

CT (Lux) Global Total Return Bond

Share Class I Acc JPY Hedged

31-Oct-24 | For qualified investors only

Fund manager

Fixed Income Team

Fund objective and policy

The Fund aims to provide an attractive level of return through a combination of income and capital growth. The Fund is actively managed. It is not constrained by its comparator benchmark, the Bloomberg Global Aggregate Total Return EUR Hedged Index and has significant freedom to invest in a portfolio materially different to the benchmark's own composition. The Fund seeks to achieve its objective by investing in a diversified spread of Fixed Income and Floating Rate securities, as well as synthetic derivative instruments, which provide exposure to interest rate, credit and FX markets. Synthetic derivative instruments can be used to hedge market risk or to express investment views.

Risk warning

The value of investments and any income derived from them can go down as well as up as a result of market or currency movements and investors may not get back the original amount invested. The income and capital due from bonds is dependent upon the issuer's ability to pay and any default will adversely affect the value of your investment. Changes in interest rates can affect the value of fixed interest holdings and may adversely affect the value of your investment. An investment concerns the acquisition of units or shares in a fund, and not underlying assets such as buildings or shares of a company, as these are only the underlying assets owned by the fund. The decision to invest in the promoted fund should also take into account all the characteristics or objectives of the promoted fund as described in the prospectus. Full list of relevant risks can be found in the KIID/KID and prospectus.
