Notenstein Sustainable Bond CHF - PZ

Investment objective

Notenstein Sustainable Bond CHF aims to generate long-term, steady returns. It is attractive for investors with a medium-term investment horizon of at least three years or more who wish to take advantage of an enhanced risk analysis that includes environmental and social aspects.

Investment strategy

Notenstein Sustainable Bond CHF invests globally in first-class fixed-income securities, mainly denominated in Swiss francs, from countries, companies and other public and private issuers that promote sustainable business practices. First-class securities are those that have been awarded a credit rating of A or better, or the equivalent, from a recognised credit rating agency. The regional authorities whose bonds appear in the portfolio typically have relatively large environmental and social resources which they manage efficiently. The companies featured in the portfolio tend to exploit market opportunities that arise from the trend towards sustainable business practices. At the same time, as part of good corporate governance, they make every effort to reduce financial risk through careful management of environmental and social risks. Accordingly, bond issuers that are exposed to excessive environmental or social risks are excluded from the fund's investment universe.

Important information

Exclusion of liability: This document was produced by Vescore Ltd (hereinafter "Vescore"). However, Vescore provides no warranty or guarantee for its content or completeness and accepts no responsibility for losses or damages of any kind that arise directly or indirectly from the use of this document or the information contained herein. The opinions expressed in this document are those of Vescore at the time the document was prepared and may change at any time and without notification. Unless otherwise stated, all figures are unaudited.

For information purposes only: This document is provided for information purposes only and constitutes neither investment advice, nor an offer, nor a recommendation to buy financial instruments, nor does it exempt the recipient from the use of his own judgement.

Target group: This document and the information contained herein are addressed exclusively to investors who are not "US persons" as defined in Regulation S of the US Securities Act of 1933. Consequently, neither this document nor copies thereof may be sent or brought to the United States of America nor delivered to a US person.

Restrictions: This document is expressly not addressed to individuals whose nationality, domicile or other attributes would exclude them from the receipt of such information based on current regulations. When in doubt, we recommend that you contact a local distribution office or credit institute.

Special features in connection with collective capital investments

General information: Purchases of collective investment schemes are based on the prevailing version of the sales prospectus or fund contract as well as the Key Investor Information Document (KIID), in so far as these are available, in connection with the most recent annual or – where available – semi-annual report of the fund. The relevant documents can be obtained from Vescore.

Performance: Every investment is associated with risks, especially with regard to fluctuations in value and return. Collective capital investments are volatile and can also result in the total loss of the invested capital and any income. The performance data do not take account of the costs and commissions levied on subscriptions and redemptions of fund shares. Further, no guarantee can be given that the fund's performance will reach or exceed that of the benchmark. Positive performance in the past or an indication of such is no guarantee of positive performance in the future.

Foreign currencies: Investments in foreign currencies are exposed to currency fluctuations, and there is further risk that the foreign currency will decrease in value against the investor's reference currency.
