### ABOUT THE FUND

The dual management of the portfolio, Partners Group for private debt and UBP for liquid public debt, enables investors to access Partners Group's global platform for sourcing private debt transactions and UBP's expertise in managing high liquidity income strategies.

The Fund offers a unique liquidity feature. The strategy is more nimble than a similar stand-alone private debt portfolio with respect to managing inflows and outflows thanks to the liquid fixed income allocation managed by UBP.

The Fund can invest across private debt segments: senior loans 1st and 2nd lien, mezzanine debt, real estate and infrastructure debt.

Since launch. Source of data: UBP. Exchange rate fluctuations can have a positive or a negative impact on performance. Past performance is not a reliable indicator of future results. The value of investments can fall as well as rise. Past performance figures are stated in the currency of the share class and calculated with dividends reinvested; they are free of ongoing charges. The calculation does not take into account sales commissions and other fees, taxes and applicable costs to be paid by the investor. For example, with an investment of EUR 100, the actual investment would amount to EUR 99 in the case of an entrance fee of 1%. At investor level, additional costs may also be incurred (e. g. front-end load or custody fee charged by the financial intermediary). YTD: Year-to-Date

### SPECIFIC RISKS

Counterparty risk, credit risk, liquidity risk, currency risk

Private debt funds may experience lower liquidity terms than their official fund NAV frequency in consideration of the illiquidity of the underlying assets as well as corresponding gating restrictions. Any imposition of gating restrictions in private debt funds invested will reduce the liquidity of the Sub-Fund.

Further information on the fund's potential risks can be found in the prospectus. Any capital invested may be at risk and investors may not get back some or all of their original capital.

**GLOSSARY**

**Yield**  
 The yield is the income return on an investment, such as the interest or dividends received from holding a particular security. The yield is usually expressed as an annual percentage rate based on the investment's cost, current market value or face value.

**Duration**  
 Duration is the average time to payout. This key figure is used to measure the influence of interest rate movements on the price of a bond or bond fund. Duration is defined in years (e.g. 3-year duration means that the value of a bond would increase by 3% if interest rates fall by 1% and vice versa).

**Private Debt**  
 Private Debt is a form of financing of companies and assets (e.g. infrastructure or real estate). Private Debt typically involves direct lending to corporates (as opposed to via public markets or via bank syndication) and lending to Leveraged Buyout (LBO) companies.

**Credit risk**  
 The Fund invests in bonds, cash or other money market instruments. There is a risk that

the issuer may default ; the likelihood of this happening will depend on the creditworthiness of the issuer.

**Liquidity risk**  
 There are liquidity risks when a specific security is difficult to buy or sell. If there is a high volume of transactions or if markets are partially illiquid (notably in the event of many instruments traded on an individual basis), it may prove to be impossible to carry out a transaction or unwind a position at a beneficial stock price under certain circumstances.

**Counterparty risk**  
 The probability that the other party in an investment, credit, or trading transaction may not fulfill its part of the deal and may default on the contractual obligations.

**Currency risk**  
 The Fund invests in overseas markets. It can be affected by changes in exchange rates which may cause the value of your investment to decrease or increase.

Private Debt Funds: When investing in Private debt funds, there is no assurance that the liquidity of the investments of such UCIs will always be sufficient to meet redemption requests as and when made. Any lack of liquidity may affect the liquidity of the shares of the Fund and the value of its investments. Private market investments typically display uncertainties which do not exist to the same extent in other investments (e.g. listed securities). Further, private market investments are often illiquid long-term investments that do not display the liquidity or transparency characteristics often found in other investments (e.g. listed securities). Certain investments are valued on the basis of estimated prices and therefore subject to potentially greater pricing uncertainties than listed securities. In addition, private debt funds may not be able to sell their assets when it desires to do so or to realize what it perceives to be their fair value upon a sale. Investors should be aware that the portfolio of the Sub-Fund will be subject to high market risks and no assurance can be given that the investment objectives of this Sub-Fund will be achieved. Investors should carefully read the Fund and Sub-Fund's risk warnings IN PARTICULAR THE SPECIFIC RISKS CONCERNING PRIVATE DEBT MARKET stated in the prospectus before investing in the Sub-Fund.

This document may refer to the past performance of investment interests. Past performance is not a guide to current or future results. The value of investment interests can fall as well as rise. Any capital invested may be at risk and you may not get back some or all of your original capital. In addition, any performance data included in this document does not take into account fees and expenses charged on issuance and redemption of securities nor any taxes that may be levied. Changes in exchange rates may cause increases or decreases in your return. All statements other than statements of historical fact in this document are 'forward-looking statements'. Forward-looking statements are not guarantees of future performance. The financial projections included in this document do not represent forecasts or budgets, but are purely illustrative examples based on a series of current expectations and assumptions which may not

eventuate. The actual performance, results, financial condition and prospects of an investment interest may differ materially from those expressed or implied by the forward-looking statements in this document as the projected or targeted returns are inherently subject to significant economic, market and other uncertainties that may adversely affect performance.
