Credit Allocation - A (USD) ISIN (LU1785454775)

An unconstrained fixed income strategy aiming to achieve positive absolute returns throughout market cycles.

OBJECTIVES & INVESTMENT POLICY

The objective of the Sub-Fund is to achieve positive absolute returns throughout market cycles. The strategy is unconstrained, investing in debt securities of any type. It considers the entire fixed income universe from investment grade to distressed debt to identify specific situations or mispriced securities. The choice of investments is not limited to a geographic sector, a particular sector of economic activity or a given currency. The strategy's flexible and unconstrained approach allows it to allocate capital wherever there is value in the fixed income universe on a dynamic and consistent basis. The investment approach is bottom-up based on in-depth credit analysis. The Sub-Fund's risk exposure, cash levels, duration and yield are dynamically managed, offering downside protection. The Compartment is actively managed without reference to any benchmark index.

CUMULATIVE RETURN SINCE INCEPTION (as at 31/05/2024)

Past performance must not be considered an indicator or guarantee of future performance. All performance data are based on net performance and take no account of commissions, fees or other costs charged when units are issued and redeemed. The return of the Fund may go down as well as up due to changes in rates of exchange between currencies. Future performance is subject to taxation which depends on the personal situation of each investor and which may change in the future.

MONTHLY COMMENT

The Credit Allocation Fund rose in value in May, and as a result is now up on a year-to-date basis. It rose over the month thanks to rates falling and credit spreads narrowing slightly. In fact, the credit spreads of high-yield and investment-grade corporate bonds and subordinated bank debt have tightened to levels not seen since January 2022. We are therefore adopting a highly selective approach to credit

In May we took profit on some corporate bonds that had previously performed well but were beginning to show signs of limited future upside. For instance, we exited Syneos 9% 2030 bonds, which had achieved a 10% return in just eight months. We did so as we believed it had limited further potential in the short to medium term and as recent earnings reports have been highlighting pricing pressures. We are open to reinvesting in the bond at a more attractive valuation.

The fund remains well balanced, with around 30% of its assets in high yield and special situation investments and the remaining 70% in investment grade. The portfolio's allocation to liquid investments enables us to capitalise on opportunities as they arise.

The portfolio currently provides a yield of 6.85% in US dollar terms.

Overview at month-end:

- Yield to maturity: 6.85%
- Modified duration: 4.90 years
- Average rating: BBB+
- Cash (and liquid investments): 10%
