

OVERALL MORNINGSTAR RATING™

Out of 621 funds as of 30/04/2024

MORNINGSTAR SUSTAINABILITY RATING™

Out of 610 Healthcare Sector Equity funds as of 31/03/2024. Based on 100% of eligible corporate AUM and 0% of eligible sovereign AUM. Data is based on long positions only.

Investment Objective

The investment objective of the Kieger UCITS Fund - Kieger Sustainable Healthcare Fund is to achieve long term capital growth by principally investing in equities of healthcare and healthcare-related issuers worldwide (including Emerging Markets). The fund is actively managed by the Investment Manager who employs a proprietary environmental, social and governance ("ESG") analysis framework to assess companies, and takes this into consideration when making investment decisions.

SFDR classification: Article 9

The fund has sustainable investment as its objective.

Manager Commentary

Market review: The end of spring was the scene for unsteady markets, with large moves across sectors. In the healthcare space, markets were moved by the news releases from many scientific conferences. At ASCO, antibody-drug conjugates and combo therapies stole the show, with options and better treatment constantly improving for patients. The EASL (hepatology) EULAR (rheumatology), and ADA (diabetes) conferences have shown that groundbreaking research is also happening outside of oncology. In particular, early but highly promising data for application cell therapies in diabetes and lupus treatment were presented at these conferences. The month also featured various investor conferences, giving markets an insight of the direction of travel for the second half of the year. The FDA was also active during the month, with multiple approvals and advisory committees held. Among other decisions, an FDA advisory committee voted against an MDMA (psychedelic drug) treatment which had been investigated to treat post traumatic stress disorder (PTSD). While the advisory panel clearly expressed the potential benefit of psychedelic therapies, it also emphasized that well run clinical trials will be needed for approval and its comments will help inform decisions around future clinical development strategies. Overall, we continue to see all systems go for the healthcare sector, driven by sustained demand and innovation.

Portfolio changes: We initiated a position in Humana and no position was exited.

Performance review: The largest attributors vs. the index were Moderna (+11 bps / Not invested), Biomarin (+11 bps / presented new phase 3, four-year data from the GENE8-1 trial of Roctavian) and Intuitive Surgical (+11 bps / No specific news). The largest detractors vs. the index were GSK (-36 bps / On June 1, Bloomberg published an article saying "GSK, Pfizer Must Face Zantac Cases in Delaware, Judge Rules" stating that "About 75,000 suits filed in state after federal cases tossed." GSK has appealed the ruling), Eli Lilly (-29 bps / The stock rose 11.1% in June, we are underweighted vs the index) and Centene (-21 bps / No specific news, overall weakness of managed care stocks).

ESG: Firms in the portfolio did not report any material ESG issues in June.

In particular, the information may not be made available to US citizens or persons residing in the USA. This document may not be copied or used for other purposes, nor may the content of the document be forwarded to third parties.

Morningstar Disclosures:

Morningstar Rating is for the A USD Acc share class only; other classes may have different performance characteristics. Morningstar rates funds from one to five stars based on how well they've performed (after adjusting for risk) in comparison to similar funds. Within each Morningstar Category, the top 10% of funds receive five stars, the next 22.5% four stars, the middle 35% three stars, the next 22.5% two stars, and the bottom 10% receive one star. Funds are rated for up to three time periods—three-, five-, and 10 years—and these ratings are combined to produce an overall rating. Funds with less than three years of history are not rated. Ratings are objective, based entirely on a mathematical evaluation of past performance. They're a useful tool for identifying funds worthy of further research, but shouldn't be considered buy or sell recommendations.

The Morningstar (R) Sustainability RatingTM is intended to measure how well the issuing companies or countries of the securities within a fund's portfolio are managing their financially material environmental, social and governance, or ESG, risks relative to the fund's Morningstar Global Category peers. Morningstar assigns Sustainability Ratings by combining a portfolio's Corporate Sustainability Rating and Sovereign Sustainability Rating proportional to the relative weight of the (long only) corporate and sovereign positions. Corporate and Sovereign Score and Investment Style as of 31-03-2023. Morningstar's Sustainability Score incorporates Sustainability's company and country-level analysis.

The Morningstar Style BoxTM is a nine-square grid that, for equity funds, depicts three investment style (value, growth, and core) for each of three size categories (small, mid, and large). The Style Box provides an easy-to-follow visual representation of fund characteristics and enables informed comparisons and portfolio construction based on what funds actually hold.
