Monthly commentary

That's it... 2024 was a good to very good year for the stock markets, with the exception of the French market. The CAC 40 fell by around 3%, while all the other major international markets recorded more or less significant gains. This month we turned our attention to South Korea, where a sad human tragedy, a serious democratic crisis and entertainment made the headlines. While the second season of Squid Game made it into the top 10 Netflix series, institutions are facing a worrying democratic instability. This country risk is a threat we do not want to carry in the Fund. We therefore sold our only position in the Kospi 200 with a profit at 100.72. The Fund closed the year at CHF 118.09, giving an annualised performance of +3.91% and volatility of 1.02%. Over three years, the annualised performance was +5.76% with a volatility of 5.24%.

Investment policy

The objective of the fund is to provide an efficient investment in a diversified portfolio of structured products of the Barrier Reverse Convertible type based exclusively on equity indices of the major developed countries (so-called multi-index products). This strategy implements a systematic sale of exotic options, thus capturing overvalued risk premiums. The fund aims for absolute capital growth.
