Investment focus and suitability

The fund invests mainly in shares and equity stocks in companies based outside Switzerland. The investment policy aims at long-term capital growth with simultaneous risk diversification. The investment philosophy is guided by the three style effects of valuation, capitalisation and momentum. They are applied at the levels of regions, topics, sectors and for individual stocks. The individual stock weightings are limited systematically and relative to the index. The fund is targeted exclusively to qualified investors.

Past performance, especially over short periods, does not predict future returns
