

Regnan Global Equity Impact Solutions Fund

Fact Sheet | June 2024

Data as at 31 May 2024

A EUR Class

Fund overview

- The Fund aims to generate long-term outperformance by investing in the listed shares of mission-driven companies that create value for investors by providing solutions for the growing unmet sustainability needs of society and the environment, using the United Nations Sustainable Development Goals (SDGs) as an investment lens
- Underpinned by the Regnan SDG taxonomy – the team has built a comprehensive proprietary framework to identify companies that provide solutions to the environmental and societal challenges facing the world
- An actively managed, high conviction, diversified, global multi-cap portfolio with very low portfolio turnover and a strong emphasis on driving impact through engagement
- Benchmark: MSCI ACWI Investable Market Index
- The use of the Index does not limit the investment decisions of the fund manager, therefore the shareholdings of the Fund may differ significantly from those of the Index
- SFDR classification: Article 9. Please click [here](#) for further details
- Please see the [Prospectus/KIID/KID](#) for further information. Please ensure you read and understand these documents before making an investment and wherever possible obtain professional advice

Past performance is no guarantee of future performance.

The value of an investment and the income from it can fall as well as rise as a result of market and currency fluctuations and you may not get back the amount originally invested. For further information on risks please refer to the Fund's KIID/KID and/or the Prospectus. Investing in companies in emerging markets involves higher risk than investing in established economies or securities markets. Emerging Markets may have less stable legal and political systems, which could affect the safe-keeping or value of assets. The Fund's investment include shares in small-cap companies and these tend to be traded less frequently and in lower volumes than larger companies making them potentially less liquid and more volatile. NAV of Share Class A in EUR, net income reinvested, net of fees. The A EUR Class was launched on 19 January 2021. Performance of other share classes may vary and is available on request.

*Annualised since launch.

Portfolio analysis (%)

Data as at 31 May 2024

Top 10 holdings

Stock	Impact Solution	Absolute
Hannon Armstrong	Hannon Armstrong Sustainable Infrastructure (HASI) is the first listed US company whose business model is solely dedicated to financing climate solutions, ranging from behind-the-meter assets, such as energy efficiency improvements of buildings, to renewable energy, such as solar land. Given Hannon's stellar impact performance, our engagement with HASI will be limited and will predominantly focus on incentivising further governance changes.	5.4
Ecolab	Ecolab is a leader in integrated solutions to improve water and energy efficiency, while at the same time improve sanitation. In 2019, Ecolab helped its customers save 206 billion gallons of water, equivalent to the annual drinking water needs of 712 million people, save 28 trillion Btu of energy and avoid 1.5 million metric tonnes of greenhouse gas emissions.	5.3
Xylem	Xylem is a leading provider of water equipment and solutions that enable water reuse and conservation to mitigate water scarcity, reduce water losses and optimize water system assets to improve water affordability. Freshwater and wastewater systems in developed countries have suffered decades of underinvestment, with as much as half of water leaking in many cities. In developing countries, improved sanitation means new infrastructure. As well as being a leader in water equipment, Xylem is notably providing innovative digital solutions to enable smart management of water systems.	5.2
PTC	Productivity growth across OECD countries was lower in the decade leading up to 2016 than it was in any other decade from 1950 (UN). While technological progress and innovation has continued, the adoption of Industry 4.0 solutions with potential to deliver significant productivity improvements remains low, particularly from small and medium sized enterprises where the costs of upgrading can be prohibitive. PTC's solutions drive digital transformation, which reduces waste and scrap in the products they design, creates efficiencies in their manufacturing processes, and optimizes the operations of their customers' processes. PTC provides global leading software solutions across the life cycle of products through computer aided design, product life cycle management, industrial IoT and augmented reality. PTC solutions increase productivity and efficiency of R&D by reducing design time by up to 30%, make manufacturing more efficient and less wasteful with up to 30% reduction in prototypes, thereby reducing costs and raw material use, and reduce the time to market by up to 57%. PTC is also improving access to Industry 4.0 solutions for smaller enterprises through the recent addition of multi-tenant SaaS based CAD (Onshape) and PLM (Arena).	4.9
Novo-Nordisk	Novo Nordisk is a global leader in providing treatment for diabetes, obesity and rare diseases. The company has been pioneering the development of GLP-1 therapies for the treatment and prevention of diabetes, obesity, and potential new indications such as cardiovascular and kidney disease.	4.9
Lonza Group	Biologic, large-molecule drugs, currently grow twice as fast as their small-molecule counterparts, owing to their exceptional efficacy ability to address previously untreatable conditions, such as cancers and autoimmune diseases. However, the manufacturing of biologics is complex, expensive and resource-intensive. As the world's leading contract manufacturing and development company, Lonza allows biotech companies to outsource that process manufacturing process, thereby helping them to develop more potent, complex medicines at lower cost and increased speed-to-market.	4.7
Qiagen	Molecular diagnostics is the fastest-growing segment of the in-vitro diagnostics industry. It enables earlier diagnosis, allows monitoring of disease progression and better guidance for therapeutic decision-making. Qiagen's 'Sample to Insight' product philosophy is designed to facilitate uptake of molecular diagnostics. By empowering users without sophisticated molecular biology expertise to use molecular diagnostic technologies, taking them straight from the biological sample to actionable insight, Qiagen expands the adoption of molecular diagnostics, improving patient outcomes.	4.3
ANSYS	As a global leader in simulation solutions, ANSYS enables faster R&D, makes manufacturing more efficient and less wasteful, thereby reducing costs, as well as permitting environmentally-friendly specifications to be embedded at the design phase of product. Its simulation software is used in developing impact solutions such as electric and autonomous vehicles, renewable energy and introducing environmental data into the choice of materials.	4.1
Munters	Munters is the pioneer and market leader in desiccant dehumidification (c.50% market share), a key technology required for lithium ion battery plants. Manufacturing of lithium-ion batteries is a highly sensitive process requiring strict temperature and dryness parameters (<1% relative humidity) to ensure safety, quality and production yield. Munters have also developed a patented technology for data centre cooling (SyCool) providing significant energy and water savings which is driving strong order intake and market share gains.	4.0
Kardex	Kardex is one of the leading global intralogistics solution providers with products that improve the efficiency of logistics processes within manufacturing and distribution centres through automation. These include vertical and horizontal storage and buffer units, lift and carousel modules, which are used to store and handle components used in manufacturing and distribution. Kardex's innovative Remstar solutions can drive up to an 85% reduction in space required, increasing productivity levels by 67%, eliminating picking errors and providing a more ergonomic delivery solution for employees.	4.0
Total		46.8

Important information

Issued and approved in the UK by J O Hambro Capital Management Limited ("JOHCM") which is authorised and regulated by the Financial Conduct Authority. Registered office: Level 3, 1 St James's Market, London SW1Y 4AH. Issued in the European Union by Perpetual Investment Services Europe Limited ("PISEL") which is authorised by the Central Bank of Ireland. Registered office: 24 Fitzwilliam Place, Dublin 2, Ireland D02 T296. References to "JOHCM" below are to either JOHCM or PISEL as the context requires. Perpetual Group is a trading name of JOHCM and PISEL. This is a marketing communication. Please refer to the fund prospectus and to the KIID / KID before making any final investment decisions.

These documents are available in English at www.johcm.com, and available from PISEL, or (for UK investors) JOHCM, at the addresses set out above. Information on the rights of investors can be found here

The distribution of this document in jurisdictions other than those referred to above may be restricted by law ("Restricted Jurisdictions"). Therefore this document is not intended for distribution in any Restricted Jurisdiction and should not be passed on or copied to any person in such a jurisdiction.

The registrations of the funds described in this document may be terminated by JOHCM at its discretion from time to time.

Notice to investors in Switzerland: The representative of the Company in Switzerland is 1741 Fund Solutions Ltd., Burggraben 16, 9000 St. Gallen, Switzerland (the "Representative"). The paying agent of the Company in Switzerland is Telco Ltd, Bahnhofstrasse 4, 6430 Schwyz, Switzerland. The Prospectus, the KIDs, the Instrument of Incorporation / the Constitution, and the annual and semi-annual reports may be obtained free of charge from the Representative. The Company is defined as J O Hambro Capital Management UK Umbrella Fund (domiciled in the UK), Perpetual Investment Services Europe ICAV (domiciled in Ireland) or Regnan Umbrella Fund ICAV (domiciled in Ireland), as relevant.

The investment promoted concerns the acquisition of shares in a fund and not the underlying assets.

Past performance is no guarantee of future performance. The value of an investment and the income from it can fall as well as rise as a result of market and currency fluctuations and you may not get back the amount originally invested.

Investing in companies in emerging markets involves higher risk than investing in established economies or securities markets. Emerging Markets may have less stable legal and political systems, which could affect the safe keeping or value of assets.

Investments include shares in small cap companies and these tend to be traded less frequently and in lower volumes than larger companies making them potentially less liquid and more volatile.
