

Swiss Rock Swiss Equity Index Plus - B

Date as at end of September 2024

Investment policy

The "Swiss Rock Aktien Schweiz Index Plus" fund corresponds to the SPI in terms of return and risk characteristics, from which it deviates specifically in order to generate an additional return. The stock-specific weighting deviations between the fund and the SPI may not exceed 1 percentage point. The basis for the active positioning is a proprietary factor model that Swiss Rock has been using successfully for more than 10 years and is constantly developing. The fund is particularly interesting for investors seeking "exposure" to the capitalisation-weighted Swiss equity market.
