Investment policy

The fund's objective is to mirror the long-term performance of gold. It invests in gold that not only originates from sustainably operated artisan mines but is also Fairtrade-certified. The fund's assets are backed by physical gold bars that are kept securely in Basler Kantonalbank's vaults.

The fund is suitable for investors who

- would like to benefit from the long-term increase in the gold price,
- would like to invest specifically in Fairtrade-certified gold to protect people and the environment,
- would like to secure their investments during times of crisis and/or protect them from inflation,
- would like to reinforce their portfolio using gold as a diversification because it has only a slight correlation with other asset classes such as equities or bonds.
