

About the Fund

The Colchester Emerging Local Currency Bond FCP (the Fund) is an investment fund governed by Swiss law established under the "Other Funds for Traditional Investments" category of the Swiss Collective Investment Act of 23 June 2006. The fund contract has been approved by the Swiss Financial Market Supervisory Authority (FINMA).

The Fund is recognised for sale to qualified investors in Switzerland. The Investment Manager is Colchester Global Investors Limited.

Objective and Investment Policy Summary

The investment objective of the fund is primarily to achieve favourable income and capital returns from a globally diversified portfolio of primarily sovereign emerging market debt and currencies. An associated objective is the preservation and enhancement of principal.

The fund will invest primarily in sovereign local market debt of emerging markets that are issued in the local currency of the issuer but may also invest in debt securities denominated in or exposed to developed market currencies. Emerging markets are defined for these purposes as all countries included in the J.P.Morgan GBI-EM Global Diversified Index (Benchmark), or countries that are not defined as "developed markets" by MSCI All Country World Index. A list of countries classified as "developed markets" by MSCI All Country World Index is available on <https://www.msci.com/acwi>. Further details of the Fund's Investment Objective and Policy can be found in the Fund Prospectus with integrated fund contract (Prospectus).

There is no guarantee that this investment objective will be met.

Risks of Investing in the Fund

Past returns are not a prediction or guarantee of future returns. The value of shares in the Fund may go down as well as up. An investment in the Fund involves the risk of loss, including the loss of the entire amount invested.

This factsheet is a marketing communication and is qualified in its entirety by reference to the more complete information contained in the Fund's Key Information Document (KID) and Prospectus. Information on the Fund's Risk and Reward Profile is set out in the KID. Further information on the risks faced by investors in the Fund is included in the Prospectus. The Prospectus and the KID are available on request or at www.fundinfo.com. You should refer to the detail in them before taking any investment decision. The information provided in this factsheet does not disclose all of the risks and other significant aspects of investing in the Fund. You should refer to the risk disclosures provided to you by your advisor or other intermediary. An investment in the Fund may not be suitable for all investors. Please note the Fund's privacy and proxy voting policies are circulated to investors and are available upon request. Please contact any of our offices for further information.

The principal risks of investing in the Fund are:

- The risk of loss of value arising where a bond issuer cannot pay interest or repay the amount invested when due. There is an additional risk in investing in bonds issued by governments because there may be difficulties in suing a government or country where it does not pay interest or repay the amount invested when due.
- The risk that a bond cannot be sold easily, quickly or at a good price. This risk may be higher where the Fund invests in bonds where the interest and amount invested in these bonds is adjusted to compensate for the impact of inflation or where a bond is issued by the government of an emerging market country.
- The risk of loss, bankruptcy or nationalization of any sub-custodian, registration agent or broker, or where ownership records are not maintained or respected.
- The risk of loss as a result of changes in currency exchange rates because the Fund invests in bonds and currencies other than the Class Currency of this Share Class. This Share Class will not seek to reduce this risk through currency hedging.

Benchmark Information

The fund is actively managed against, and its performance measured against, the J.P. Morgan Government Bond Index-Emerging Markets (GBI-EM) Global Diversified. The Benchmark consists of local currency government debt, from emerging market countries, issued in markets accessible to foreign investors. If the Class Currency of a Class differs from the Base Currency of the Fund, the performance of that Class will be measured against the Benchmark expressed in the Class Currency. A Hedged Class will be measured against the Benchmark in hedged terms. Please see page 4 for additional benchmark information.

Important Information

Capitalised terms used in this factsheet without definition have the meaning given in the Prospectus. Investors should read this information with the details in the KID and Prospectus and seek advice before making an investment in the Fund. Past performance is no guarantee of future performance and the value of any investment may fall as well as rise. Investment in the Fund puts your capital at risk. You may lose some or all of your investment.

Net of fee returns reflect the deduction of fees and expenses and are calculated on the basis of the applicable fee rates as described in the Prospectus. Additional information regarding policies and procedures for calculating and reporting returns is also available on request. Where any part of the total cost of your investment is paid in, or represents an amount of, a currency other than the Share Class currency, these costs may increase or diminish as a result of currency and exchange rate fluctuations.

Where an investor's own currency is different from the Fund currency, the return on investments could be affected by fluctuations in the exchange rate.

Nothing in this factsheet should be construed as providing any type of investment, tax or other advice, or be considered a solicitation, recommendation, endorsement or offer to purchase or sell any financial instrument.

The Fund can invest in bonds (which may include inflation linked bonds) issued by governments, government agencies and supra-national agencies (such as the World Bank), irrespective of whether such bonds are included in the benchmark. The Fund will tend to purchase bonds with characteristics similar to those in the benchmark however, the investment strategy can lead to significant deviation from the benchmark in terms of country and currency weightings and duration, which can cause the return of the Fund to differ significantly from that of the benchmark. The Fund can invest in currencies using contracts on the spot and forward market, such as forward currency contracts (contracts to buy or sell a currency at a specified future time at an agreed price).
