

Helvetia (CH) Swiss Property Fund.

Contractual investment fund under Swiss law of the type "real estate fund".

Investment objective and investment policy

The Helvetia (CH) Swiss Property Fund invests in attractive real estate assets in Switzerland, mainly in large cities and mid-sized towns and cities and their conurbations. The portfolio is mostly invested in residential properties, supplemented by mixed-use and commercial properties.

The fund holds the real estate property directly. Income and capital gains from directly held real estate property are taxed at the level of the real estate fund itself and are therefore generally tax-free for the unitholder.

The investment objective of the Helvetia (CH) Swiss Property Fund is to ensure an attractive long-term cash flow return.

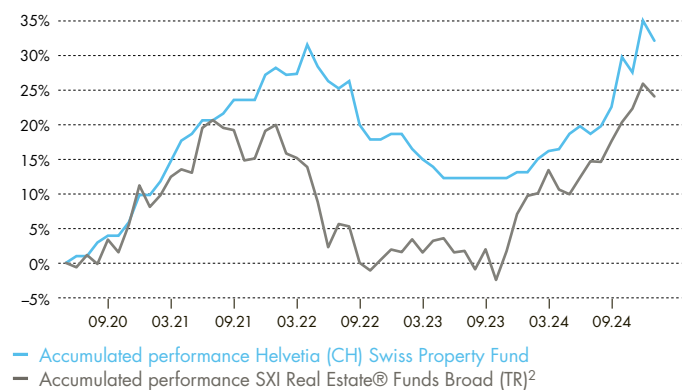

In addition to risk and return considerations, the fund management company also includes sustainability criteria in its investment strategy which in turn take account of the three sustainability dimensions – society, the economy and the environment – and are integrated into the entire property life cycle.
