Fund Portrait

The JSS Commodity - Diversified (CHF) aims to realise long-term capital growth. To achieve this the fund invests in different commodities, mainly using derivatives transactions (e. g. futures). The investment in different commodities is selected with the aim of achieving optimal risk diversification and thus a reduction in risk. The following measures are intended to optimise risk diversification: 1. Equal weighting of the various commodity sectors (energy, agricultural products and metals, including gold); 2. Equal weighting of the individual commodities within a sector; 3. Selection of commodities that fluctuate as independently of each other as possible. Currencies other than the Swiss franc are largely hedged against the Swiss franc.
