

NCM Global Equity Selection USD Dist

October 31, 2024

NCM Global Equity Selection is an open-end fund incorporated in Switzerland. The Fund's objective is to achieve long-term capital appreciation measured in US Dollar. The Fund invests mainly in large cap companies globally, including emerging markets. The investment process is a combination of a top-down approach to identify geographical and sectorial opportunities, and a bottom-up stock picking based on our selection models.

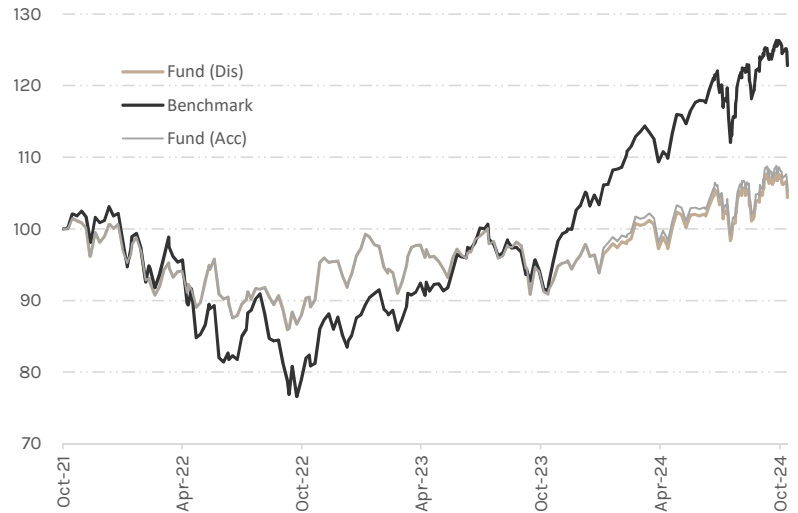

Fund Managers view

In October, markets experienced significant volatility, with growth risks remaining top of mind for investors despite resilience in the US economy. Uncertainty around the upcoming US election further added to the market's cautious sentiment. The Fed's 50-basis-point rate cut in September highlighted the challenge of achieving equilibrium between a strong labor market and price stability. Further rate cuts are anticipated in November and possibly December.

During this period, the fund retreated by -3.07%, underperforming the benchmark, which declined by -1.91%. Positive contributions to performance primarily stemmed from our exposure to US financials and selected names within the US communication services sector, as well as our investments in gold miners. Our overweight position in the Chinese emerging markets sector weighed on fund performance, as the bullish momentum observed in September partially reversed in October. Similarly, our holdings in the healthcare sector had a negative impact on results for the month. In response to these dynamics, we have reduced our exposure to the US energy sector and strategically added positions in select US consumer discretionary stocks, Swiss technology, and European healthcare companies.

Net Performance Since Inception

For comparison purposes versus a "total return" benchmark, the Accumulative share class is also indicated in grey on the chart
