Objectives and investment universe

Asset class	Bonds
Category	Government Securities

The BCV Global Government Bonds Hedged sub-fund seeks capital preservation and regular income with a risk/return profile similar to that of global government bond indices.

The objective of the sub-fund is to outperform its benchmark over the long term, composed of government securities in local currencies.

The portfolio is actively managed through a comprehensive analysis of the fundamentals of the countries concerned, as well as an evaluation of its maturities and the related interest rate and exchange rate risks. The management uses a top-down approach supplemented by a fundamental analysis, in order to identify the best investment opportunities while favouring quality with investment grade issues.

This Fund is intended for investors seeking to diversify their assets into international government bonds with the Swiss franc as their money of reference. Currency risks against the Swiss franc are systematically hedged.

Class Z: open to qualified investors who have previously concluded a specific written agreement with BCV for separate payment of the remuneration for its asset management activities.
