

Raiffeisen-Nachhaltigkeit-Momentum (ein Anlagefonds von Raiffeisen Capital Management Österreich) (I)

Current fund strategy

Raiffeisen-Nachhaltigkeit-Momentum (ein Anlagefonds von Raiffeisen Capital Management Österreich) (I) is an equity fund that currently invests primarily in small and medium-sized European companies. The focus is on companies whose sustainability has improved significantly over the past three years (sustainability momentum) and that have strong earnings power in the opinion of the fund management. The Fund promotes ecological/social characteristics and to this end it invests in equities and bonds on the basis of ESG (environmental, social, governance) criteria. At least 51% of the Fund's investments are sustainable with social and environmental objectives; at this time, investment in line with the EU Taxonomy Regulation is not targeted. The Fund is suitable for investors who wish to benefit from the long-term earnings potential of a diversified equity investment in small and medium-sized European enterprises and are aware of the risks, ranging from high price volatility to possible loss of capital. The fund is actively managed without reference to a benchmark.

Recommended holding period in years

Comments from fund management

The performance of the international equity markets was very volatile in August. Early in the month, prices fell sharply due to worries about a recession in the USA and severe market turbulence in Japan. The markets then bounced back quickly. After the dip in prices, the fund also posted a gain. Companies including Straumann and Rational saw strong performance while Tomra and Umicore were among the worst-performing names.

There were no changes in the portfolio's securities in August.

The fund focuses on companies that have improved their sustainability rating in recent years, with the prospect that this development will also have a positive effect on their financial performance. The fund invests equally in 50 European names. (23.08.2024)

The collective investment scheme is domiciled in Austria.

¹ The performance is calculated by Raiffeisen KAG on the basis of published fund prices, using the method developed by OeKB (Österreichische Kontrollbank AG). Individual costs such as transaction fees, the subscription fee, the redemption fee, the custody charges of the investor and taxes are not included in the performance calculation. If included, these would lead to a lower performance. Past performance is not a reliable indicator of future performance. Markets could develop very differently in the future. Based on the illustration, you can assess how the fund was managed in the past. Notice for investors with a different functional currency than the fund currency: We expressly point out that returns may rise or fall due to currency fluctuations.

² The risk indicator assumes you keep the product for 10 years.

³ These are the ongoing costs incurred if you exit after 1 year. The ongoing costs are comprised of management fees and other administrative or operating costs (Estimate on the basis of the actual costs over the last year) as well as transaction costs (estimate of the costs incurred when the management company buys and sells the underlying investments for the fund. The actual amount will vary depending on how much the management company buys and sells.) Value pursuant to the key information document valid at the time of preparing this information.
