# GR Aktien Schweiz -A-

30 November 2024

## Investment Policy

The fund invests into equity securities of companies which are part of the Swiss Performance Index (SPI). Stock selection is based on a bottom-up research process which also includes sustainability criteria (ESG). Core investments consist of high-quality companies which generate high levels of free cash flow and are reasonably priced. The fund consists of 35-45 companies.

## Market environment, performance analysis and portfolio activity

During the month of the US presidential elections, US indices saw significant gains, with the Russell 2000, which includes smaller US companies, rising by over 10%. The rally is based on hopes that the new administration will revive the US economy with less bureaucracy for these companies. On the other hand, Asian markets lost ground, while Europe showed a mixed picture. Not all can be attributed to the election outcome though. Largely, it just reflects the current discrepancies in the economic conditions across the different regions. The SPI index further declined in November.

The relative monthly performance was positively impacted by overweighted Galderma, Zurich Insurance and Partners Group as well as by underweighted Nestlé and Adecco. Negatively affected was the relative performance by overweighted Arbonia, Sensirion and Sika as well as by underweighted Swiss Re and Swissquote. In November, we increased our holdings in Novartis, SKAN, Aryzta and SGS.
