-0.02	-2.37	-15.76	-13.12	-6.53	796.5
Fund Annualized Performance (%)					Assets Under Management (M)
3 Y.	5 Y.	10 Y.	Launch	CHF	
-5.55	-3.87	-1.40	-0.59	26.18	

Dividend Record

	Record-Date	Ex-Date	Dividend per Share	12 month Yield (%)
Dec 2020	30/11/2020	01/12/2020	13.57	1.30
Dec 2021	30/11/2021	01/12/2021	11.75	1.17
Dec 2022	30/11/2022	01/12/2022	12.28	1.42
Dec 2023	30/11/2023	01/12/2023	10.93	1.34
Dec 2024	29/11/2024	02/12/2024	11.92	1.47

12 Month Yield = (Sum of Dividends) / (Ending NAV). The 12 Month yield is calculated based on the sum of the distributions over the previous 12 months and the latest NAV. The 12 month yield may be higher or lower than the actual annual dividend yield. A positive distribution yield does not imply positive return. Dividends are not guaranteed. Past dividends are not indicative of future dividends.

Investors should not make any investment decision solely based on information contained in the table above. You should read the relevant offering document (including the key facts statement) of the fund for further details including the risk factors.

Performance & Risk

Performance evolution (CHF)

Data is rebased to 100 by AXA IM on the graph start date.

Performance calculations are net of fees, based on the reinvestment of dividends. The benchmark, when there is one could be calculated on the basis of net or gross dividend. Please refer to the prospectus for more information.

As disclosed in the most recent Annual Report, the ongoing charges calculation excludes performance fees, but includes management and applied services fees. The effective Applied Service Fee is accrued at each calculation of the Net Asset Value and included in the ongoing charges of each Share Class. The investment will be reduced by the payment of the above mentioned fees.

Fund Objectives

The Sub-Fund Bonds Global ex CHF invests in international fixed income securities (including convertible bonds and bonds with options), concentrating on bonds denominated in Yen, US dollar and European currencies. The Sub-Fund is suitable for investors seeking to participate in an internationally diversified portfolio of bonds. Investments are actively selected against the FTSE World Government Bond Index ex CHF hedged in CHF TR, and particular attention is given to bonds with a good to very good credit rating.

In particular, the currency-hedged share class C3 (H) CHF aims to reduce around 90% of the currency risk arising from the four main currencies - EUR, JPY, USD, GBP - versus the Swiss franc. The four main currencies represent around 93% of the total foreign currency exposure (the fund contract provides for hedging at least 75% of this).

Investment Horizon

This Sub-Fund may not be suitable for investors who plan to withdraw their contribution within 5 years.

Subscription Redemption

How to Invest

Before making an investment, investors should read the relevant Prospectus and the Key Investor Information Document (particularly for UK investors) / Key Information Document / scheme documents, which provide full product details including investment charges and risks. The information contained herein is not a substitute for those documents or for professional external advice.

Retail Investors

Retail investors should contact their Financial intermediary.

ESG Metrics Definition

Our approach to ESG measurement seeks to combine qualitative and quantitative techniques. The tree rating shown in this report is a simple pictorial representation of the overall ESG rating of the fund's portfolio. A fund which has 1 tree has a poor ESG rating, whereas a fund with 5 trees has a high ESG rating. For more information on our ESG standards, approach and methodology please visit: Putting ESG to work | AXA IM Core (axa-im.com).

ESG relative rating is calculated as the difference between the ESG absolute rating of the portfolio and the ESG absolute rating of benchmark. If ESG Relative rating is positive (negative), this means that the portfolio has a higher (lower) ESG absolute rating than the benchmark.

CO2 relative intensity is calculated as the difference between the intensity of the fund (expressed in tCO2/M€ Revenues) and the one of benchmark.

If CO2 Relative intensity is green, it means that the intensity of portfolio is lower than that of the benchmark. If CO2 Relative intensity orange, it means that the intensity of the portfolio is higher than that the benchmark. If CO2 Relative intensity is yellow, it means that intensity of the portfolio is similar than that of the benchmark.

ESG indicators are for informational purposes only.

The portfolio does not present any regulatory or contractual objectives on ESG indicators.

Disclaimers

This marketing communication does not constitute on the part of AXA Investment Managers a solicitation or investment, legal or tax advice. This material does not contain sufficient information to support an investment decision. The information contained herein is intended solely for the entity and/or person(s) to which it has been delivered, unless otherwise allowed under applicable agreements.

The tax treatment associated with holding, buying or disposing of

Additional Information (Continued)

shares or units in a fund depends on the status or tax treatment of each investor and may be subject to change. Potential investors are strongly encouraged to seek the advice of their own tax adviser.

Due to its simplification, this document is partial and opinions, estimates and forecasts herein are subjective and subject to change without notice. There is no guarantee forecasts made will come to pass. Data, figures, declarations, analysis, predictions and other information in this document is provided based on our state of knowledge at the time of creation of this document. Whilst every care is taken, no representation or warranty (including liability towards third parties), express or implied, is made as to the accuracy, reliability or completeness of the information contained herein. This material does not contain sufficient information to support an investment decision.

Past performance is not a guide to current or future performance, and any performance or return data displayed does not take into account commissions and costs incurred when issuing or redeeming units. The value of investments, and the income from them, can fall as well as rise and investors may not get back the amount originally invested. Exchange-rate fluctuations may also affect the value of their investment. Due to this and the initial charge that is usually made, an investment is not usually suitable as a short term holding. Commissions and costs have an adverse effect on the performance of the fund.

The Fund's characteristics do not protect the investors from the potential effect of inflation over time. The investments and/or any potential income generated during the period will not be adjusted by the rate of inflation over the same period. Thus, the return on the fund adjusted from the rate of inflation could be negative. Consequently, the inflation might undermine the performance and/or the value of your investment.

Cash includes liquid assets and equivalent items such as cash held in bank accounts, positions in money market funds or unrealised gains receivable or payable in respect of currency hedging transactions.

The Fund referenced herein has not been registered under the United States Investment Company Act of 1940, as amended, nor the United States Securities Act of 1933, as amended. None of the shares may be offered or sold, directly or indirectly in the United States or to any US Person unless the securities are registered under the Act, or an exemption from the registration requirements of the Act is available. A US Person is defined as (a) any individual who is a citizen or resident of the United States for federal income tax purposes; (b) a corporation, partnership or other entity created or organized under the laws of or existing in the United States; (c) an estate or trust the income of which is subject to United States federal income tax regardless of whether such income is effectively connected with a United States trade or business. In the United States, this material may be distributed only to a person who is a "distributor," or who is not a "U.S. person," as defined by Regulation S under the U.S. Securities Act of 1933 (as amended).

Companies shown are for illustrative purposes only at the date of this report and may no longer be in the portfolio later. It does not constitute investment research or financial analysis relating to transactions in financial instruments, nor does it constitute an offer to

buy or sell any investments, products or services, and should not be considered as solicitation or investment, legal or tax advice, a recommendation for an investment strategy or a personalized recommendation to buy or sell securities.

Depending on the recipient's respective jurisdiction or region, the following additional disclosures may apply:

For the AXA Swiss Institutional Fund, a contractual open-ended umbrella fund under Swiss law ("Other Funds for Traditional Investments" category) for professional investors, the fund contract and the annual reports can be obtained free of charge from the fund management company AXA Investment Managers Switzerland Ltd, Ernst-Nobs-Platz 7, P.O. Box 1078, CH-8021 Zurich. The custodian bank is State Street Bank International GmbH, Munich, Zurich branch, Beethovenstrasse 19, CH-8002 Zurich. In respect of the units distributed in Switzerland, the place of performance and jurisdiction is Zurich, Switzerland.

Glossary

Volatility (%): is an indicative measure of degree of variation of an asset's price changes over time.

Relative Risk/Tracking Error (%): measures, in standard deviation, the fluctuation of returns of a portfolio relative to the fluctuation of returns of a reference index. The tracking error can be viewed as an indicator of how actively a fund is managed. The lower the number the closer the fund's historic performance has followed its benchmark.

Sharpe ratio: is the measure of the risk-adjusted excess return over risk free rate of a financial portfolio and is used to compare the excess return of an investment to its risk. The higher the Sharpe ratio the better the return compared to the risk taken.

Information Ratio (IR): is a measurement of portfolio returns above the returns of a benchmark to the volatility of those excess returns. The IR is used to compare excess return over a benchmark to excess risk over a benchmark. E.g : A manager who outperforms a benchmark by 2% p.a. will have a higher IR than a manager with the same outperformance who has taken more risk.
