52 Week Low	EUR	133.53
Total Assets in mn	EUR	482.42 (all classes of the fund)
Number of Shares		510'012

Investment Objective and Investment Policy

The objective of the fund is to achieve a reasonable and inflation-resistant return over the medium to long term through a broadly diversified portfolio of equities, commodities, bonds and money market instruments. To reduce risk, large individual bets are avoided and the portfolio is regularly rebalanced.

Characteristics

The fund is suitable for investors with a medium risk tolerance who are looking for long-term participation in the equity and commodity markets as well as inflation protection through real assets.

Investment Manager's Comment

Thanks to commodities and interest income, the fund was able to keep pace with the benchmark index in May despite an unfavorable performance on the equity side. Defensive quality stocks remain unpopular and we further increased our exposure in this area with the cosmetics retailer Ulta Beauty, the payment processor PayPal and the Mexican beverage and convenience store group Femsa. We sold Burberry and Technip Energies, two rather cyclical stocks whose fair values we had to revise downwards.
