not a substitute for a proxy voting report, which can be requested through your relationship manager. State Street Global Advisors' (SSGA) asset stewardship program is aimed at engaging with our fund companies on issues that impact long-term value creation across environmental, social and governance (ESG) considerations. In the recent past, SSGA has issued extensive guidance on key governance matters such as effective, independent board leadership. SSGA's current focus is on helping boards think about the possible impacts of environmental and social issues and incorporating a sustainability lens into boards' oversight of long-term strategy as a sound business practice.

The Sustainability information presented above intend to provide transparency to investors around sustainability characteristics of the fund. Presenting this information should not be construed as a representation of the fund's current or future investment objective, nor should it be viewed as an indicator of the fund manager's current or future investment decision-making.

For information regarding the fund's SFDR category, investors are encouraged to review the fund's [prospectus/KIID].

Investors should not evaluate an investment in the fund based solely on the information above, rather investors should consider other factors, including the fund's overall investment objective and risk profile. Investors are encouraged to review the fund's [https://www.ssga.com/fund-finder?tab=documents] for more information regarding the fund.

The third-party information above has been obtained from sources believed to be reliable as of the date indicated, but its accuracy is not guaranteed. SSGA is not liable for investment decisions based on this information and it should not be relied on as such. There is no representation or warranty as to the current accuracy, reliability or completeness of this information

#### R-Factor™

R-Factor™ is an ESG scoring system that leverages commonly accepted materiality frameworks to generate a unique ESG score for listed companies. The score is powered by ESG data from four different providers in an effort to improve overall coverage and remove biases inherent in existing scoring methodologies. R-Factor™ is designed to put companies in the driver's seat to help create sustainable markets.

**R-Factor™ Scores** are comparable across industries. The ESG and Corporate Governance (CorpGov) scores are designed to be based on issues that are material to a company's industry and regulatory region. A uniform grading scale allows for interpretation of the final company level score to allow for comparison across companies.

**The R-Factor™** scoring process comprises two underlying components. The first component is based on the framework published by the Sustainability Accounting Standards Board ("SASB"), which is used for all ESG aspects of the score other than those relating to corporate governance issues. The SASB framework attempts to identify ESG risks that are financially material to the issuer based on its industry classification. This component of the R-Factor™ score is determined using only those metrics from the ESG data providers that specifically address ESG risks identified by the SASB framework as being financially material to the issuer based on its industry classification.

The second component of the score, the CorpGov score, is generated using region-specific corporate governance codes developed by investors or regulators. The governance codes describe minimum corporate governance expectations of a particular region and typically address topics such as shareholder rights, board independence and executive compensation. This component of the R-Factor™ uses data provided by ISS Governance to assign a governance score to issuers according to these governance codes.

Responsible-Factor (R Factor) scoring is designed by State Street to reflect certain ESG characteristics and does not represent investment performance. Results generated out of the scoring model is based on sustainability and corporate governance dimensions of a scored entity.

The returns on a portfolio of securities which exclude companies that do not meet the portfolio's specified ESG criteria may trail the returns on a portfolio of securities which include such companies. A portfolio's ESG criteria may result in the portfolio investing in industry sectors or securities which underperform the market as a whole.

#### R-Factor™ Profile

Within each industry group, issuers are classified into five distinct ESG performance groups based on which percentile their R-Factor™ scores fall into. A company is classified in one of the five ESG performance classes (Laggard - 10% of universe, Underperformer - 20% of universe, Average Performer - 40% of universe, Outperformer - 20% of universe or Leader - 10% of universe) by comparing the company's R-Factor™ score against a band. R-Factor™ scores are normally distributed using normalized ratings on a 0-100 rating scale.

Discrepancy between the number of holdings in the R-Factor™ Summary versus the number of holdings in the regular reporting package may arise as the R-Factor™ Summary is counted based on number of issuers rather than number of holdings in the portfolio.

**Green Revenue %:** Percentage of revenues from green or low-carbon technology products/business, as classified by FTSE LCE system

**Brown Revenue (%):** Percentage of revenues from "brown" sectors, extractive sectors as classified by S&P Trucost

**TCFD Weighted Average Carbon Intensity** - Portfolio's exposure to carbon-intensive companies, expressed in tonnes CO2e / \$M revenue. Scope 1 and Scope 2 GHG emissions are allocated based on portfolio weights (the current value of the investment relative to the current portfolio value).

**TCFD Total Carbon Emissions** - The absolute greenhouse gas emissions associated with a portfolio, expressed in tonnes CO2e. Scope 1 and Scope 2 GHG emissions are allocated to investors based on an equity ownership approach.

**TCFD Carbon Footprint** - Total carbon emissions for a portfolio normalized by the market value of the portfolio, expressed in tonnes CO2e / \$M invested. Scope 1 and Scope 2 GHG emissions are allocated to investors based on an equity ownership approach.

**TCFD Carbon Intensity** - Volume of carbon emissions per million dollars of revenue (carbon efficiency of a portfolio), expressed in tonnes CO2e / \$M revenue. Scope 1 and Scope 2 GHG emissions are allocated to investors based on an equity ownership approach.

#### Gender Diversity

We are currently using FactSet's own "People" dataset to disclose the number of women on the board, for each company in the Fund's portfolio.

Data and metrics have been sourced as follows from the following contributors as of the date of this report, and are subject to their disclosures below. All other data has been sourced by SSGA.

**Trucost Sections** Carbon Intensity (Direct+Indirect), Weighted Average Carbon Intensity (Direct+Indirect), Total Carbon Emissions, Carbon Footprint.
