## ABOUT THE FUND

The Fund seeks to grow your capital and generate income primarily by investing in equities issued by companies having their registered office in Emerging Countries .

It is an actively managed, relatively concentrated portfolio of stocks (typically containing less than 50 names).

The Fund addresses the fastest growing part of the "sustainable" investment universe - i.e. socially responsible investing. The investment process draws from the collaboration of the investment manager (Union Bancaire Privée, UBP SA) with Cambridge Institute for Sustainability Leadership ("CISL").\*

\*CISL is not involved in the stock selection of this Fund.

The Fund may invest up to:

- 100% of its net assets in Small and Mid-Capitalization

- 25% of its net assets in China A share through the Shanghai Hong Kong Stock Connect.

## PERFORMANCE EVOLUTION GBP (NET OF FEES)

— UBAM - POSITIVE IMPACT EMERGING EQUITY

Performance over 10 years or since inception. Source of data: UBP. Exchange rate fluctuations can have a positive or a negative impact on performance. Past performance is not a reliable indicator of future results. The value of investments can fall as well as rise.

Since launch. Source of data: UBP. Exchange rate fluctuations can have a positive or a negative impact on performance. Past performance is not a reliable indicator of future results. The value of investments can fall as well as rise. Past performance figures are stated in the currency of the share class and calculated with dividends reinvested; they are free of ongoing charges. The calculation does not take into account sales commissions and other fees, taxes and applicable costs to be paid by the investor. For example, with an investment of EUR 100, the actual investment would amount to EUR 99 in the case of an entrance fee of 1%. At investor level, additional costs may also be incurred (e. g. front-end load or custody fee charged by the financial intermediary).

## GLOSSARY

### Benchmark

Index used as basis for measuring the performance of an investment fund. Also called reference index or comparison index.

### Volatility

Volatility is a statistical measure of the dispersion of returns for a given security or market index. In most cases the higher the volatility the riskier the security. Computed over the last 10 years or since inception.

over the last 10 years or since inception.

### Tracking error

The tracking error measures how close security or portfolio returns are to benchmark returns over time. The TE can be viewed as an indicator of how actively a fund is managed and its corresponding risk level. Computed over the last 10 years or since inception.
