Investment focus and suitability

The fund invests in Swiss stocks with the SPI as the starting basis. Stock picking is geared towards the strengths of the Swiss economy. With a weighting of 70% SMI stocks and 30% secondary stocks, investments are made in the major global leaders; international niche suppliers are also taken into account. The stock picking procedure follows the bottom-up principle and therefore no index orientation when defining the stock weightings. The fund is intended for risk-aware stock investors convinced of the medium- to long-term potential of Swiss companies. The fund is targeted exclusively to qualified investors.

Past performance, especially over short periods, does not predict future returns.
