Investment philosophy

The sub-fund's objective is long-term capital appreciation and, additionally, the generation of regular income, with a share of the assets invested in equities that fluctuates around 35%. Flexible and diversified management of exposures aims to limit the impact of sharp market declines.

Risk profile

The synthetic risk indicator (SRI) is used to assess the risk level of this product compared to others, taking into account market and credit risks. Its calculation method is based on the assumption that the investor holds the fund for the recommended holding period of 5 years.

DISCLAIMER

- The figures shown refer to past years.
- Past performance is not an indicator of current or future performance and the performance data does not take into account fees and charges taken at issue or redemption of units.
- As the sub-fund does not have a benchmark index, its performance is not compared to one.
- If the reference currency is different from the currency of the investor's country of residence, resulting gains may be increased or reduced depending on exchange rate fluctuations.
- The value of the investment may fluctuate both upwards and downwards.
- The investment carries a risk of capital loss that can go up to the total loss of the investment.
- The tax treatment depends on the individual situation of each investor and may change later on.
