## Objectives and investment universe

Asset class	Bonds
Category	World
Range	ESG

The BCV Global Corporate Bonds ESG Hedged sub-fund is intended for investors with a defensive profile seeking regular income. Its objective is to outperform its benchmark index over the long term by applying dynamic management of the sector allocation, credit and interest rate risks, by investing in investment grade corporate bonds worldwide. The securities selection is based on a systematic approach reinforced by a bottom-up analysis, allowing high conviction names to be included in the portfolio. A top-down view completes the management process. Currency risks are systematically hedged against the Swiss franc.

The manager considers environmental, social and governance (ESG) criteria in its investment selection and portfolio construction process. The ESG approaches applied are mentioned at the bottom of the page.

Class (CHF) C: open to investors who subscribe and maintain a minimum of CHF 30 million. Swiss franc is the reference currency

## Fund facts

Legal structure	Mutual Fund
Fund domicile	Switzerland
Fund manager	David Wehrli Julien Marcel
Benchmark	BBG Gl. Aggr. Corp. TR H CHF
Launch date	05.09.2023
Security number / ISIN	128198219 / CH1281982194
Base currency	CHF
Liquidity	Daily
NAV	CHF 101.63
High / Low 2024	CHF 104.48 / 100.81
Fund assets in million	CHF 158.26
Flat fee	0.35%
TER as of 30.09.2024	0.35%
Last distribution (gross)	CHF 2.00

Incidental subscription/redemption fees (in favour of the fund) : 0.30% / 0.20%

## Product ranges

Our socially responsible investment (SRI) policy (see [bcv.ch/en/sri](http://bcv.ch/en/sri)) presents BCV's principles regarding environmental, social, and governance (ESG) criteria and describes how we apply those criteria to investments. The policy covers all our investment products and services that relate to sustainability. Our investment offering consists of a standard product range and two ESG-specific ranges. We use different investment approaches and sustainability objectives for each of these ranges in order to meet our investors' respective expectations.

- In our standard range, investment decisions are based primarily on financial objectives. ESG-related constraints are not systematically taken into account.
- With our ESG range, we consider a company's exposure to ESG risks and how those risks are managed. This helps reduce exposure to controversial activities and make portfolios more resilient to ESG risks over the long term.
- For our ESG Ambition range, we apply the same approach as for the ESG range but go one step further by allocating part of the assets to investments that will help drive positive change. One of the main ways we do this is through thematic products.

The fund belongs to one of the three product ranges described above. In addition, information about any ESG methodologies incorporated into its investment policy can be found in the fund's legal documentation.

**Products in the ESG and ESG Ambition ranges apply at least two of the SRI approaches described below. Portfolios may include companies active in such sectors as the extraction of fossil fuels (oil and gas), aviation, or chemical manufacturing.**

## Socially Responsible Investment (SRI) Approaches

### Exclusion

This approach entails deliberately excluding companies or issuers that are involved in business activities or practices that violate certain norms and values (based on stakeholders' preferences) or that pose risks.

### ESG Integration

With this approach, ESG risks and opportunities are systematically integrated into traditional financial analysis and investment decisions based on appropriate research sources. ESG information is part and parcel of the investment analysis process and can be incorporated into standard financial indicators.

### Positive screening and best-in-class selection

Here, bond issuers and companies are selected based on their ESG scores or other ESG metrics. There are two main ways to do this:

- **Positive screening:** Companies with good sustainability credentials are selected based on their ESG scores or indicators – companies with high ESG scores or indicators are overweighted and those with lower scores or indicators are underweighted. The aim is to build a portfolio with an ESG score or indicator that is, on average, higher than that of the benchmark index.
- **Best-in-class selection:** A company's ESG performance is compared with that of its peers (e.g., other firms in the same sector) based on sustainability assessments and data. Any company or issuer with an ESG score or metric above a given threshold is considered investable. The level at which the threshold is set determines the size of the post-screening investment universe.

### Stewardship (active ownership)

Stewardship refers to two separate but related approaches:

- Actively exercising shareholder voting rights based on ESG principles or an ESG policy;
- Shareholder engagement, whereby investors dialogue with the management of investee companies to convince them to take ESG criteria into account and make changes to their strategy and processes in order to improve their ESG performance and reduce risks.

### Thematic investments

These are investments in companies that provide solutions to environmental and social issues, such as those described in the Sustainable Development Goals.

### Impact investing

With this approach, the aim is to generate a measurable social or environmental impact alongside a financial return.

Several factors distinguish this approach from other SRI approaches (such as thematic investments):

- Intentionality, i.e. the desire to invest in a sector or activity that can generate a positive impact;
- A management process capable of generating a positive impact;
- Measurability, i.e. the ability to measure impact using relevant key performance indicators (KPIs).
