1) The calculation of the risk indicator is based on the CESR/10-673 Guidelines. The risk indicator is based on historic and partly simulated data; it cannot be used to predict future developments. The classification of the Fund may change in future and does not represent a guarantee. A classification into category 1 is no risk-free investment either, 7 is the highest risk.

2) If the currency of a financial product and/or its costs is different from your reference currency, the return and cost may increase or decrease as a result of currency fluctuations.

3) For more details, please refer to the relevant chapter "Net Asset Value" of the Fund's prospectus. Asset Allocation presented on this page may change over time.

Glovista Fundamental Emerging Markets Equity Fund

Portfolio Summary

This fund does not invest in companies which are involved in the development or production of nuclear, biological, and chemical warfare agents, anti-personnel mines and cluster bombs according to the exclusion list from the Swiss Association for Responsible Investments.

Legend

4) MSCI ESG Fund Ratings are designed to measure the Environmental, Social and Governance (ESG) characteristics of a fund's underlying holdings, making it possible to rank or screen mutual funds and ETFs on a AAA (leader) to CCC (laggard) ratings scale.
 5) ESG Ratings represents the ESG Rating breakdown in percentage in an absolute view or relative to a benchmark.
 6) Carbon Intensities compares the weighted average emissions intensity per million \$ sales (broken down by GICS sector) between the portfolio and the benchmark. It also displays active GICS sector weights.
 7) Low Carbon Transition Score from 0 (worst) to 10 (best) is based on a multi-dimensional risk and opportunity assessment by MSCI ESG Research that considers both the predominant and secondary risks that each individual company faces. It is industry-agnostic and represents an absolute assessment of a company's position vis-à-vis the low-carbon transition.
 8) ESG Controversies Flag is designed to provide timely and consistent assessments of ESG controversies involving publicly traded companies and fixed income issuers. A controversy case is typically a one-off event such as an environmental oil spill, an accident, or allegations such as safety issues in a production facility. The colour indicator, which spans from red to green, indicates the most severe involvement (red) to the least involved (green) in any controversies. The grey colour indicates where data is unavailable.
 9) The ESG Quality Score measures the ability of underlying holdings to manage key medium-to long-term risks and opportunities arising from environmental, social, and governance factors. The Fund Percentile Rank measures how a fund's overall ESG Quality Score ranks relative to other funds in the same peer group. ESG Themes represent a break-down of individual E, S and G scores. All scores and its' components are rated on a scale of 0-10 (provided by MSCI), where 0 is very poor and 10 is very good.
 10) For further information on the methodology applied to assess the ESG characteristics of the investments, please refer to www.msci.com/our-solutions/esg-investing/

Glovista Fundamental Emerging Markets Equity Fund

Class UB USD

Review previous quarter ¹¹⁾

In 3Q 2024, the Fund underperformed the MSCI Emerging Markets Index but remains ahead year-to-date. Market volatility intensified in late September, driven by Chinese policy actions that boosted domestic consumption stocks. MSCI EM Growth outpaced MSCI EM Value, with the Consumer Discretionary and Health Care sectors contributing the most. Chinese Consumer Discretionary stocks gained from stimulus measures, while Korean and Indian Health Care names advanced during the quarter partially due to developments around the U.S. BIOSECURE Act.

Growth and Financial stages led the benchmark performance, while Restructuring and Fading Winner stages lagged. While stock selection was strong in Financials, it was a drag in Growth stage leading to

the performance gap during the quarter.

Within Financials, our Indonesian bank holdings rebounded on solid fundamentals after struggling due to rate hike in the previous quarter.

In Growth stage our challenges were specific to Software and Consumer Discretionary sectors.

Our balanced exposure in China between domestic consumption and export-oriented names has meant lack of direct portfolio exposure to Tencent. Given its ~4% weight in the index, taking an active overweight position in the name would have resulted in an over allocation to China. Tencent's rally YTD has been a drag on fund performance as a result.

Within Consumer Discretionary sector, management missteps negatively affected performance. PDD surpassed expectations but issued a conservative indus-

try outlook in contrast to peers, while Miniso's acquisition of a struggling supermarket chain deviated from the typical growth stage company strategy putting it in a penalty box.

New positions, this quarter included Telekom Indonesia, Cia Energetica Minas, Apollo Hospital, and Soop Co., while position in Doosan Bobcat was sold due to strategic concerns.

The Federal Reserve's 50 basis point rate cut in September 2024, the first in four years, signaled a potential easing cycle, which is likely to benefit EM equities. China also announced its largest stimulus package since the COVID-19 pandemic, sparking a stock market rally. However, the impact on credit demand remains uncertain given structural issues are yet to be concretely addressed.

Outlook for the market ¹¹⁾

As we move into the final months of 2024, market volatility is expected to remain high. Factors contributing to this include fluctuating oil prices amid geopolitical tensions in the Middle East and uncer-

tainties surrounding the upcoming U.S. elections. In Brazil, inflation has prompted a new cycle of monetary tightening.

However, several Asian economies are likely to begin

easing interest rates, which could support economic growth in the region. Additionally, China's upcoming political meetings may introduce further positive economic measures.

¹¹⁾ If not expressly indicated otherwise, all quantitative data contained in this comment is based on SimCorp, Bloomberg or Datastream. Forecasts, historical performance indications and financial market scenarios are no reliable indicators of future performance. The performance data does not take into account the commissions and costs incurred on the issue and redemption of fund units. The individual company mentioned on this page are meant for illustration purposes only and are not intended as a solicitation or an offer to buy or sell any interest or any investment.

Potential risks

The Fund's risk and reward profile does not reflect the risk inherent in future circumstances that differ from what the Fund has experienced in the recent past. This includes the following events which are rare but can have a large impact.

- Credit risk: Issuers of assets held by the Fund may not pay income or repay capital when due. The Fund's investments have low credit risk.
- Liquidity risk: Assets cannot necessarily be sold at limited cost in an adequately short timeframe. The Fund's investments may be prone to limited liquidity. The Fund will endeavor to mitigate this risk by various measures.
- Counterparty risk: Bankruptcy or insolvency of the Fund's derivative counterparties may lead to payment or delivery default.
- Operational risk: Deficient processes, technical failures or catastrophic events may cause losses.
- Political and Legal risks: Investments are exposed to changes of rules and standards applied by a specific country. This includes restrictions on currency convertibility, the imposing of taxes or controls on transactions, the limitations of property rights or other legal risks. Investments in less developed financial markets may expose the Fund to increased operational, legal and political risk.
- Sustainability risks: Sustainability risks are environmental, social or governance events or conditions can have a material negative effect on the return, depending on the relevant sector, industry and company exposure.

The investment promoted in this marketing material concerns the acquisition of units or shares in a fund and not of any underlying assets. The underlying assets are owned by the fund only.

The full offering documentations including complete information on risks may be obtained free of charge from a Credit Suisse representative or where available via FundSearch (credit-suisse.com/fundsearch).
