

Barron *Equity* Fund

Factsheet, as of 31/12/2024

Investment Objective

The fund's investment objective is to achieve long-term capital growth through active investment in equities and flexible management of the equity portion.

- Recommended minimum holding period: 5 years

Investment Policy

The fund invests with an active investment approach directly and indirectly worldwide primarily in equities of large and medium-sized companies. The main investment regions are Switzerland, Europe, and North America.

For direct investments in equities, the investment focus is mainly on selecting companies with first-class, high-capitalized business models that grow above average and reliably, demonstrate high profitability and stability, and are led by entrepreneurially acting management teams.

However, the implementation of the investment policy can also be carried out wholly or partially indirectly through investments in derivatives, structured products, and investment funds, mainly using index-based products (e.g., ETFs or futures).

A significant management criterion is also the flexible management of the fund's equity portion. In case of a negative market assessment or in a difficult environment for equity investments (unfavorable market phases or cycles), the equity exposure can temporarily be reduced to below 51% of the fund assets.

Risk Rating

Low		Medium			High	
1	2	3	4	5	6	7

This risk indicator assumes you hold the fund for 5 years (recommended holding period). If you sell the investment early, the actual risk can be significantly different, and you may get back less.
