Fund Portrait

The JSS Sustainable Equity - SaraSelect aims to deliver long-term capital growth. To achieve this, the fund invests primarily in equities of small and mid-cap companies connected to Switzerland or Liechtenstein. Investments are made with a long-term and anti-cyclical perspective. The fund reaches its sustainability characteristics through an engagement approach by individually targeting selected companies to adopt more responsible environmental, social and governance (ESG) practices. The fund avoids investments in the JSS Exclusion list as well as laggards in their respective industry.

Review

Nervousness and therefore volatility in the markets have increased significantly in the run up to the US elections. Some market participants perceived the publication of the results for the third quarter very negatively. The overall market (SPI) lost 3.27% in the month under review. Small caps lost 3.28% and mid caps 3.78%. Large caps achieved a performance of -3.15%. The SaraSelect fund's overweight in global market leaders led to a performance of -7.91%. It thus lagged behind its benchmark index, which lost 3.74%. The monthly relative performance of the SaraSelect Fund portfolio was significantly influenced by the following positions. The largest positive contributions came from the underweight positions in Lindt & Sprüngli (33 bps), SoftwareOne (24 bps), VAT (23 bps) and Tecan (23 bps). Negative contributions came from Also (-91 bps), Sika (-68 bps), Pierer Mobility (-58 bps), Dätwyler (-51 bps) and LEM (-51 bps). It is hoped that the US elections will produce a clear result so that the focus can return to the fundamentals of the companies. A stalemate would be bad for the markets.

Outlook

Despite the low risk of a potential upcoming recession and all the existing political and economic uncertainties around Europe, the mid to longer-term outlook for the world economy remains healthy. Central banks around the world have stopped fighting inflation and are focusing much more on job reports and the macro developments. On a global basis, rates will therefore have to come down further. This environment should eventually be favorable to equity investments again. We think that markets could face some further turbulences but still represent a buying opportunity and a confirmation of the secular bull market. As market leaders in their global niches, Swiss companies should see continued higher market shares and rising order volumes.

Performance was calculated on the basis of net asset values (NAV) and gross dividends reinvested. When calculating performance, all the costs charged to the fund were included to give the net performance. The performance shown does not take account of any commissions and costs charged at the investor level when subscribing and redeeming units. Additional commissions, costs and taxes charged at the investor level have a negative impact on performance. Past performance is not a reliable guide to future performance. The value of your investment may go down as well as up. The return upon the investment will therefore necessarily be variable. Consequently, there is no guarantee that investors will get back the full amount of their invested capital upon redemption. Investments in foreign currencies involve a currency risk, as the return in the investor's currency may be higher or lower due to exchange rate fluctuations. The value of the investor's investment may therefore, as well as for other reasons, increase or decrease. Therefore, there is no guarantee that investors will receive back the full amount of their invested capital upon redemption.
