

CRONOS Active Allocation Fund I

30 June 2024
Switzerland

Mutual fund

Class I

INVESTMENT POLICY

The objective of the CRONOS Active Allocation Fund is to generate stable and consistent returns over a full economic cycle (growth, expansion, recession, decline). Management is active with a dynamically managed tactical asset allocation. It is based on a fundamental analysis of macroeconomic and financial parameters.

The sub-fund invests, directly or indirectly, up to 80% of its assets in bonds issued by debtors worldwide and up to 65% in equities issued by companies around the world. The sub-fund is also authorised to invest, directly or indirectly, a maximum of 50% of its assets in money market instruments. It may also invest up to 15% of its assets in commodities, via units of collective investment schemes and structured products, and in real estate, via units of collective investment schemes and real estate companies, up to a maximum of 30% of its assets.

RISK INDICATOR

The disclaimer mentioned at the end of this document also applies to this page.
Asset Allocation presented on this page may change over time.

POTENTIAL RISKS

The Fund's risk and reward profile does not reflect the risk inherent in future circumstances that differ from what the Fund has experienced in the recent past. This includes the following events which are rare but can have a large impact.

- Credit risk: Issuers of assets held by the Fund may not pay income or repay capital when due. Part of the Fund's investments may have considerable credit risk.
- Liquidity risk: Assets cannot necessarily be sold at limited cost in an adequately short timeframe. The Fund's investments may be prone to limited liquidity. The Fund will endeavor to mitigate this risk by various measures.
- Counterparty risk: Bankruptcy or insolvency of the Fund's derivative counterparties may lead to payment or delivery default. The Subfund will endeavor to mitigate this risk by the receipt of financial collateral given as guarantees.
- Operational risk: Deficient processes, technical failures or catastrophic events may cause losses.
- Political and Legal risks: Investments are exposed to changes of rules and standards applied by a specific country. This includes restrictions on currency convertibility, the imposing of taxes or controls on transactions, the limitations of property rights or other legal risks. Investments in less developed financial markets may expose the Fund to increased operational, legal and political risk.
- Sustainability risks: Sustainability risks are environmental, social or governance events or conditions can have a material negative effect on the return, depending on the relevant sector, industry and company exposure.
- The Fund's use of leverage may lead to an amplified reaction to market movements, i.e. increase the volatility of the Fund and may amount to a more substantial loss than in unleveraged products.
