## Current fund strategy

Raiffeisen-Asia-Opportunities-ESG-Aktien (ein Anlagefonds von Raiffeisen Capital Management Österreich) (R) is an equity fund. It invests globally, primarily in shares of companies that are based in or mainly do business in Asia. Within Asia, its focus is currently on China, India, Taiwan, South Korea, and the Southeast Asian emerging markets in the ASEAN alliance. The fund management works to optimise the risk-return profile using additional active strategies. The Fund is particularly suitable for investors who wish to benefit from the long-term earnings potential of the emerging markets in Europe and Asia and are aware of the related risks, ranging from elevated price volatility to possible loss of capital or unfavourable currency developments.

The fund is actively managed without reference to a benchmark.

## Recommended holding period in years

## Comments from fund management

The stock markets in the emerging Asian countries were mixed in January. The stock exchanges in South Korea, Taiwan and Indonesia recorded the highest price gains. There were price losses on the stock markets in India, the Philippines and Malaysia.

Technology companies in Taiwan were bought as companies continue to report very strong demand for AI servers. Industrial stocks in India were reduced due to a recent slight decline in incoming orders.

China's economy grew by 5.4% in the fourth quarter of 2024, bringing annual growth in 2024 to exactly 5% and meeting the government's target. Experts advise the government to try to transfer industrial and export gains to consumers, as many Chinese are complaining about deteriorating living standards. (23.01.2025)

<sup>1</sup> The performance is calculated by Raiffeisen KAG on the basis of published fund prices, using the method developed by OeKB (Österreichische Kontrollbank AG). Individual costs such as transaction fees, the subscription fee, the redemption fee, the custody charges of the investor and taxes are not included in the performance calculation. If included, these would lead to a lower performance. Past performance is not a reliable indicator of future performance. Markets could develop very differently in the future. Based on the illustration, you can assess how the fund was managed in the past. Notice for investors with a different functional currency than the fund currency: We expressly point out that returns may rise or fall due to currency fluctuations.

<sup>2</sup> The risk indicator assumes you keep the product for 10 years.

<sup>3</sup> These are the ongoing costs incurred if you exit after 1 year. The ongoing costs are comprised of management fees and other administrative or operating costs (Estimate on the basis of the actual costs over the last year) as well as transaction costs (estimate of the costs incurred when the management company buys and sells the underlying investments for the fund. The actual amount will vary depending on how much the management company buys and sells.) Value pursuant to the key information document valid at the time of preparing this information.

<sup>4</sup> Raiffeisen Kapitalanlage-Gesellschaft m.b.H. continually analyses companies and countries with the help of internal and external research providers. Together with an overall ESG rating including an ESG risk assessment, the results of the sustainability research are converted into the so-called Raiffeisen ESG Indicator. The Raiffeisen ESG Indicator is measured on a scale of 0-100. The assessment is made in consideration of each company's respective branch of business.
