Since launch. Source of data: UBP. Exchange rate fluctuations can have a positive or a negative impact on performance. Past performance is not a reliable indicator of future results. The value of investments can fall as well as rise. Past performance figures are stated in the currency of the share class and calculated with dividends reinvested; they are free of ongoing charges. The calculation does not take into account sales commissions and other fees, taxes and applicable costs to be paid by the investor. For example, with an investment of EUR 100, the actual investment would amount to EUR 99 in the case of an entrance fee of 1%. At investor level, additional costs may also be incurred (e. g. front-end load or custody fee charged by the financial intermediary).

ABOUT THE FUND

The Fund seeks to grow capital and generate income primarily by investing in regulated UCITS and non-UCITS funds which have as investment objective to invest in bonds and other debt securities between 50% and 90% and in equities and other similar transferable securities between 10% and 50%. The non UCITS funds will be submitted to a regulatory supervision equivalent to a UCITS.

The Fund is actively managed and well diversified, investing mainly in securities denominated in US Dollars, but some foreign currency exposure may be taken. These investments may or may not be hedged at the investment Manager discretion.

The principal objective of this Fund is to responsibly capture investment opportunities by investing its assets in a diversified portfolio of funds having a sustainability component.

Funds are selected in a multi-level review process based on both positive and negative criteria (exclusion). Sustainable research relies on the Investment Manager's proprietary ESG analysis which focuses on a thorough understanding of how responsible selected funds are but also the asset management firms managing those funds. Results are confronted with third party ESG ratings. Then, integration of sustainability considerations is done at 3 levels:

- Level 1: Exclusion criteria (negative screening)
- Level 2: Inclusion approach (positive screening)
- Level 3: Portfolio construction

GLOSSARY

Multifunds

Multi-manager investment strategy that is a pooled investment fund investing in other types of funds. In other words, its portfolio contains underlying portfolios of other funds. These holdings replace any direct investment in bonds, stocks, and other types of securities.

Aggregate Fixed Income

The Aggregate Fixed Income bucket includes Treasury, government-related, corporate and securitised fixed-rate bonds from both developed and emerging market issuers.

Derivatives

Derivatives are financial instruments whose prices depend on the price movements in a reference variable known as the underlying. Underlying assets can be shares, equity indices, government bonds, currencies, interest rates, commodities like wheat and gold, or swaps. Derivative financial instruments may be unconditional forward transactions or they

may be options. They are traded either on futures and options exchanges on standardised terms, or over the counter (OTC) on freely negotiated terms. Under certain circumstances changes in the price of the underlying can lead to considerably higher price fluctuations in the derivative. Derivatives can be used to hedge against financial risks, to speculate on price changes (trading), or to take advantage of price differences between markets (arbitrage).

Thematic Fixed Income

The Thematic Fixed Income bucket expresses the team's views on specific segments of the fixed income market and can be very different from traditional fixed income indices.

Absolute Return Fixed Income

The Absolute Return Fixed Income bucket aims at generating returns with a low correlation to the broad fixed income market.
