

VTWM Special Funds SICAV-SIF - Global High Yield Bond Fund - CHF

30.09.2024

Investment Strategy

The VTWM Global High Yield Bond Fund seeks maximum total return, consistent with preservation of capital and prudent investment management. It invests primarily in USD or CHF denominated high yielding corporate bonds globally. Its share-classes are predominantly hedged into their respective base currencies. The investment approach is based on the analysis of issuer level fundamentals but takes into account top-down macroeconomic views. The fund manager seeks to identify the most attractive high yield opportunities across geographic regions and industry sectors. A rigorous risk mitigation process aims to limit the fund's volatility as well as the risk of permanent capital loss. The fund is benchmark agnostic and will invest on the frontier between the investment grade bond universe and non-investment grade bonds.

Performance of the last 12 months:	10.35%
Performance since share class inception:	-6.84%

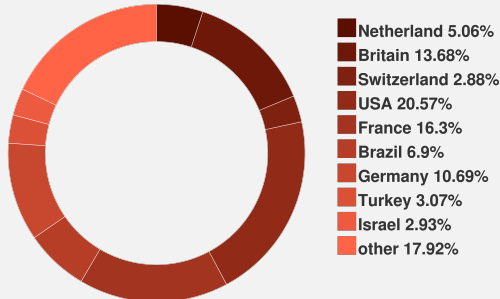

Fund Manager's Commentary

In September 2024, global bond markets experienced notable activity. Investment-grade bonds saw strong demand, driven by favourable economic conditions and a supportive monetary environment. Issuances surpassed \$24 billion, with deals heavily oversubscribed, reflecting confidence in high-quality credit. The U.S. Federal Reserve's rate cut further boosted sentiment, helping investment-grade bonds outperform other fixed-income assets. High-yield bonds also performed well, with spreads tightening more significantly than their investment-grade counter-parts. The sector attracted robust inflows, particularly in U.S. local currency markets, as risk appetite grew. High-yield issuances increased, although some sectors like healthcare and transportation showed elevated risks. Overall, both bond segments benefited from the broader macroeconomic backdrop, including China's renewed stimulus efforts and the Fed's monetary easing. However, potential risks remain, such as geopolitical uncertainties and upcoming U.S. elections, which may introduce volatility in the months ahead. The fund recorded a larger inflow, which was used for additional investments in top-tier high-yield and low investment-grade assets.
